THE ONE-STOP SUPPLIERS

One partner for everything – Rittal serves the entire value creation chain for enclosure manufacturing. This unrivalled pervasiveness helps to boost efficiency and maintain consistently high standards.

The entire value chain from a single source – Comprehensive digitisation and automation steps are also required in panel building and switchgear manufacturing in order to meet the requirements of smart factories and Industry 4.0. Rittal facilitates the seamless integration of engineering, systems and automation with a perfect blend of planning aids, system products and machining solutions. Experience the optimum value chain live at the Rittal Innovation Center in Haiger.

IT INFRASTRUCTURE

SOFTWARE & SERVICES

Engineering

With Rittal and Eplan engineering tools, you can be sure that the data you need is always available at the right time, in the right place, and in the required quality and depth. This enables you to create a virtual prototype.

Benefit: Unrivalled efficiency.

THE WORKFLOW PARTNERS

System

Rittal's comprehensive modular system accommodates every requirement, however individual, and includes enclosure, power distribution, climate control and IT infrastructure systems.

Benefit: Maximum flexibility.

Automation

Boosting efficiency through automation – Rittal Automation Systems supplies all the machines and equipment for this.

Benefit: Exceptional competitiveness.

THE INVENTORS

Ideas to boost efficiency – It all began with the first standardised enclosure, which led to immediate time and money savings for Rittal's customers. It revolutionised the industry. Even today, improving efficiency for users is still our primary objective. Rittal pursues this goal with passion and inventiveness, as evidenced by our approx. 2,000 patents. The latest example is our VX25 large enclosure system.

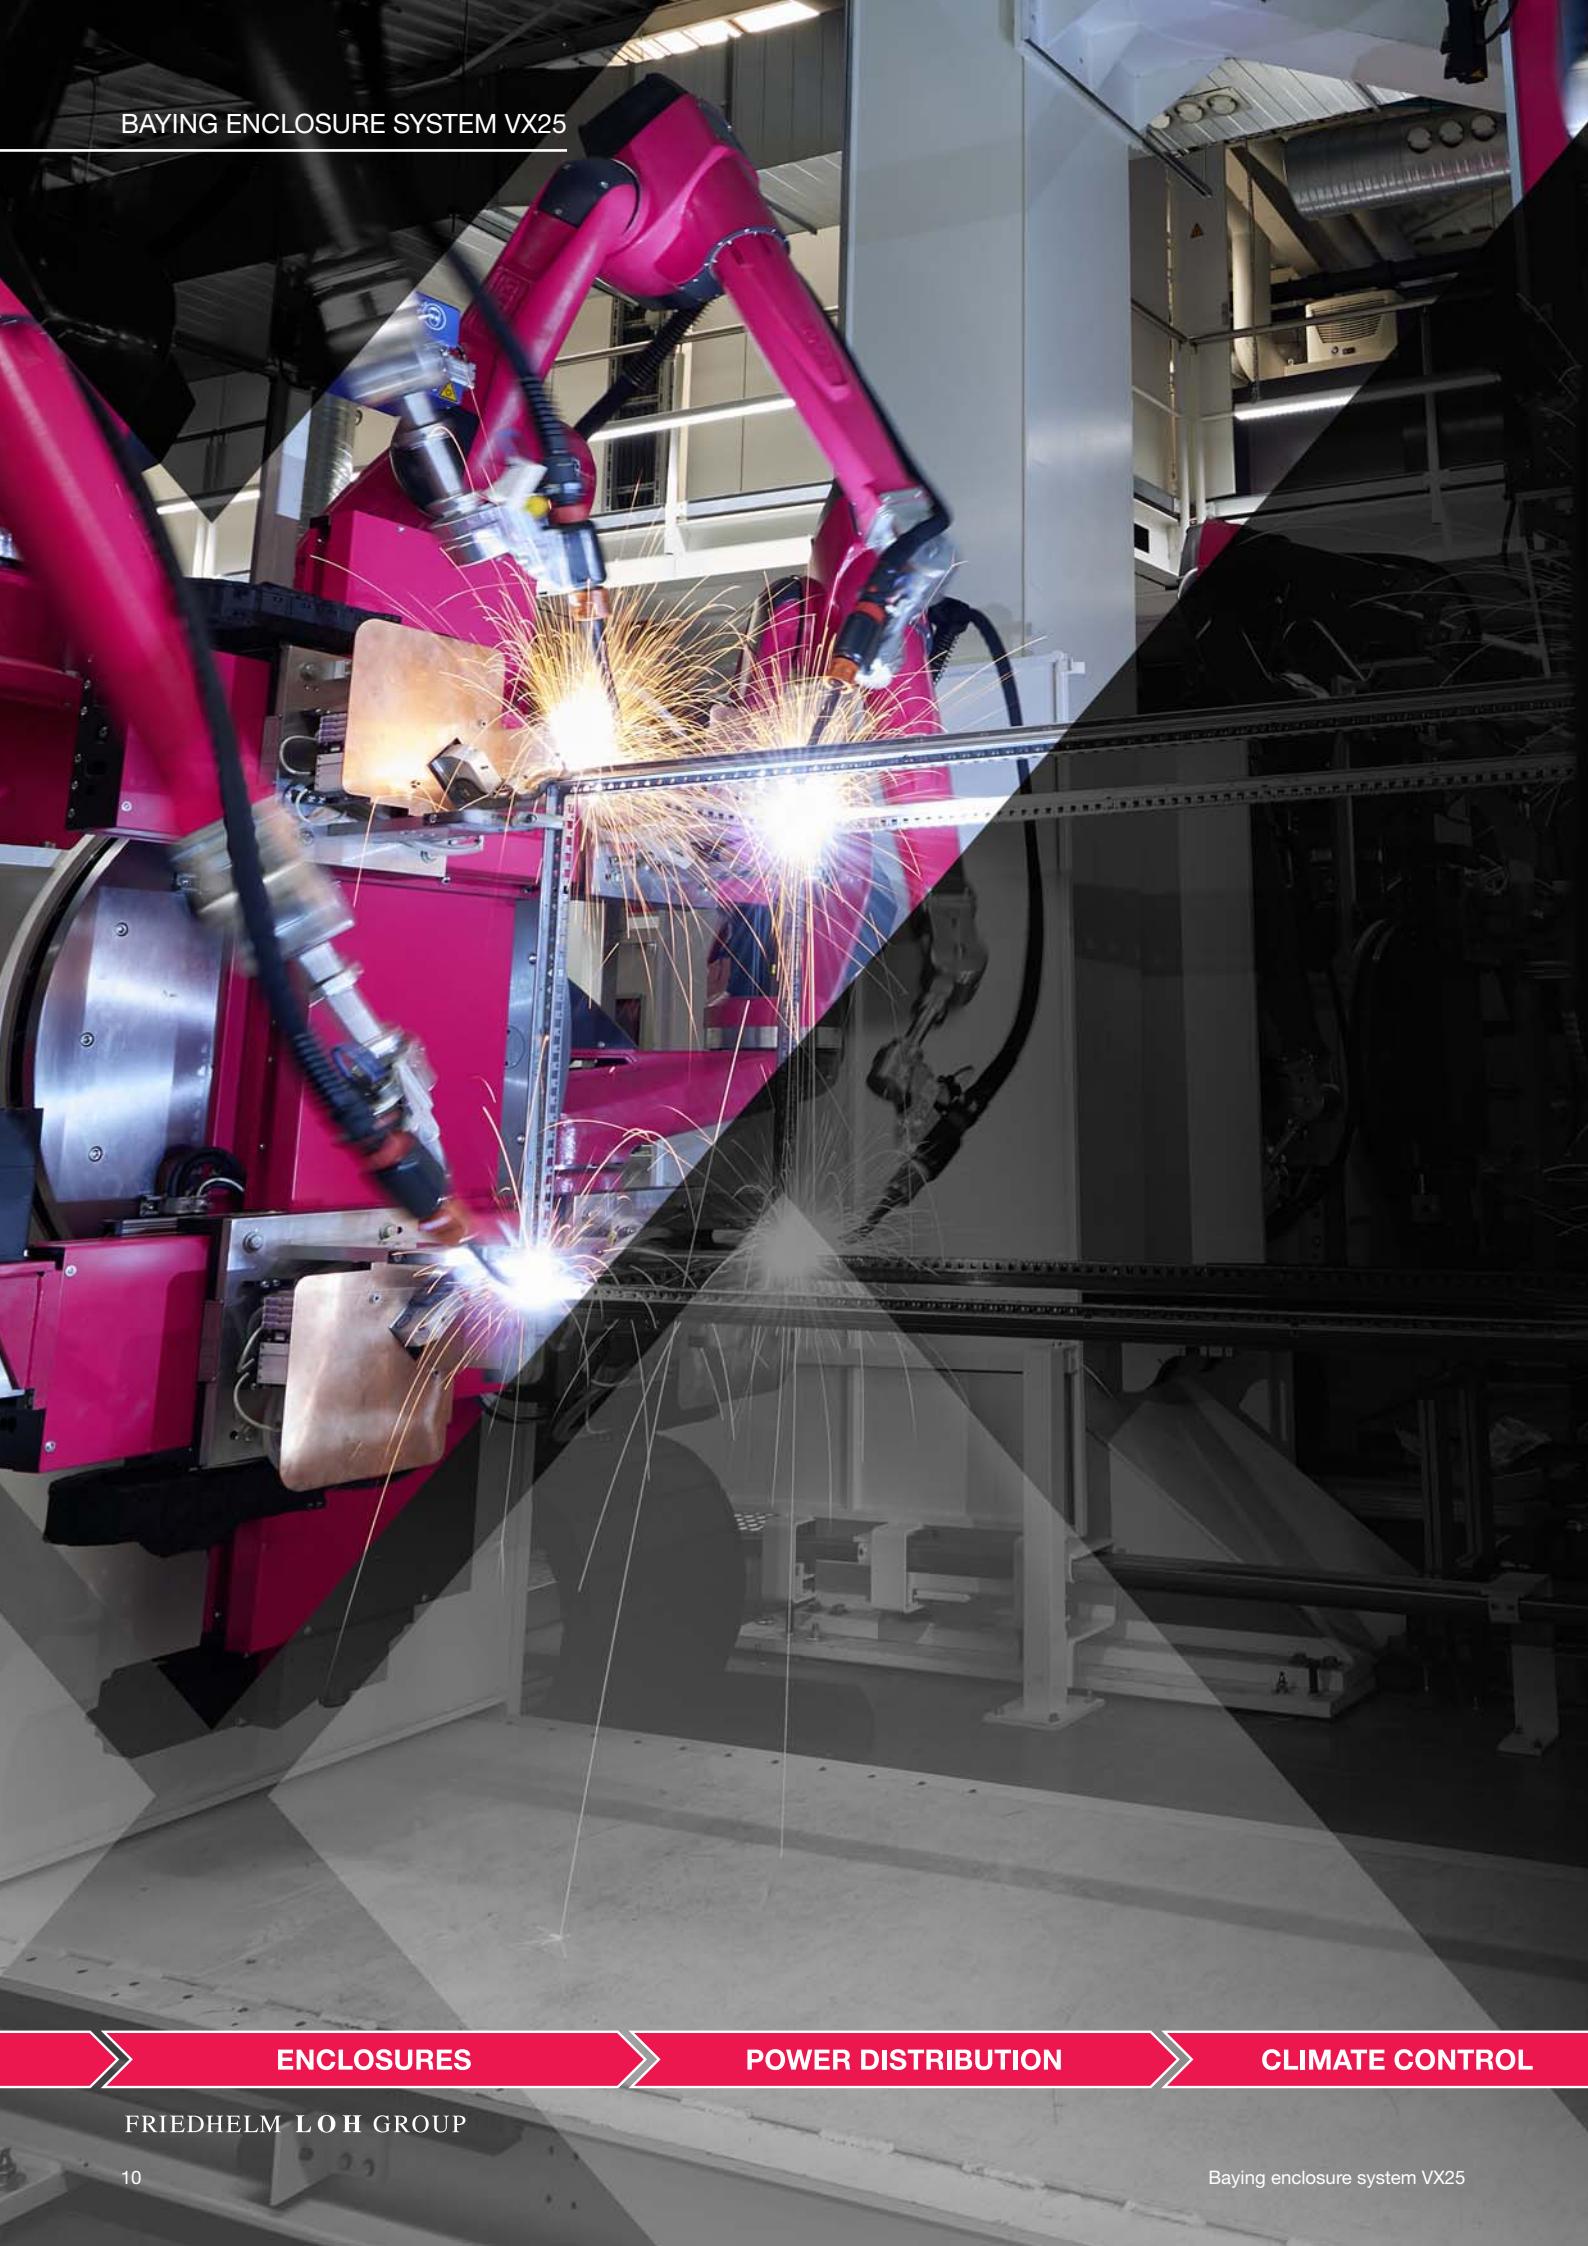

Innovations for improved workflows – Rittal develops new solutions to keep its customers at the cutting edge of technology. The VX25 is a new platform which can be integrated seamlessly into fully automated switchgear and controllgear manufacturing. Workflows become more transparent, faster, and more efficient. The digital twin becomes a reality.

THE MOVERS AND SHAKERS

Manufactured to Industry 4.0 – Made in Germany. The VX25 was developed in Germany, and is also manufactured there to 4.0 standards, using world-class, digitally networked technology. Each day, we produce 15,000 enclosures at 8 production sites on 3 continents, in a consistently high quality and offering unparalleled flexibility and availability.

World-renowned quality – The VX25, with its internationally recognised approvals and certifications, is ideal for global use and meets the highest quality benchmarks. Compliance with global standards is ensured by stringent testing to international regulations, plus regular production inspections by external test institutes.

THE PROBLEM SOLVERS

Fast delivery off the shelf – Rittal's products, including the VX25, are generally available within 24 hours in Europe, and within 48 hours worldwide. To this end, Rittal operates 8 production sites, 64 subsidiaries and approx. 80 sales and logistics centres worldwide. The benefits for Rittal customers include greater flexibility in terms of planning, scheduling and production, less storage space requirements, and reduced capital tie-up.

Fast global service – If you opt for the VX25, you can rely on Rittal's global service operation, dedicated to ensuring plant availability, identifying potential savings, and resolving technical problems in an uncomplicated fashion. The Rittal service network is implemented and maintained by 4 international service hubs, more than 1,000 service specialists and a round-the-clock Rittal service hotline.

THE GLOBAL MARKET LEADERS

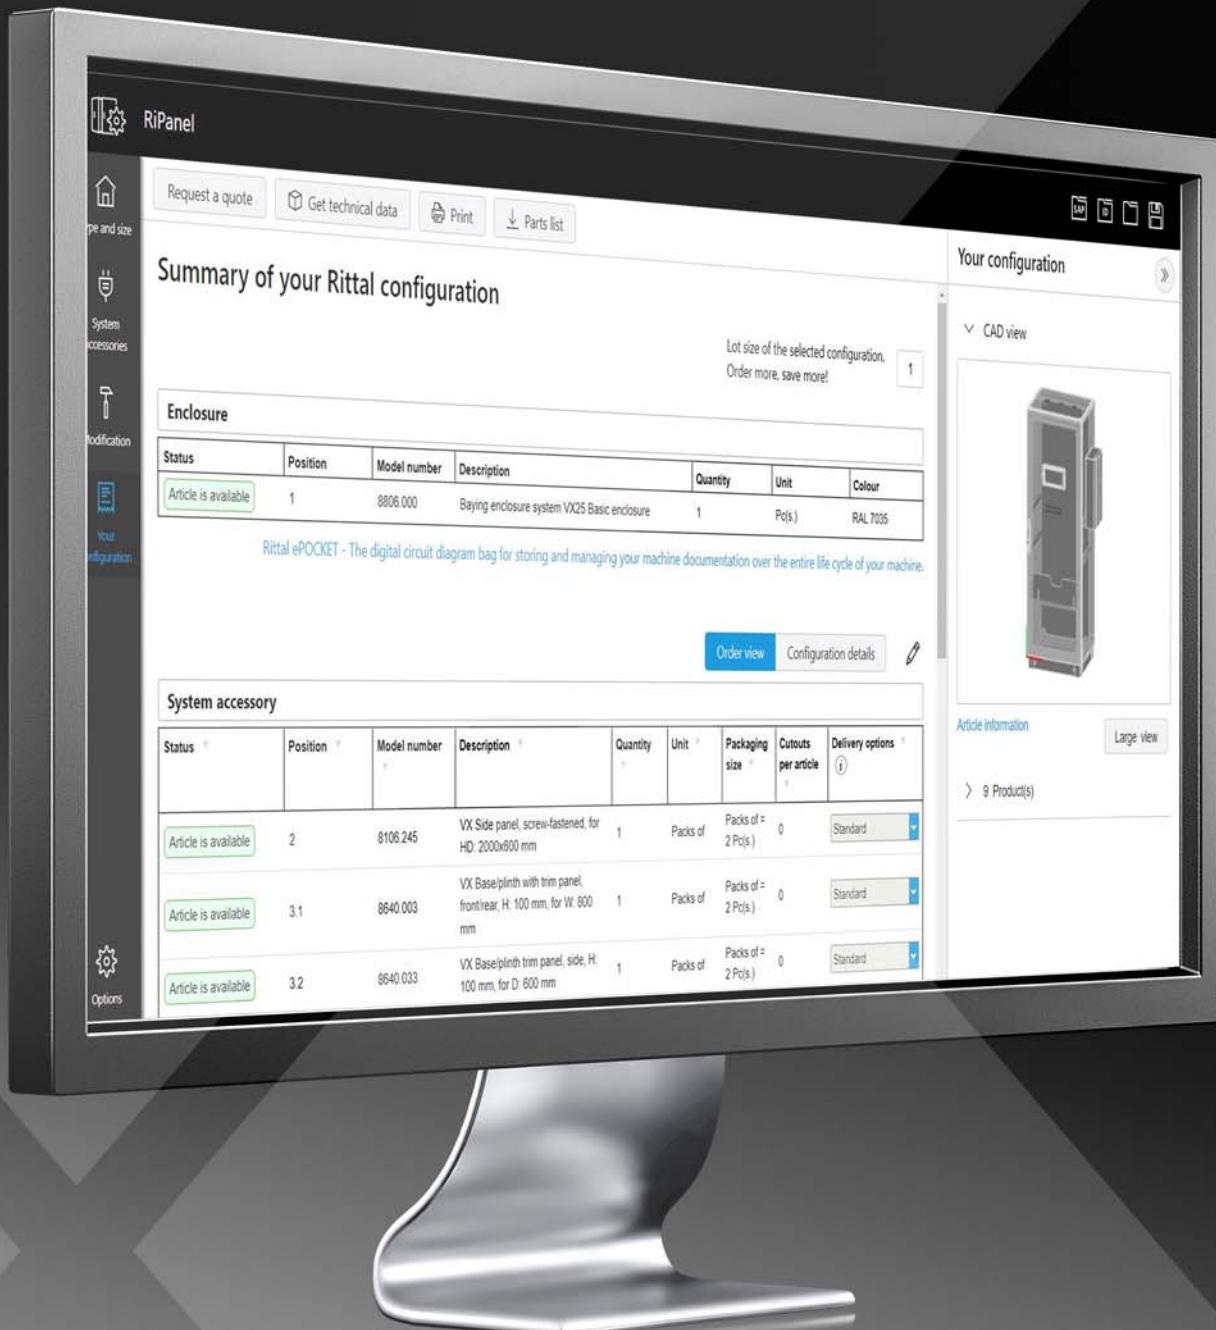

Industry insider – The VX25 is revolutionary when it comes to flexibility and adaptability. And there's a good reason for this: Rittal has an in-depth understanding of the requirements of the various markets, and boasts decades of experience as a partner to all sectors of industry, from automotive, to food, to the aerospace industry.

One-stop supplier – The VX25 is part of the comprehensive Rittal system, available worldwide. It provides everything you need from a modern enclosure manufacturer, from engineering tools, to enclosures, power distribution and climate control, as well as the full range of accessories for assembling and configuring enclosures.

THE TIME SAVERS

Intuitive configuration translates into time savings of up to 95% – To this end, Rittal has devised an online tool, RiPanel. Once you have selected your enclosure, it allows you to precisely position your custom-fit accessories.

Define cut-outs and drilled holes automatically – Even at the configuration stage, the cut-outs required in the panels may be defined with millimetre accuracy and transferred into the plans.

The benefits for you – Finally, the system generates CAD files. Alongside the fully configured design, these files also contain all the data needed to control the Perforex machining centre, making NC-controlled machining of enclosure panels viable even with small batch sizes.

THE BENEFIT PROVIDERS

More digitisation

The QR code on all machinable enclosure panels permits fully automated incorporation into the production workflow, for seamless digital monitoring at every stage, from the incoming merchandise through to completion.

More labour-saving

The new hinge is designed for simple, tool-free installation and removal of the doors, eliminating the need to separately unlock and lock the hinge bolts.

More reduction of parts

The frame section, which is identical both horizontally and vertically, allows uniform punched sections and rails to be used throughout, reducing the number of part variants by up to 40%.

More installation security

The stable base frame enables the direct, secure attachment of the enclosure from the inside. The large opening makes it simple to install cables with large bending radii from the mounting plate to the base.

More assembly-friendly

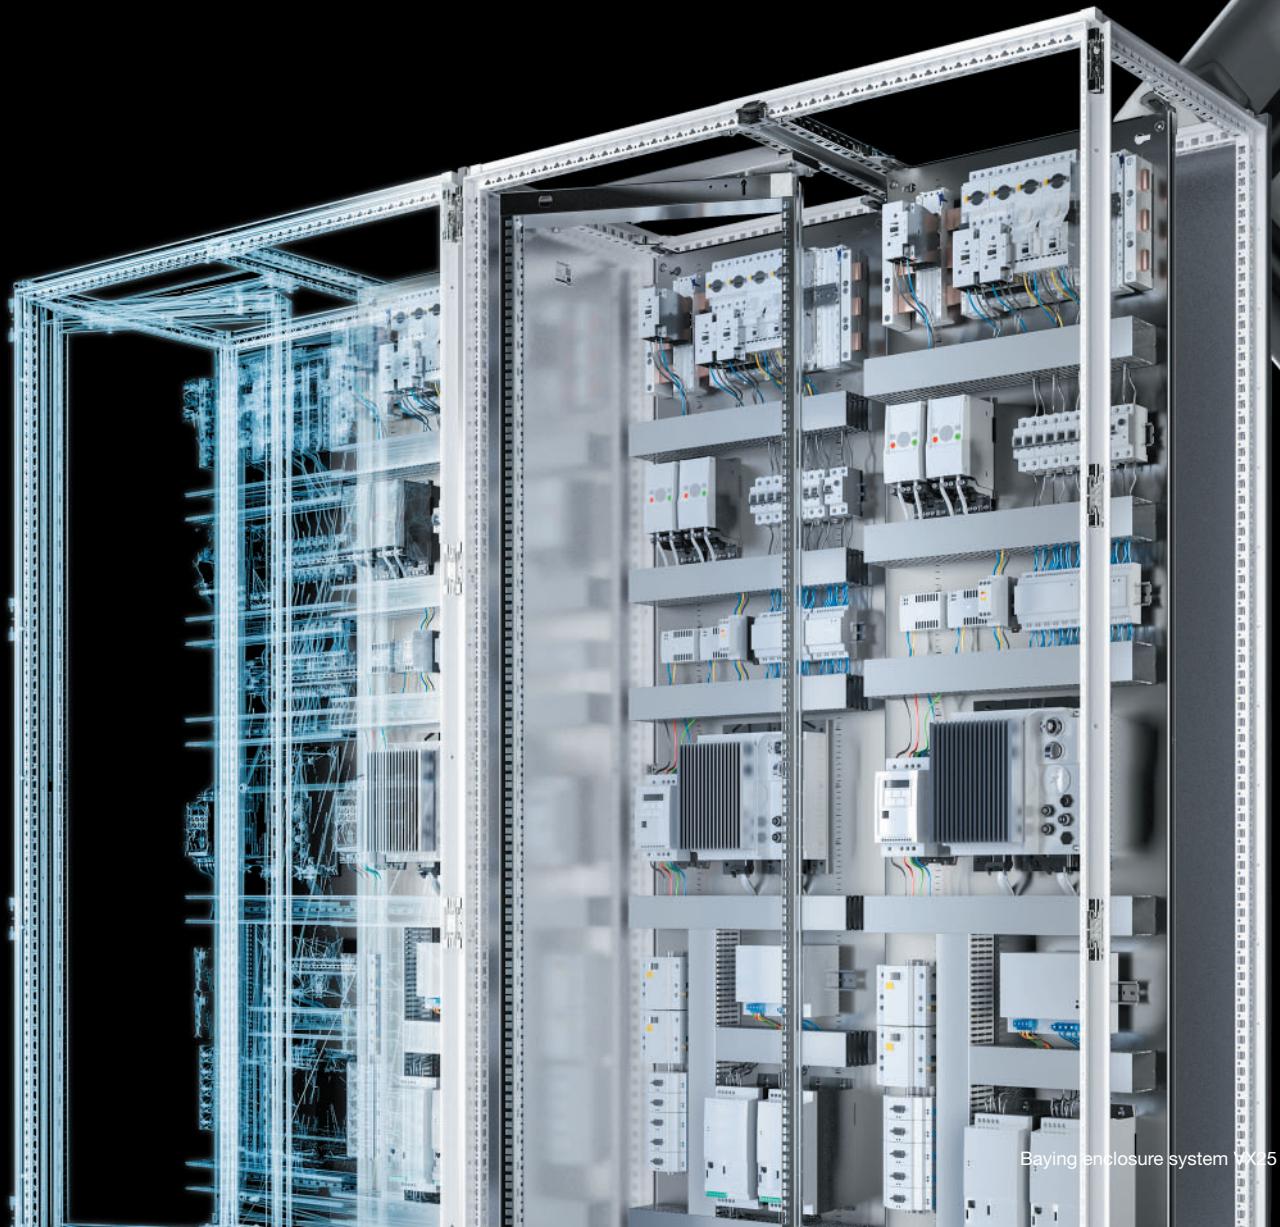

The frame section enables completely unhindered assembly, even from the outside, so that punched sections can be retro-fitted in areas that are no longer accessible from the inside.

SYSTEM ADVANTAGES – ADDED **SYSTEM BENEFITS**

Rittal standards deliver more overarching system advantages that are anything but standard.

02

Digitisation

The QR code on all machinable enclosure panels permits fully automated incorporation into the production workflow, for seamless digital monitoring from the incoming goods right through to the finished product.

01

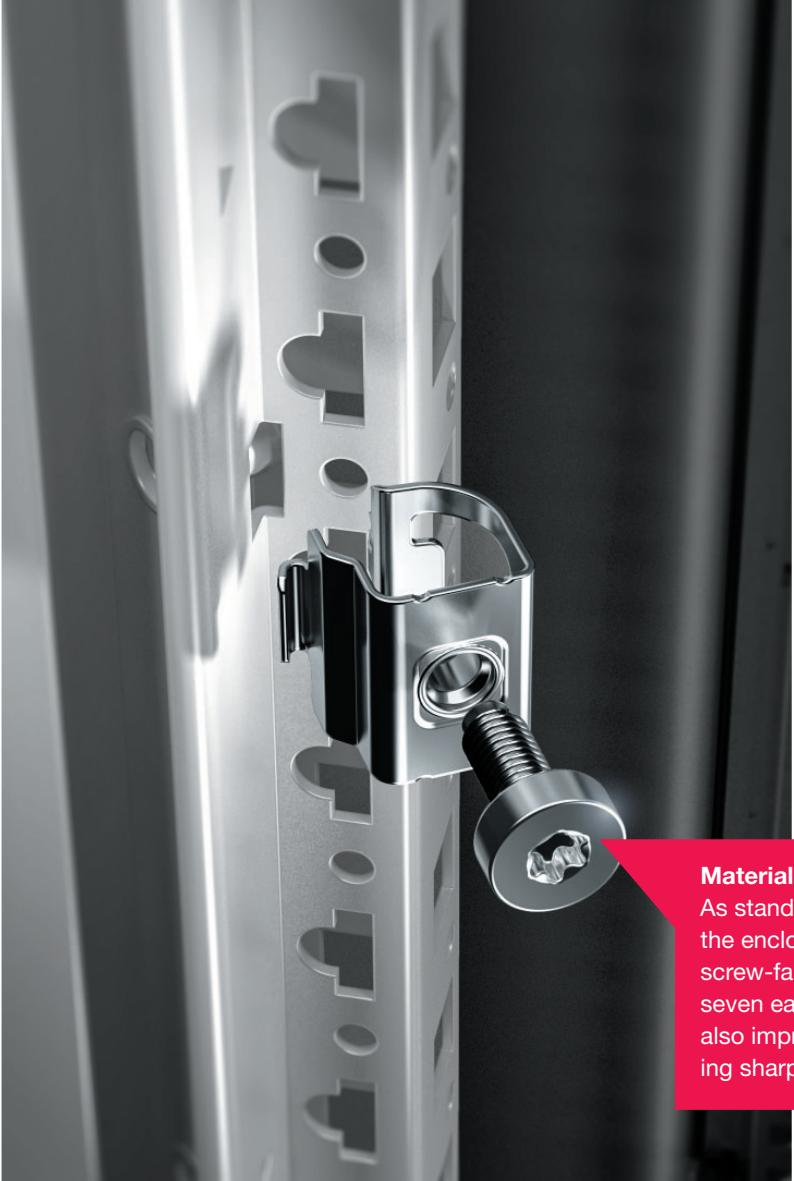

02

01

Time savings

Precise hole counting offers an easy point of orientation at all levels of the enclosure frame when fixing rails and punched sections in place.

02

Labour-saving

For one-man assembly, the positioning aid for the side and rear panels allows labour-saving pre-fixing for the ideal fit, which you can screw-fasten later on when you have both hands free.

Material savings

As standard, potential equalisation of the enclosure panels occurs during screw-fastening, which saves up to seven earth straps per enclosure and also improves work safety by eliminating sharp-edged protruding parts.

Corrosion protection

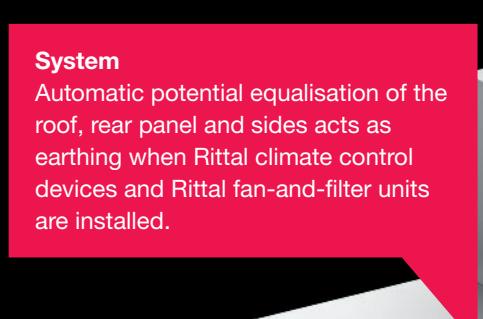

The three-stage surface treatment process guarantees maximum protection against corrosion and is resistant to mineral oils, lubricants, machining emulsions and most solvents.

- 1 Nanoceramic treatment
- 2 Electrophoretic dipcoat priming
- 3 Powder coating

Safety

The seamless, foamed-in PU seal offers long-term elasticity and can be painted over as required without posing any problems.

System

Automatic potential equalisation of the roof, rear panel and sides acts as earthing when Rittal climate control devices and Rittal fan-and-filter units are installed.

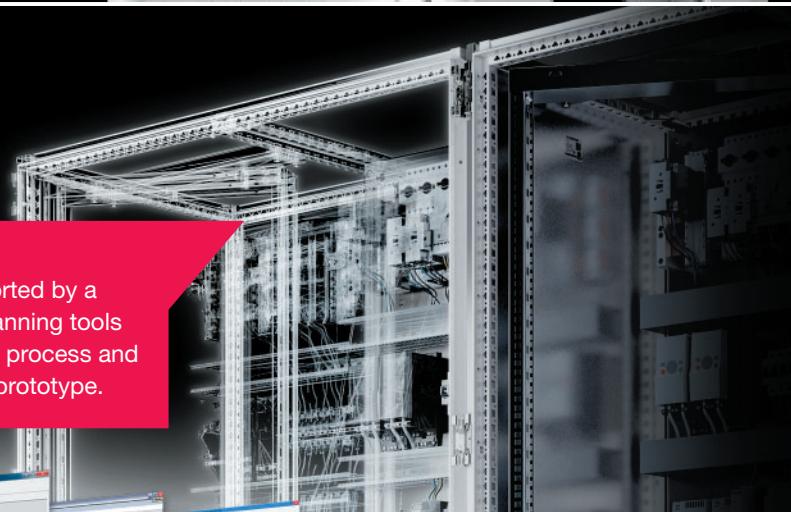

Health and safety at work

Rounded edges ensure optimum work safety standards when populating the enclosure.

Stability

The seamlessly laser-welded, roll-formed enclosure profile ensures optimum force transmission on installed equipment.

Reliable engineering

Rittal's customers are supported by a wealth of conversion and planning tools in the automated production process and when working with a virtual prototype.

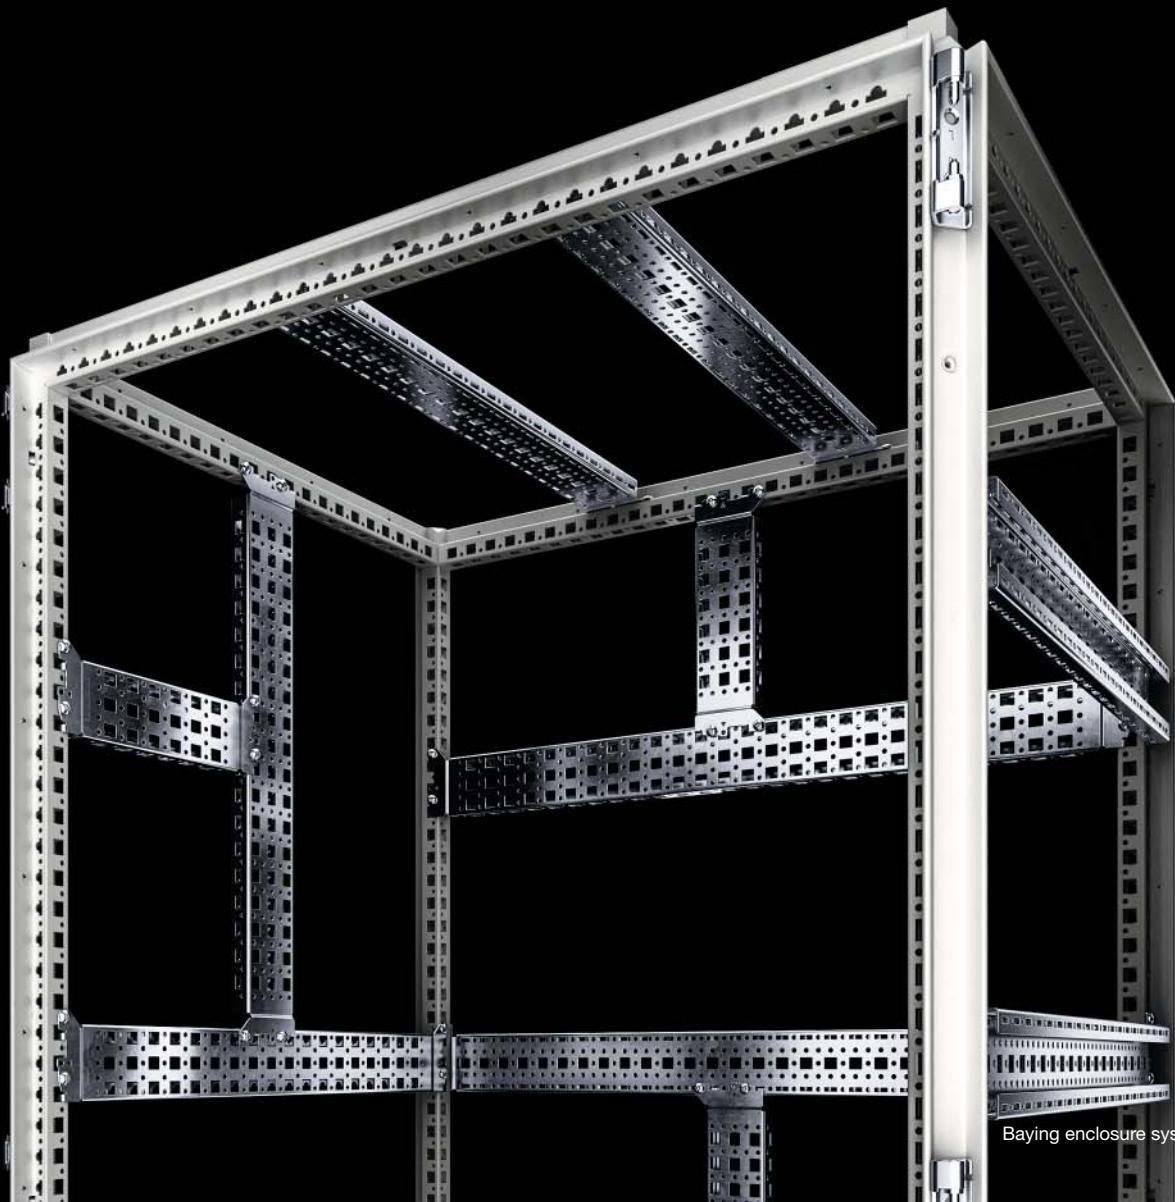

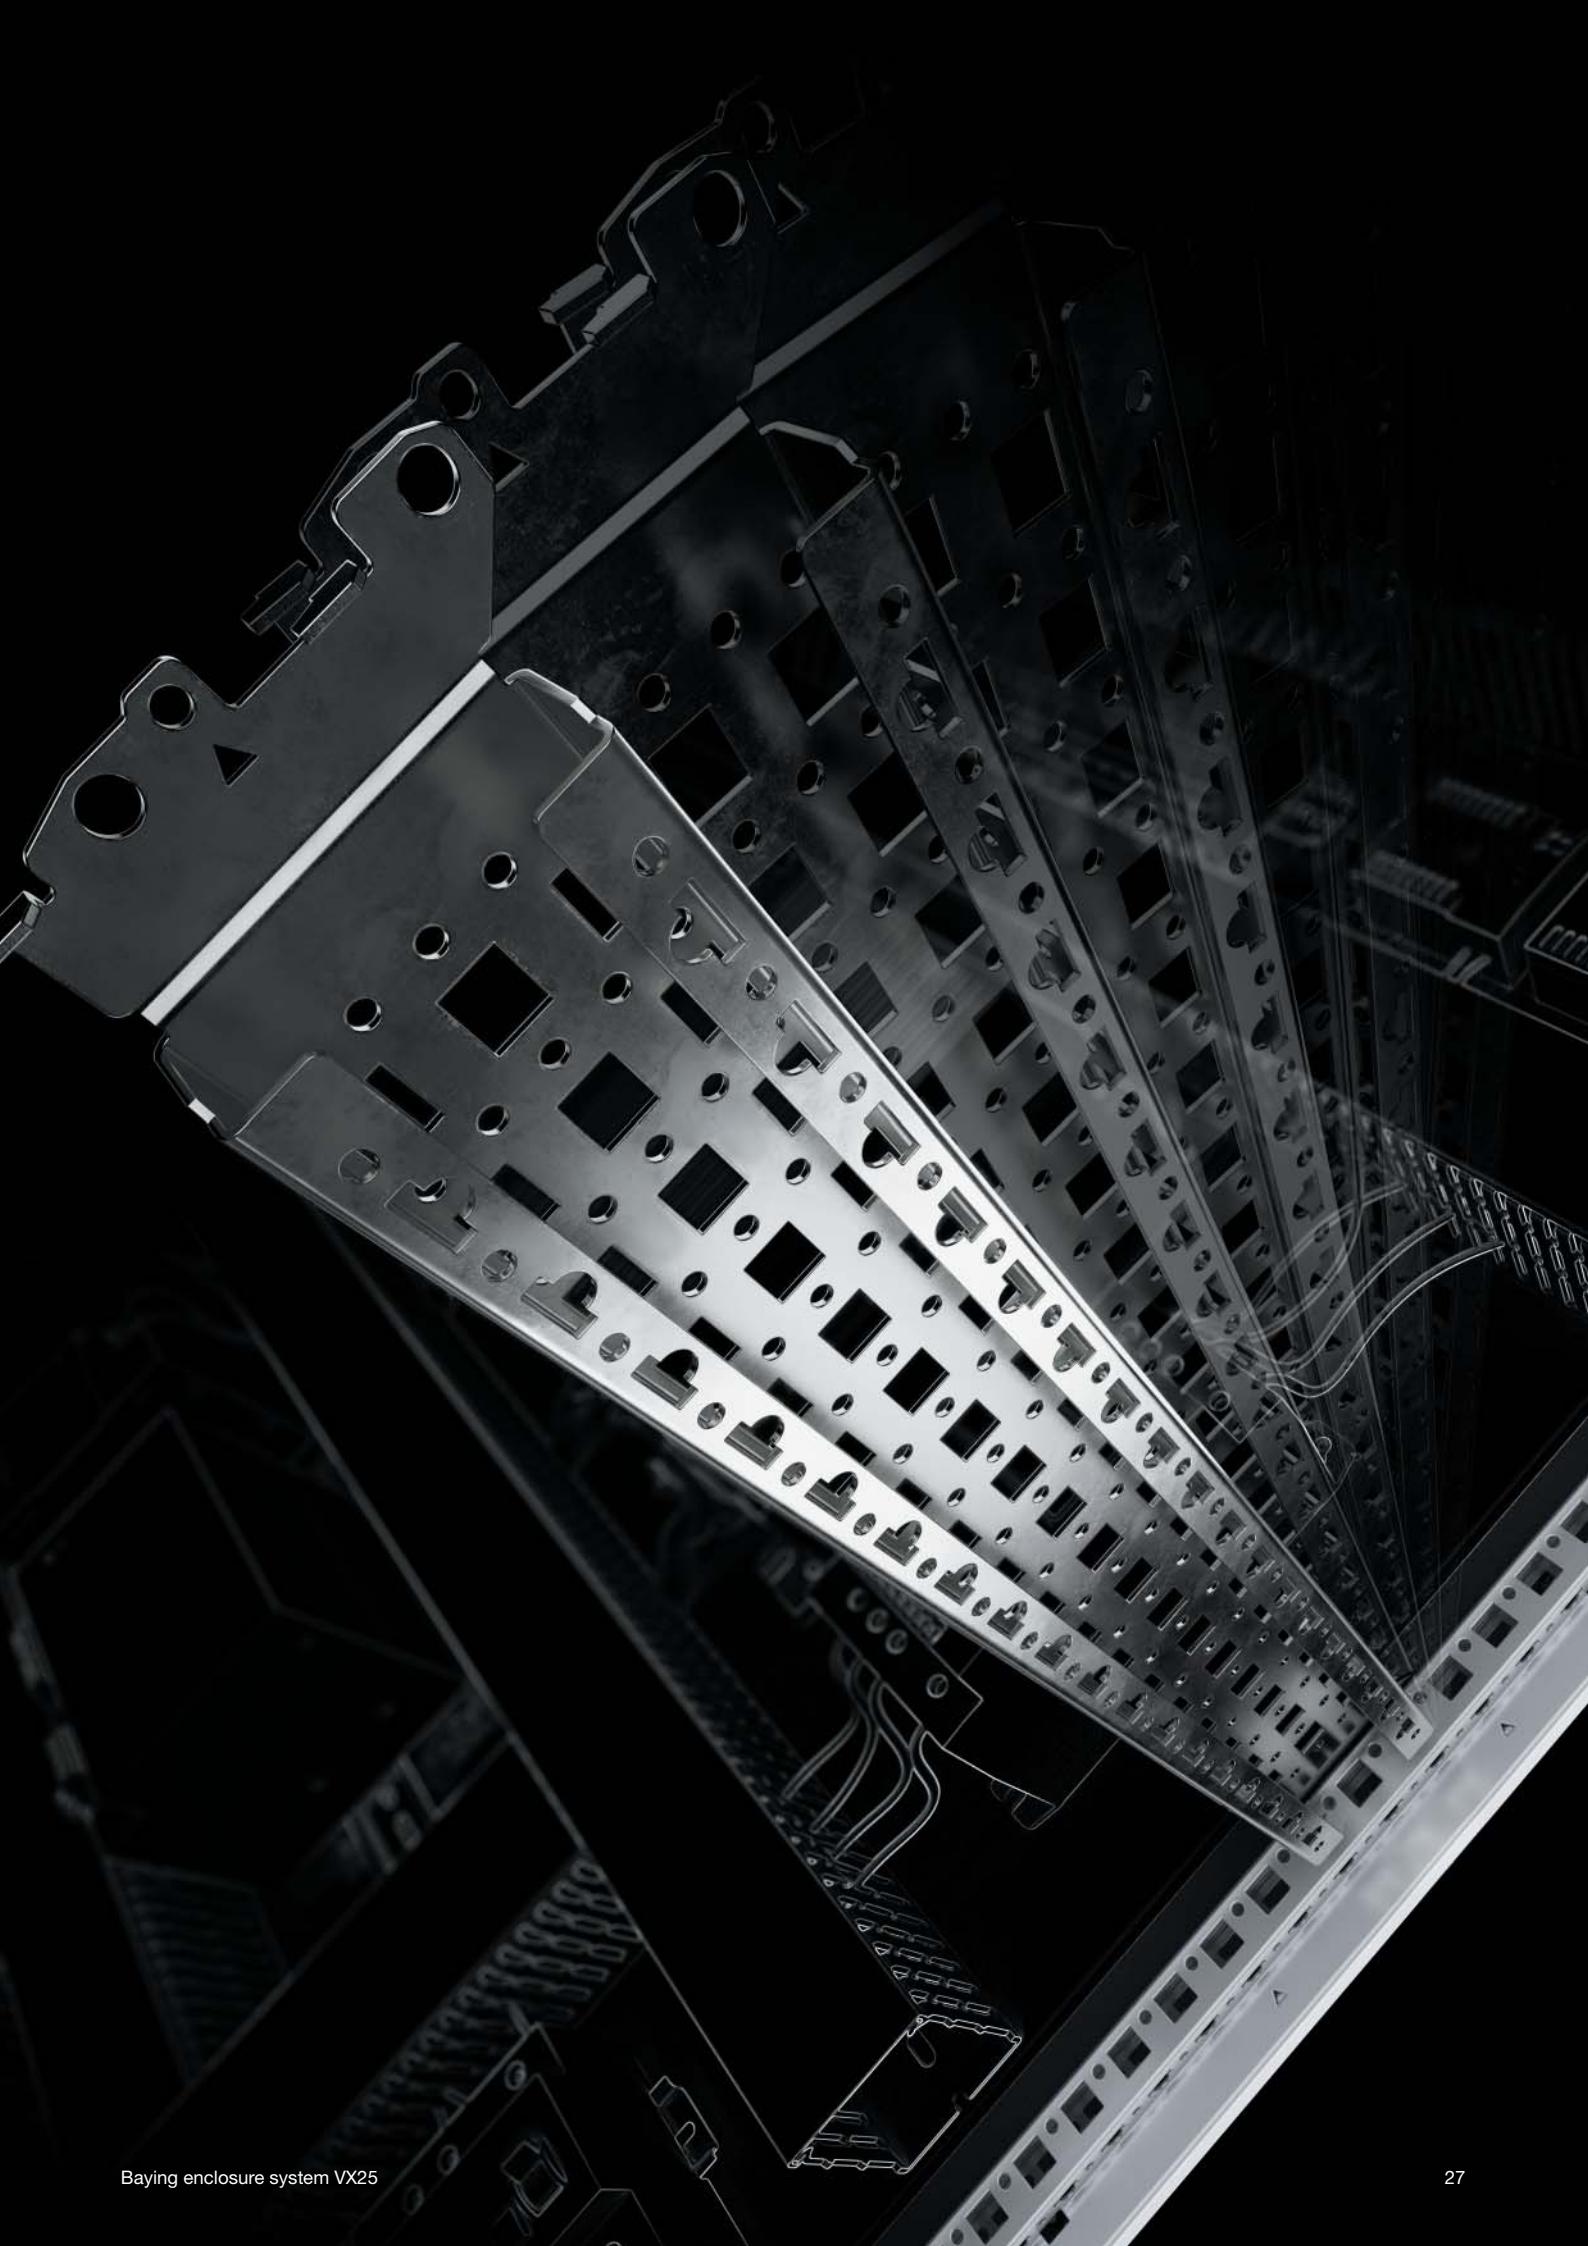

- Configurators
- Parts list converter
- EPLAN Pro Panel
- 2D/3D CAD data
- ecl@ss Advanced
- Technical documentation
- Planning data
- Assembly videos

FRAME AND PUNCHED SECTION – ADDED SYSTEM **BENEFITS**

Now with added assembly-friendliness plus efficient engineering thanks to a symmetrical frame section on a 25 mm pitch pattern across all levels, accessible from all sides.

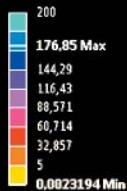

Accessibility

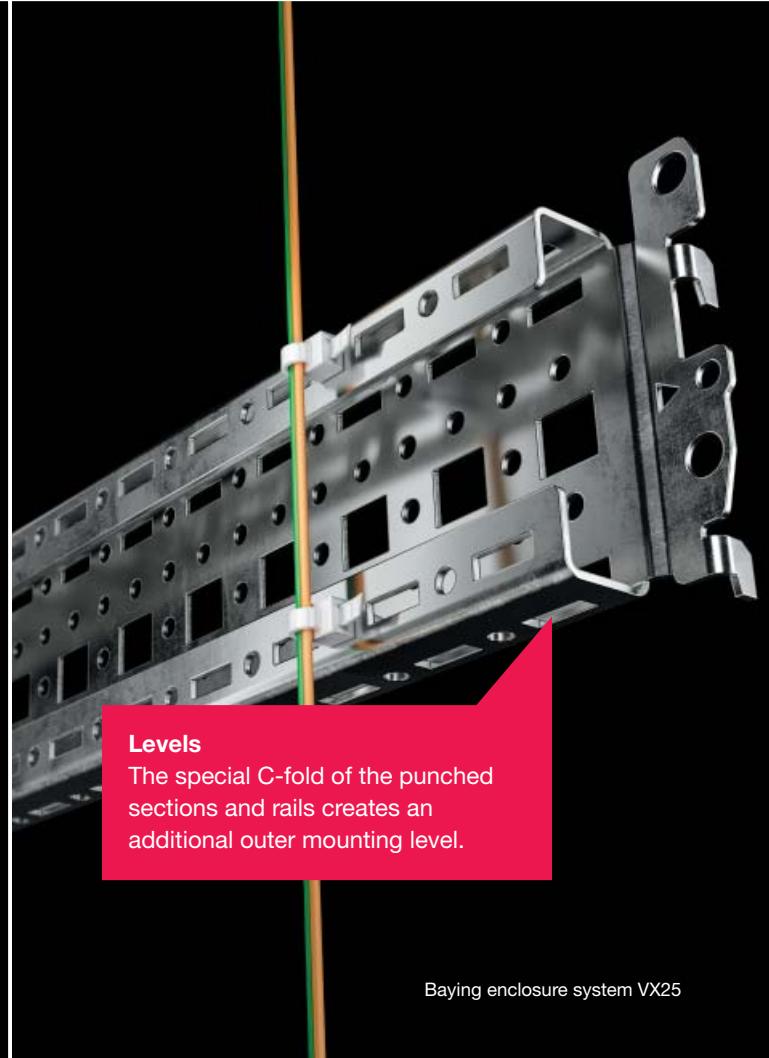

The system offers an outer mounting level in addition to the inner level, making the enclosure readily accessible and configurable from the outside.

A: Static Structural
Equivalent Stress
Type: Equivalent (von-Mises) Stress
Unit: MPa
Time: 1
07.03.2018 14:25

Stability

Thanks to its ingenious geometry, the patented special profile ensures excellent stability and torsional rigidity.

Levels

The special C-fold of the punched sections and rails creates an additional outer mounting level.

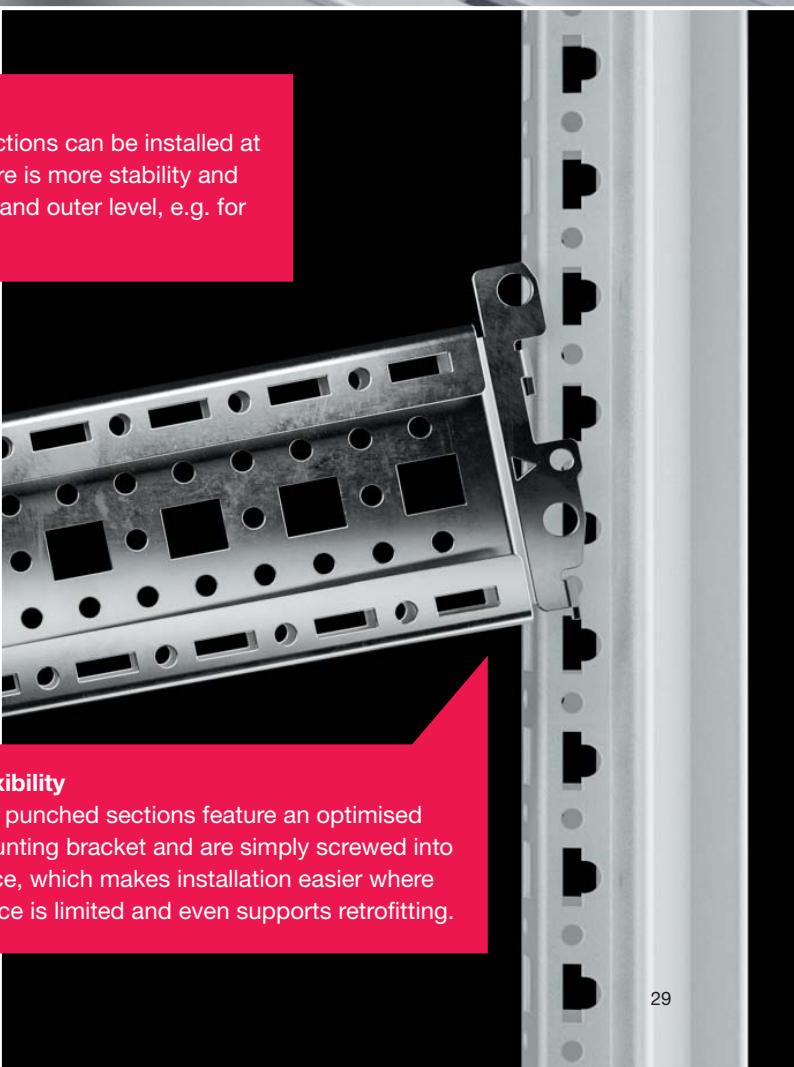

Installation options

The continuous pattern of square punching supports the use of M6/M8 cage nuts to create more mounting options at all profile levels.

Strength

As both punched sections can be installed at the same height, there is more stability and strength at the inner and outer level, e.g. for heavy assemblies.

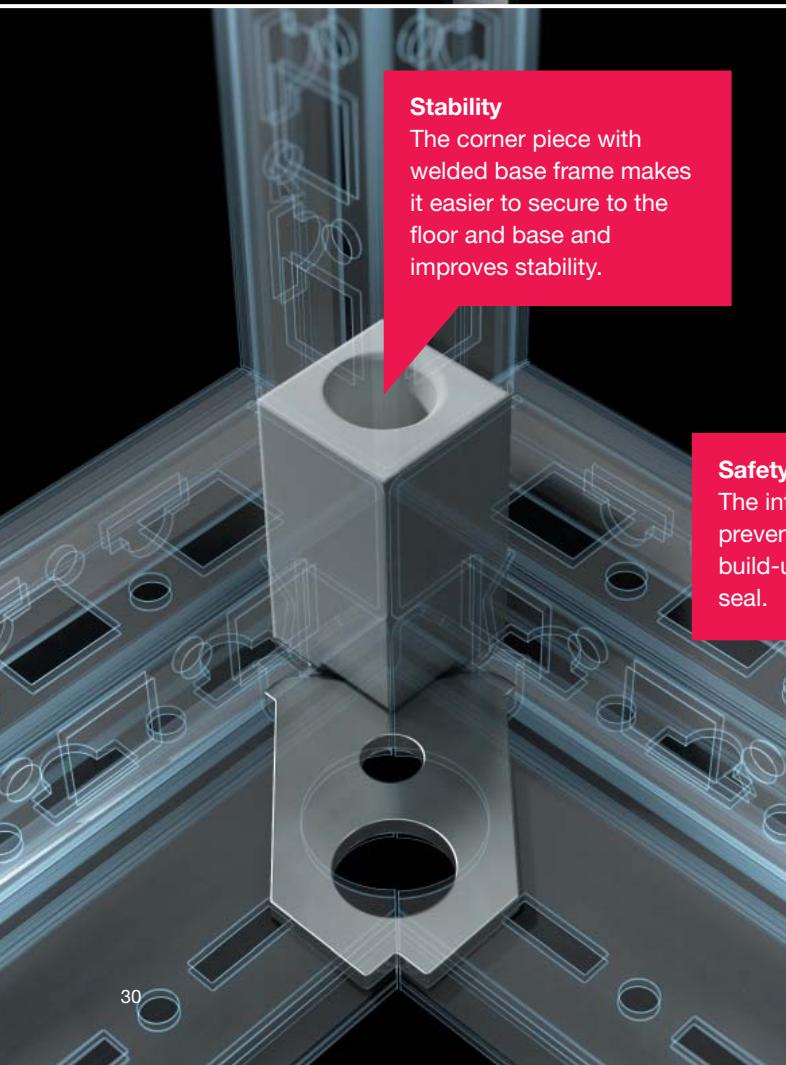

Flexibility

The punched sections feature an optimised mounting bracket and are simply screwed into place, which makes installation easier where space is limited and even supports retrofitting.

Ease of assembly

The frame profile allows users to install elements working through the profile from the outside, making it much easier to retrofit punched sections in places that can no longer be reached from the inside.

Stability

The corner piece with welded base frame makes it easier to secure to the floor and base and improves stability.

Safety

The integral rain channel prevents the long-term build-up of moisture at the seal.

Mounting options

Using the standard punched section, including to support the roof and side panels, simplifies engineering and assembly, and relieves pressure on the parts warehouse.

Cost-efficiency

The frame profile, which is identical horizontally and vertically, enables consistent use of standardised punched sections and rails, which reduces the number of part variants by up to 40 per cent without losing any functionality.

Mounting plates

The system divider designed for installation in the enclosure depth divides wide enclosures into two halves, increasing the flexibility of interior installation.

DOORS AND WALLS – ADDED **TIME SAVINGS**

More flexible, assembly-friendly and economical, thanks to an ingenious hinge system, a quick-fit and readily replaceable lock system, and the elimination of avoidable machining processes.

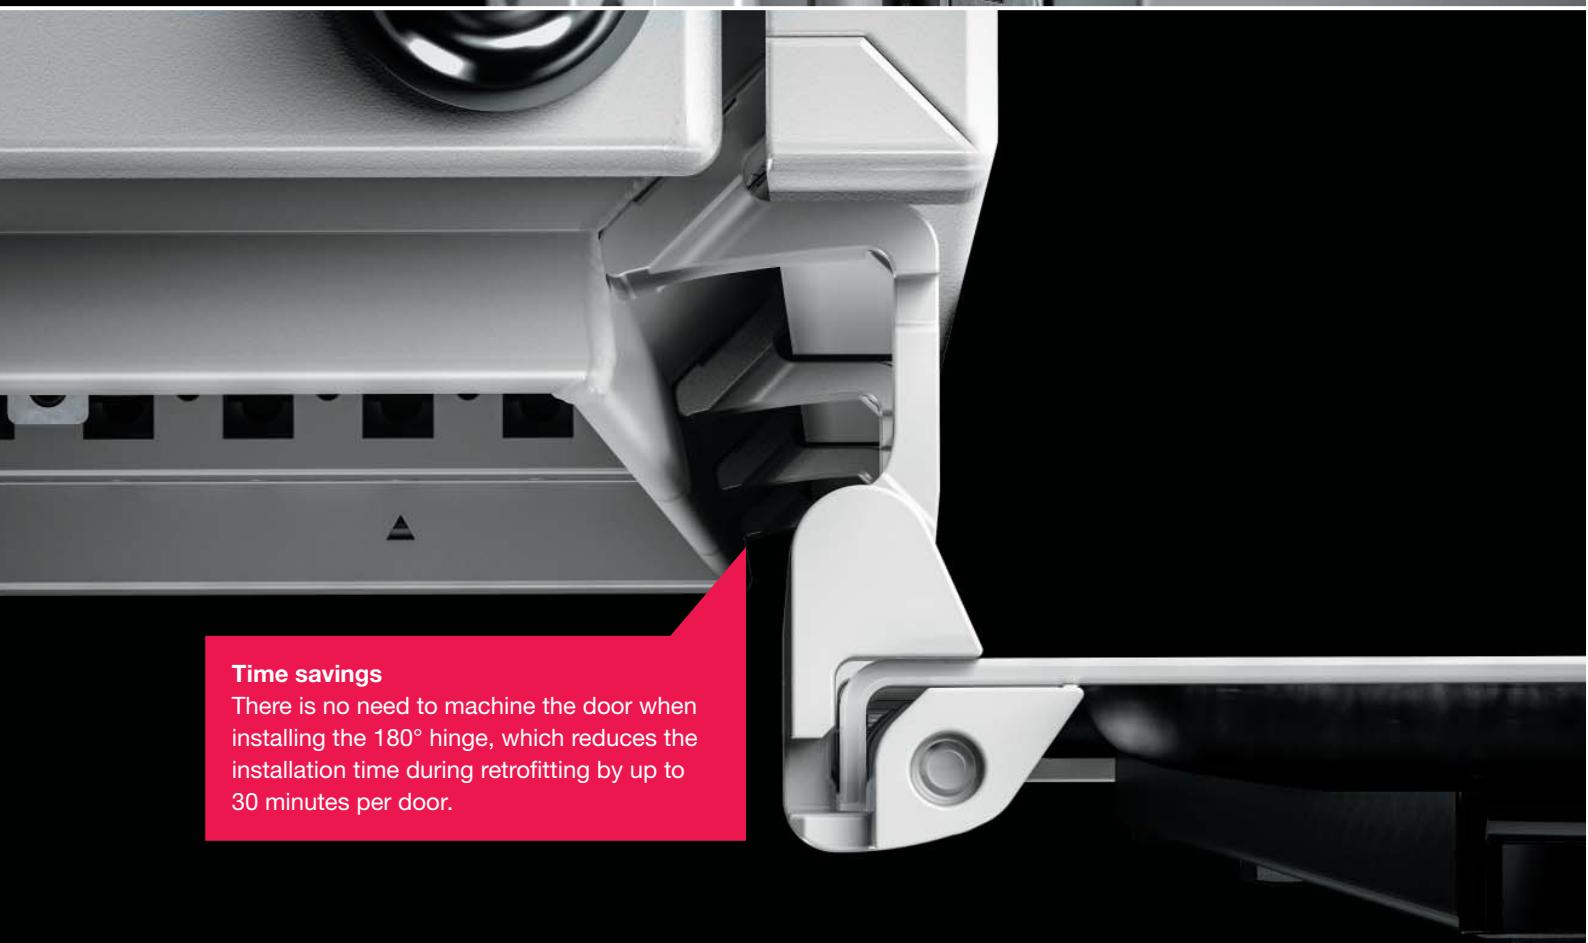

Labour-saving

The new hinge allows doors to be fitted and removed incredibly easily without any tools, and separately locking and unlocking the hinge bolts is a thing of the past.

Time savings

There is no need to machine the door when installing the 180° hinge, which reduces the installation time during retrofitting by up to 30 minutes per door.

Time savings

The simple, tool-free exchangeability of lock systems , such as the comfort handle reduces the necessary installation time by up to 50 per cent.

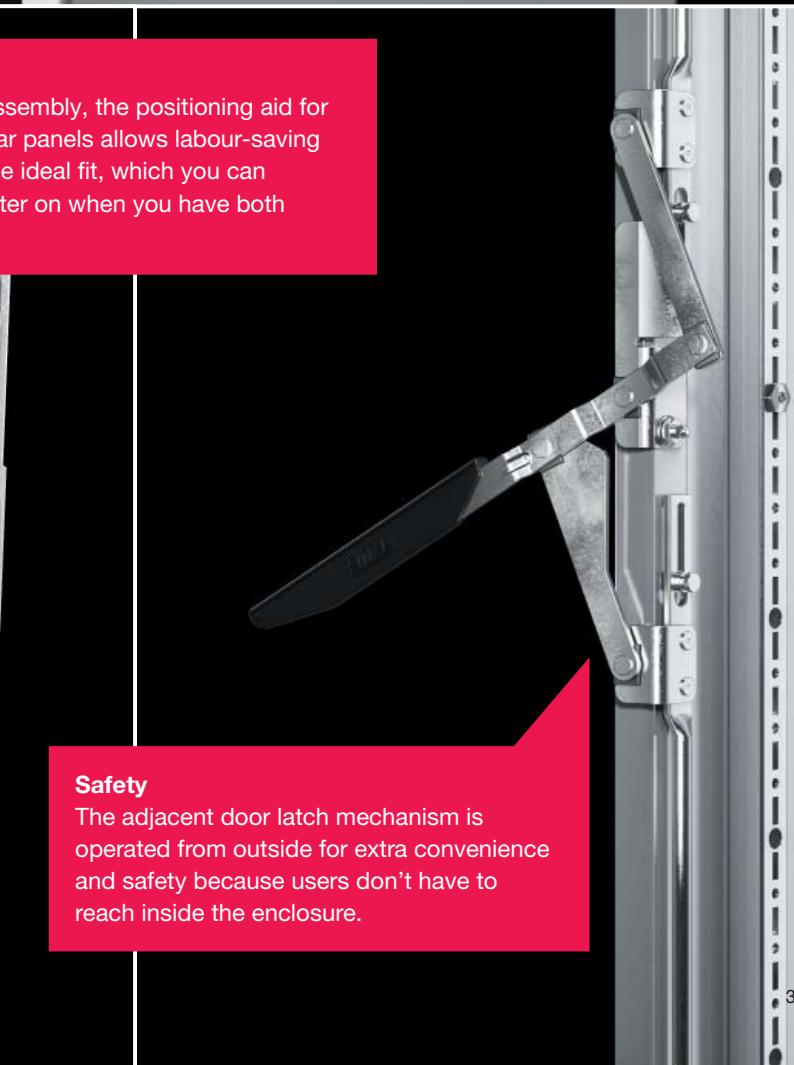

Labour-saving

For one-man assembly, the positioning aid for the side and rear panels allows labour-saving pre-fixing for the ideal fit, which you can screw-fasten later on when you have both hands free.

Safety

The adjacent door latch mechanism is operated from outside for extra convenience and safety because users don't have to reach inside the enclosure.

Easy assembly

The innovative clip mechanism of the panel holders speeds up the installation of side panels.

Access

The panel holders can also be easily retrofitted and are clipped into place from the outside without having to first remove previously installed rear panels.

Expansion options

Thanks to its ingenious geometry, the special profile ensures excellent stability, torsional rigidity and flexibility for door installations.

Processability

The QR code on all machinable enclosure panels permits fully automated incorporation into the production workflow, for seamless digital monitoring from the incoming goods right through to the finished product.

Flexibility

The opportunity to change the opening direction of main and adjacent doors on double-door enclosures according to needs, creates added flexibility when installing cooling units in enclosure doors and prevents collisions between equipment and doors.

Accelerator

The series-standard T-head punching in the tubular door frame speeds up the process of laying cables in the door. Cables can be fixed to the door extremely quickly, even when using conventional commercial cable ties.

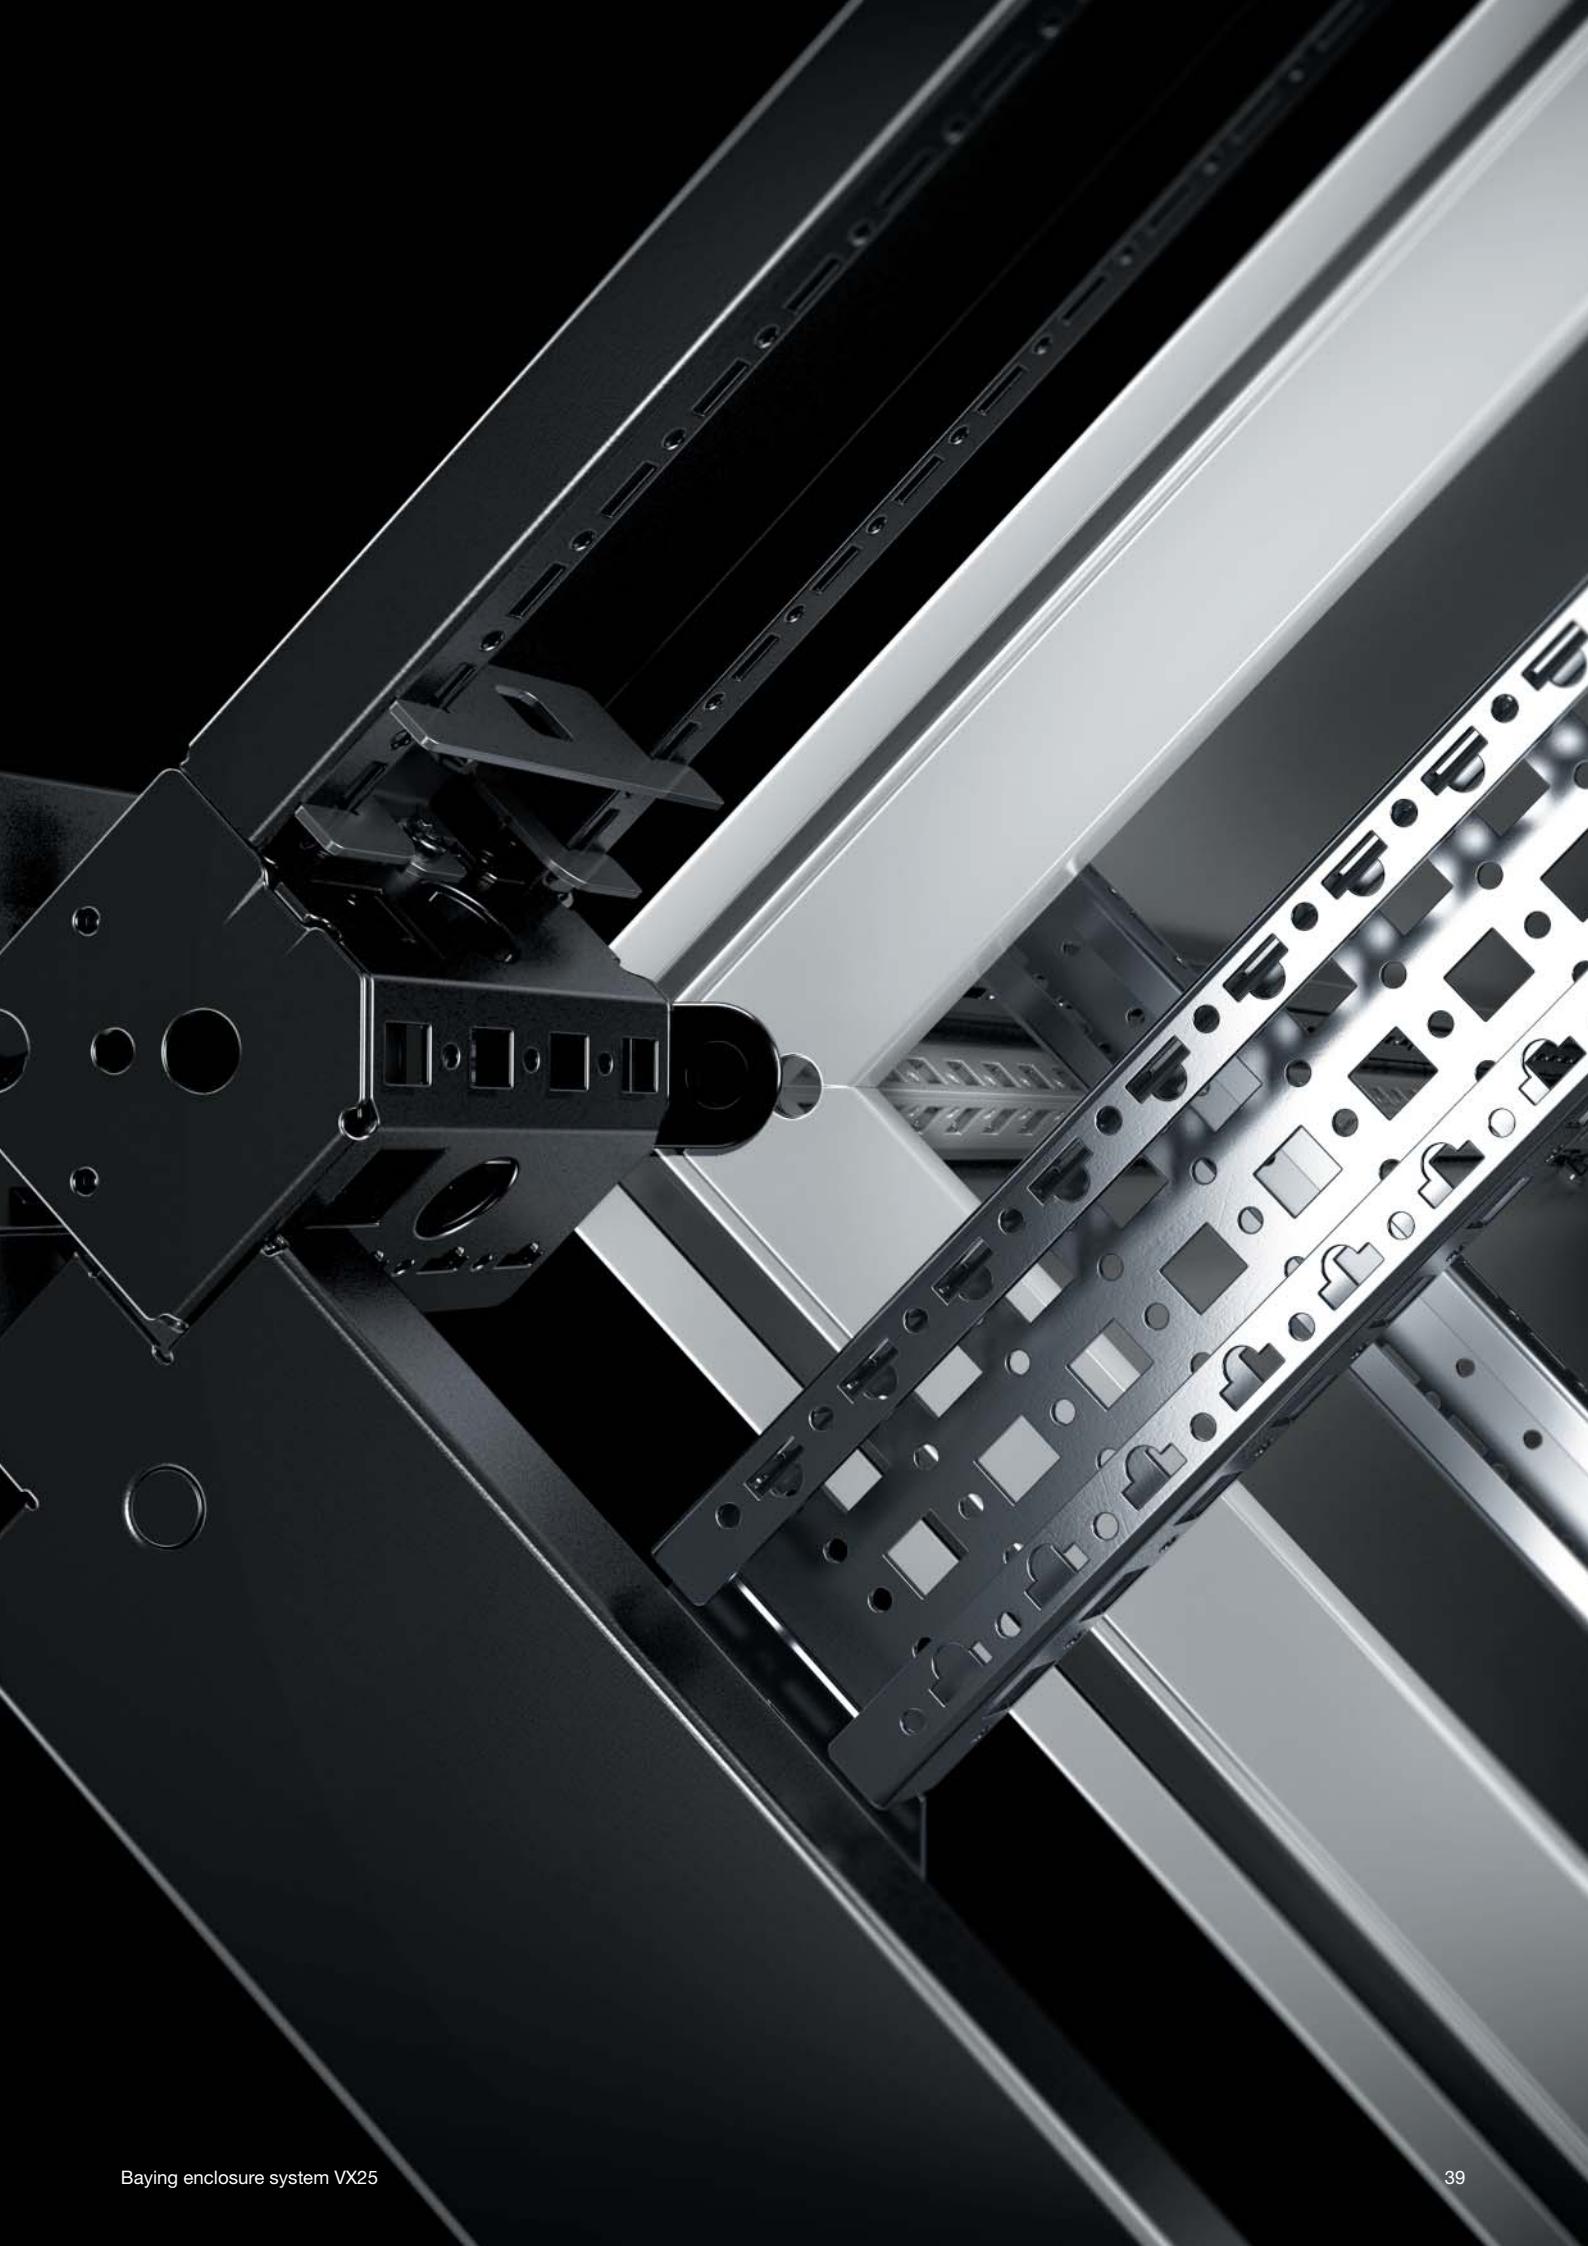

Usable height
The flat centre seal does not obstruct the movement of the swing frame or other components.

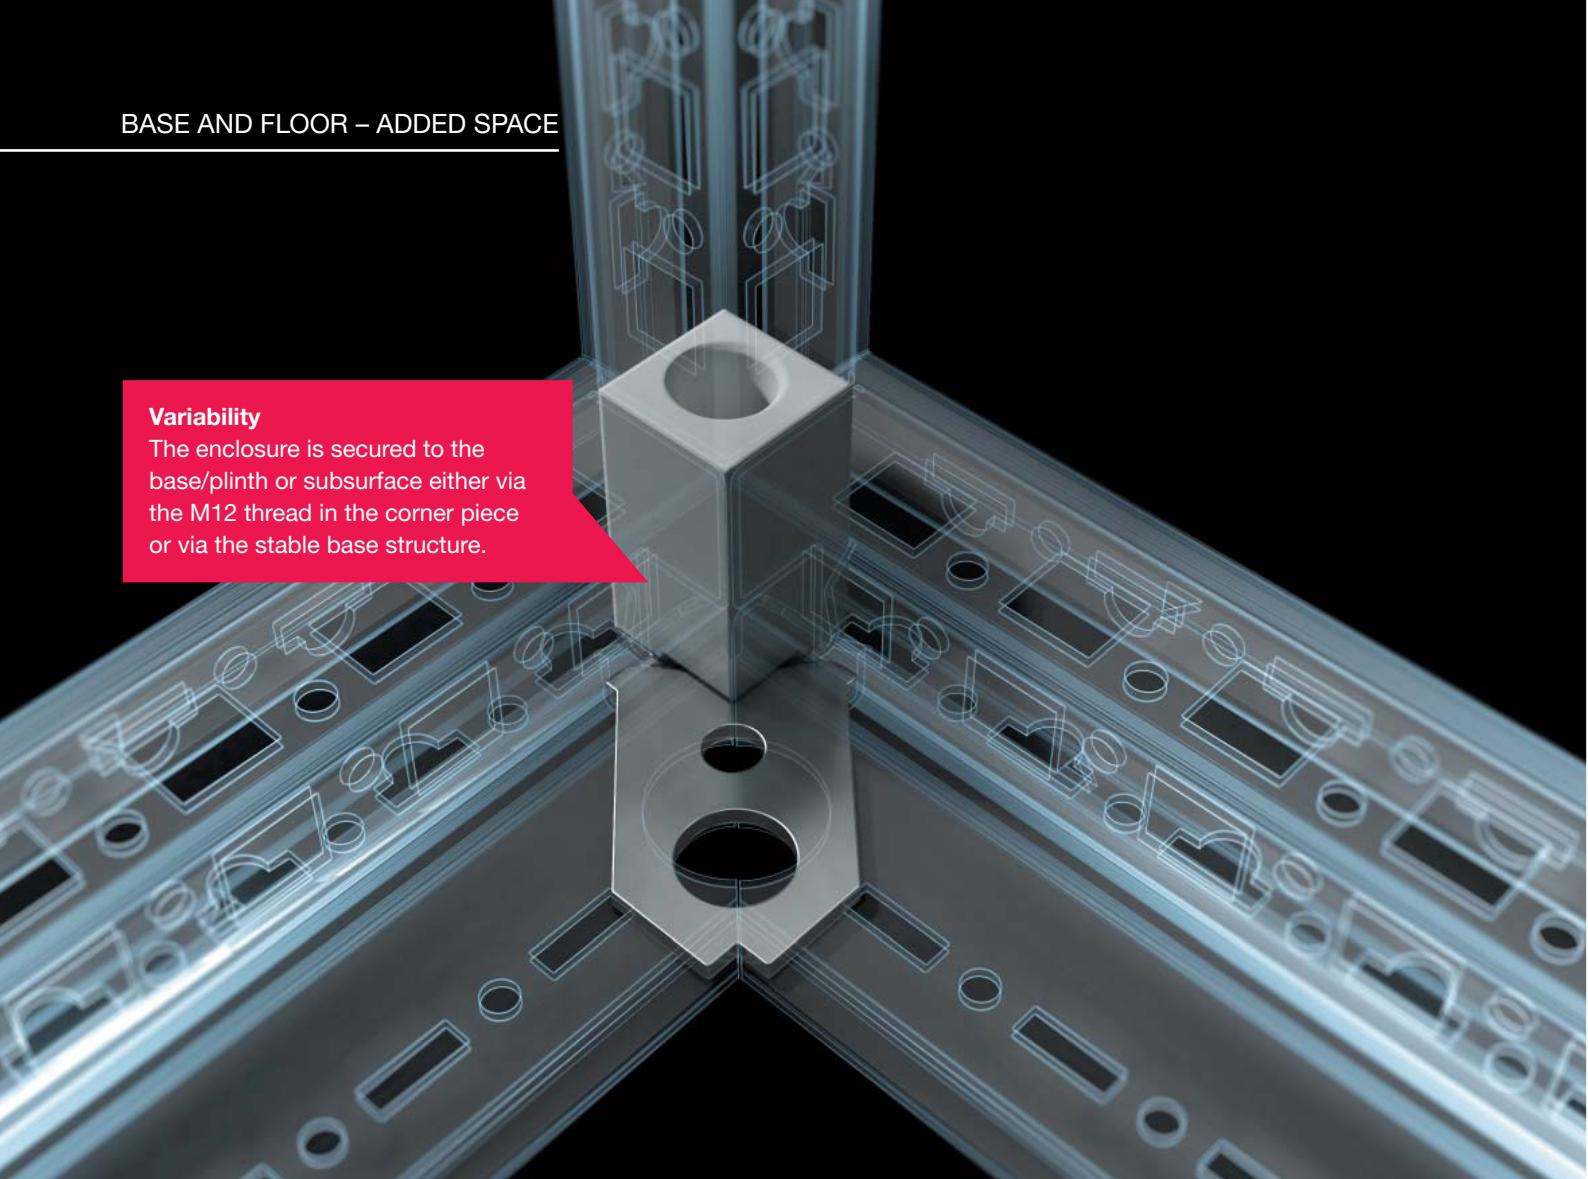

BASE AND FLOOR – **ADDED** SPACE

Make better use of space, simplify work and save time thanks to the outstanding compatibility of the enclosure and base – even when baying enclosures and fitting accessories.

Variability

The enclosure is secured to the base/plinth or subsurface either via the M12 thread in the corner piece or via the stable base structure.

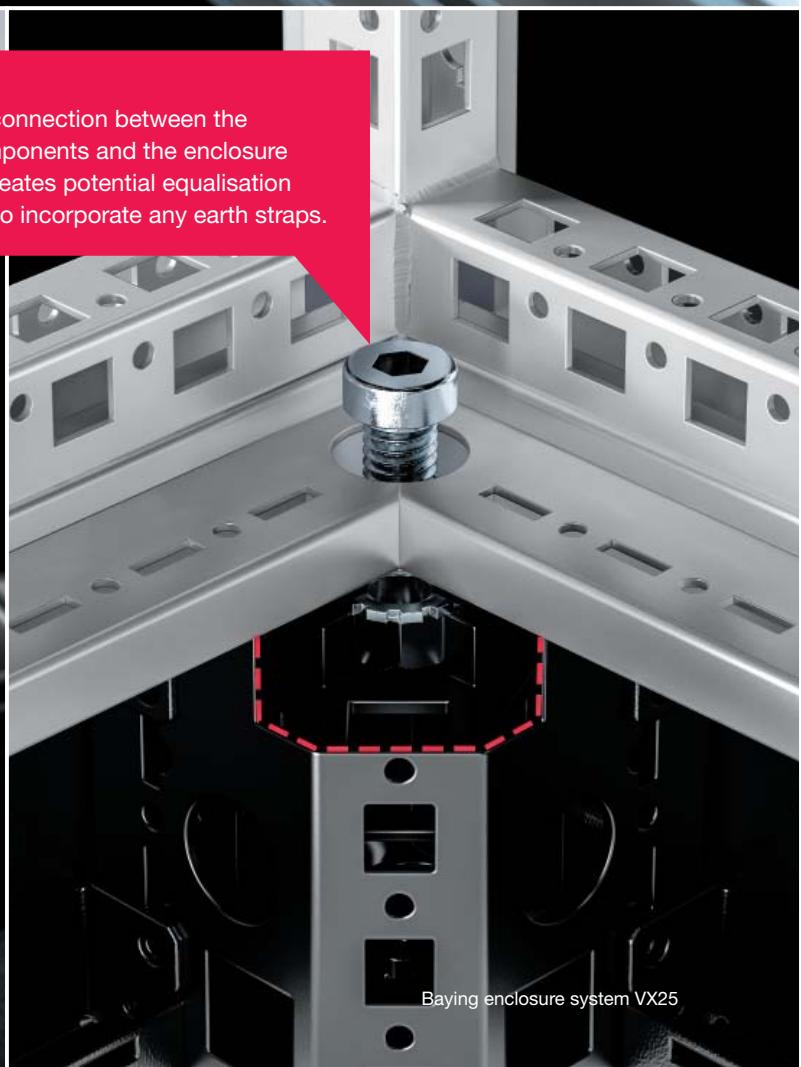

Ease of use

A direct screw connection between the base/plinth components and the enclosure automatically creates potential equalisation without having to incorporate any earth straps.

Precision

The centring aid for base/plinth mounting on the enclosure frame ensures the enclosure is positioned precisely on the base/plinth and also safeguards the IP protection category and frame protection when used without a base/plinth.

Time savings

Simple screw fastening of the gland plates is fast, and automatically creates potential equalisation in a single step.

Transparency

The identifying dimensions stamped into the gland plates make it easier to allocate gland plates the matching enclosure.

Space for cables

The large opening in the stable base frame makes it much easier to install cables.

Labour-saving

The earthing points with standardised markings provide helpful assists, enabling quicker work flow.

Cable-friendly

Rounded edges prevent cables routed under the enclosure from being damaged.

Rigidity

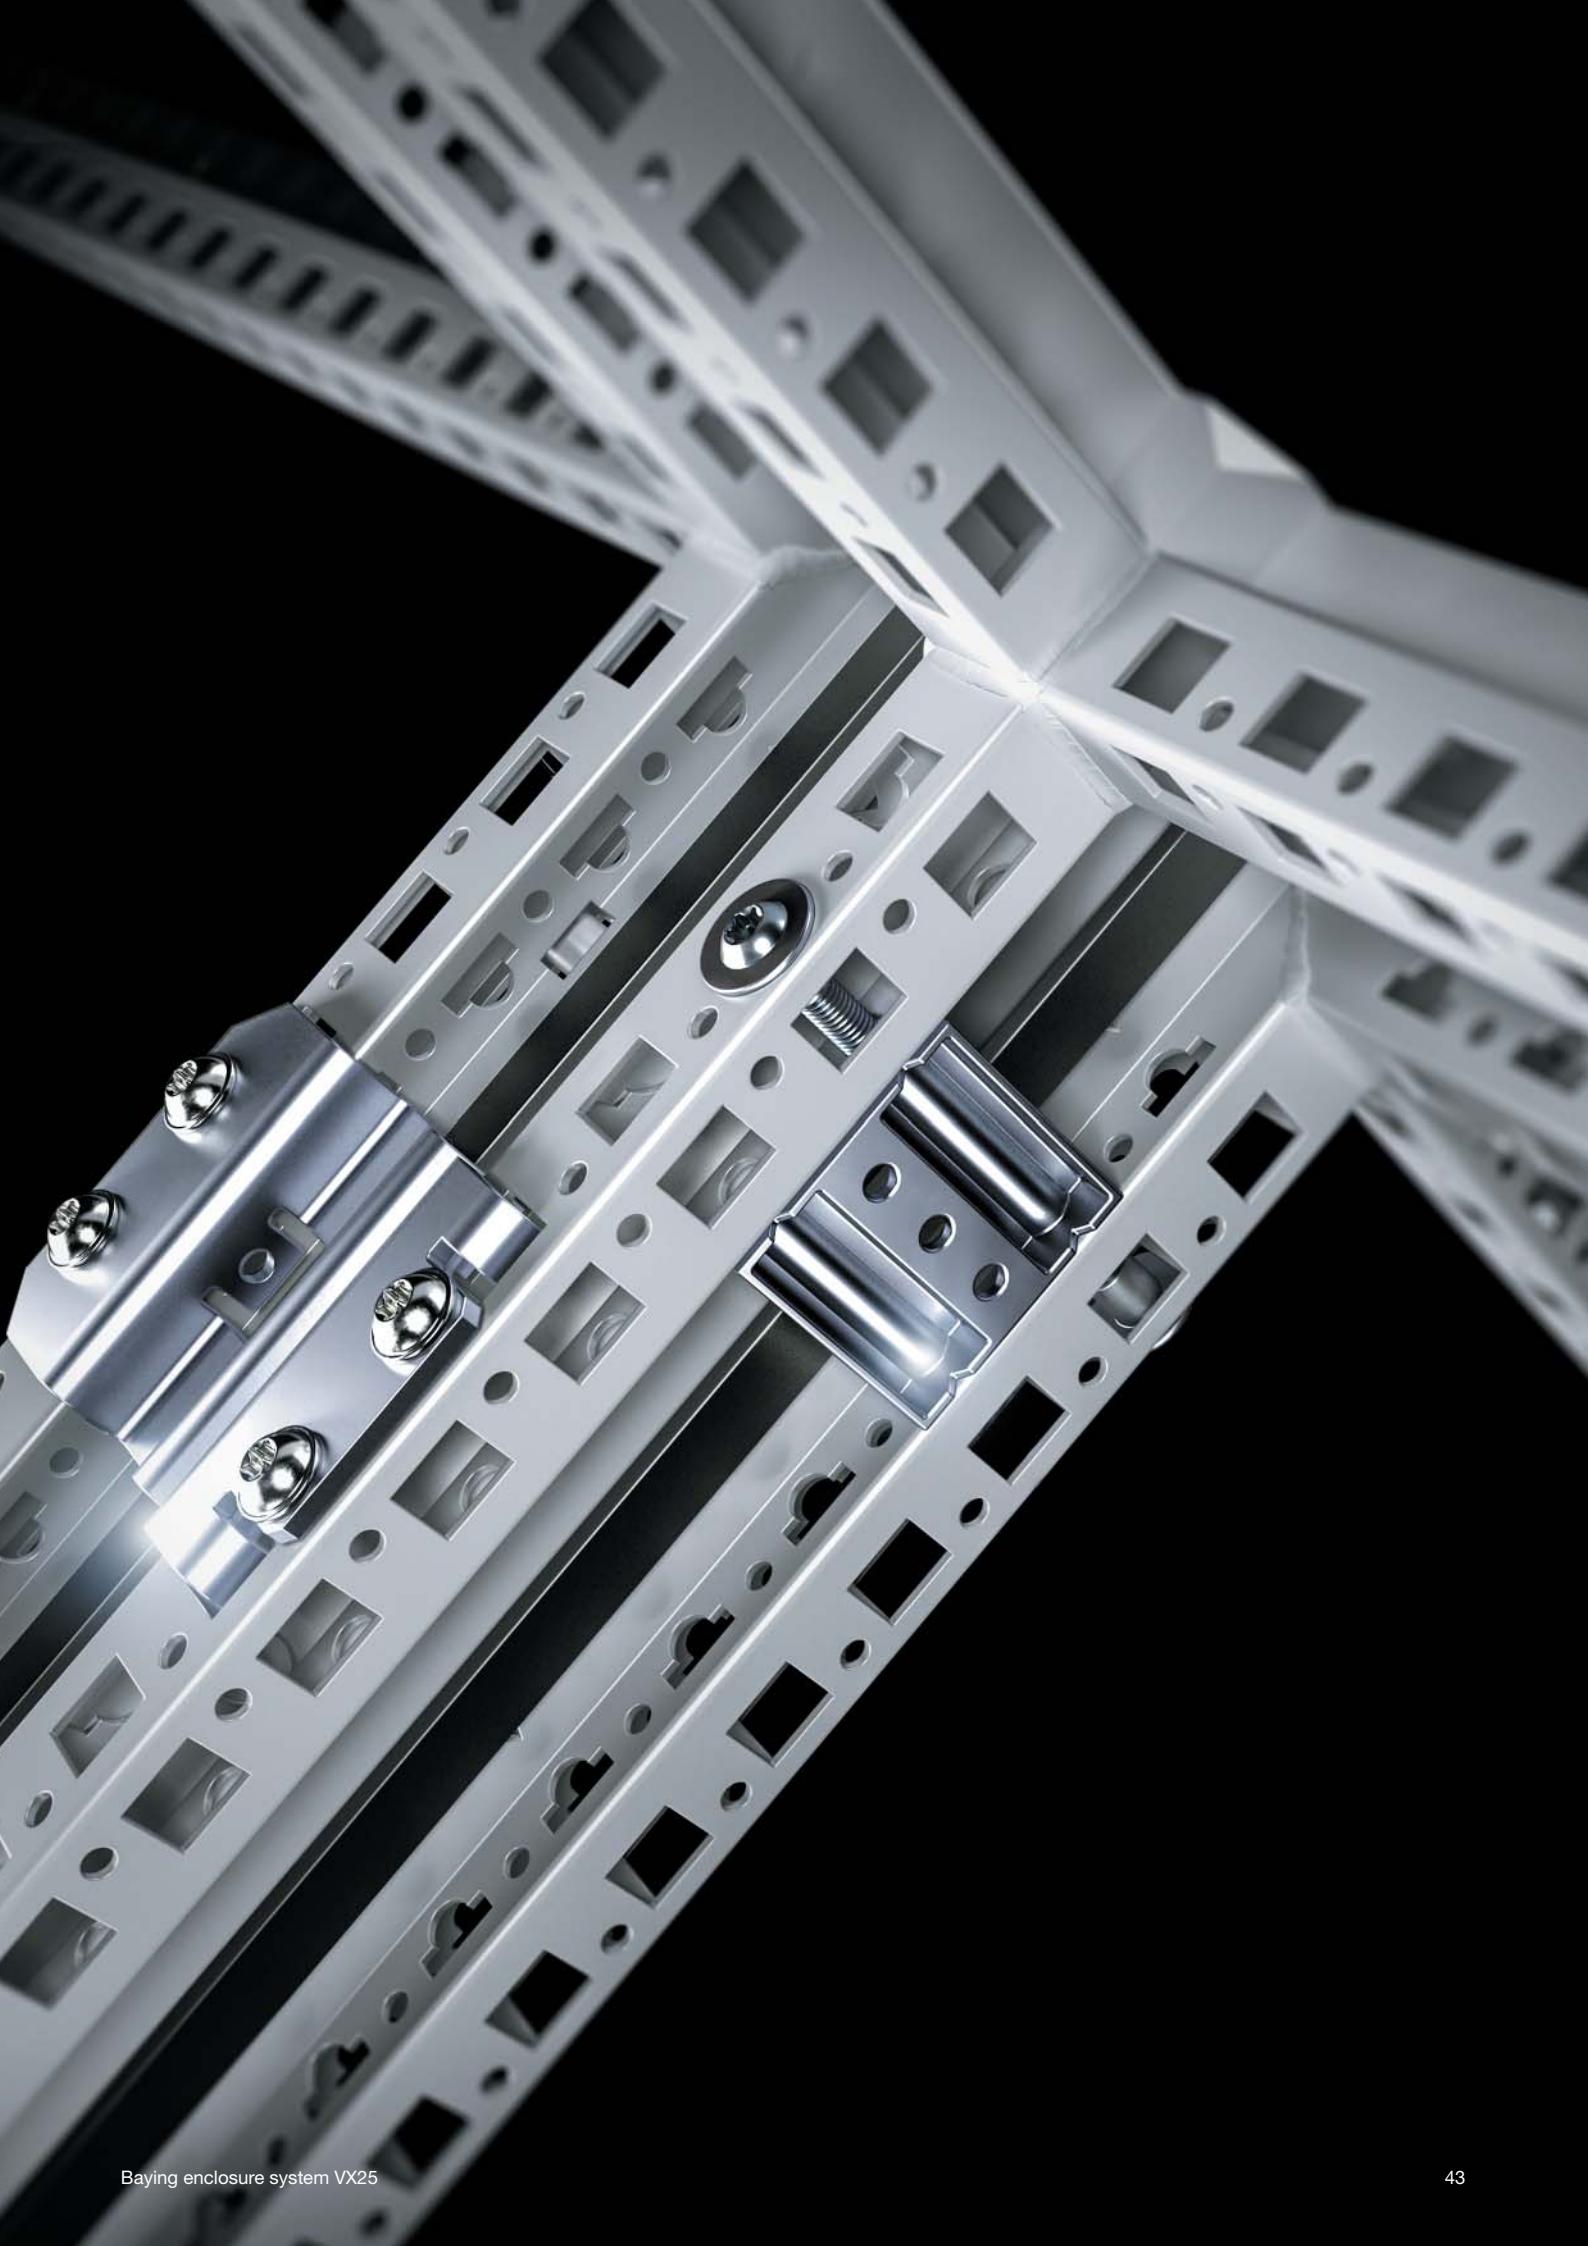

The double edge fold on the gland plates prevents bending even under heavy loads and guarantees the required high degree of protection.

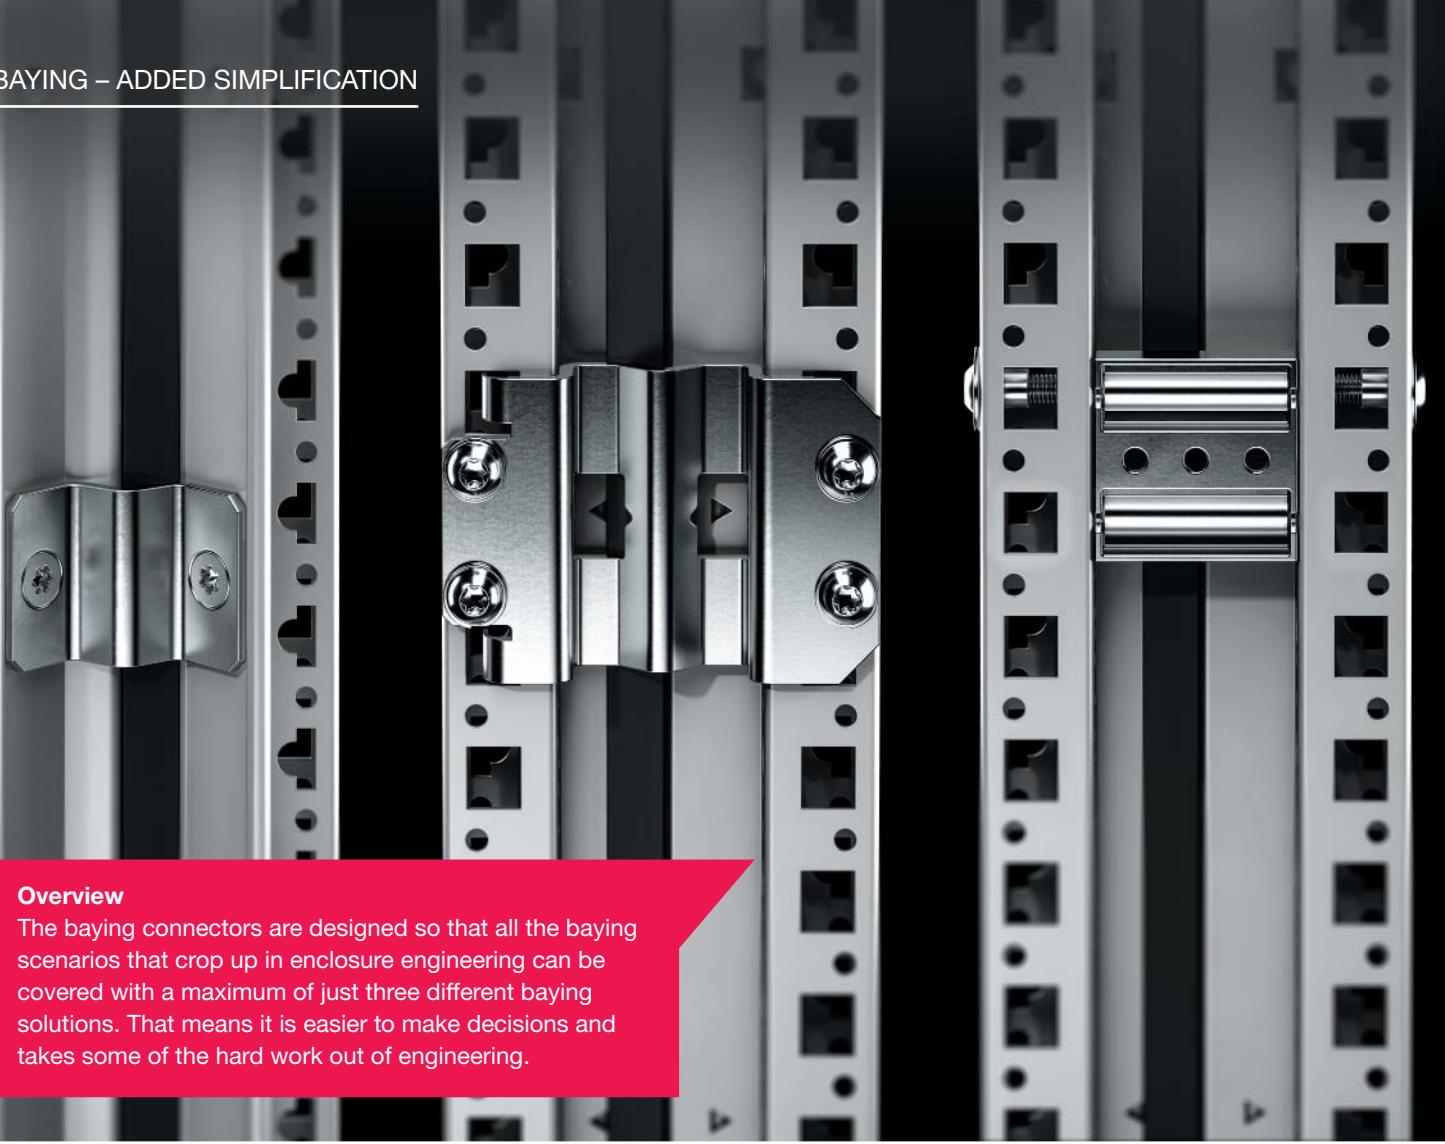

BAYING – ADDED **SIMPLIFICATION**

Complexity is further reduced thanks to a simplified, more consistent baying system for all applications.

Overview

The baying connectors are designed so that all the baying scenarios that crop up in enclosure engineering can be covered with a maximum of just three different baying solutions. That means it is easier to make decisions and takes some of the hard work out of engineering.

Location flexibility

The option of baying from all four sides allows an individual response to every space situation.

Sealing efficiency

The seal, which can be inserted in a flash, allows precise positioning and can be removed at any time.

Compatibility

Thanks to baying compatibility with the TS 8 system, existing enclosure bays can be easily extended.

Clamping force

The baying connectors are screwed into place in the direction of baying to bring the enclosures safely into position.

MOUNTING PLATE – ADDED **ASSEMBLY-FRIENDLINESS**

More time gains, installation options and assembly-friendliness thanks to improved installation kits – also suitable for dynamic loads.

MOUNTING PLATE - ADDED ASSEMBLY-FRIENDLINESS

Additional benefits

The practical mounting plate slide rail can be removed once the mounting plate has been inserted and used elsewhere in the enclosure as a fully functional punched section.

Digitisation

The QR code on all machinable enclosure panels permits fully automated incorporation into the production workflow, for seamless digital monitoring from the incoming goods right through to the finished product.

Process efficiency

The integral clip means that the mounting plate slide block can be dismantled with no need for tools and easily refitted. This helps to streamline the fully automated machining process in every respect.

Space gain

The option of fitting the mounting plate 20 mm deeper in the enclosure with a special installation kit creates additional space in the enclosure depth.

Ease of placement

The printed scale ensures components can be easily and quickly positioned on the mounting plate – without having to carry out separate measurements.

Flexibility

Thanks to the potential for depth adjustment in the 25 mm pitch pattern, the mounting plate can be installed at the optimum position for the application.

Convenient fixing

The clip at the top of the mounting plate holds it in place during one-person assembly until the plate can be screwed into position.

Interior installation

Rail systems

Punched section with mounting flange, 23 x 89 mm

For variable, individual interior installation of the enclosure frame on the inner mounting level. Simply locate into punchings and screw-fasten. System punchings on all four sides. With slots at the top and bottom for cable routing, for fast and yet secure components via metric screws. Especially for cable routing in the base/plinth system VX, stainless steel and for the installation of busbar supports (non-magnetic stainless steel).

Installation options:

- On the inner mounting level, on the enclosure section
- On identical punched sections with mounting flanges
- Base/plinth system VX, stainless steel, in the width and depth, combined with a base/plinth installation bracket

Material:

- Stainless steel

Supply includes:

³⁾ Without door ⁴⁾ Sheet steel with magnesium zinc coating

Baying enclosure system VX25

System accessories Page 82 **VX25 basic enclosure with glazed door** Page 66 **VX25, stainless steel** Page 75 **VX25 EMC-shielded** Page 74

Material and surface finish:

- Enclosure frame: Sheet steel, 1.5 mm, dipcoat-primed
- Roof: Sheet steel, 1.5 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Door: Sheet steel, 2 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Rear panel: Sheet steel, 1.5 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Gland plates: Sheet steel, 1.5 mm, zinc-plated
- Mounting plate: Sheet steel, 3 mm, zinc-plated

Colour:

- RAL 7035

Protection category IP to

IEC 60 529:

- IP55

Protection category NEMA:

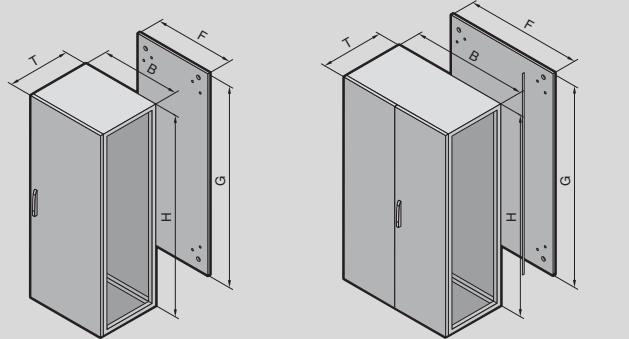

- NEMA 1, 12

Supply includes:

- Enclosure frame
- Door(s) (r/h hinge, may be swapped to opposite side)
- Roof plate
- Rear panel
- Gland plates
- Mounting plate
- 2 punched rails 18 x 39 mm
- Lock: 3 mm double-bit

Approvals:

- UL
 - cUL
 - Bureau Veritas
 - DNV-GL
 - Lloyds Register of Shipping
- Further approvals can be found on the Internet.

Baying enclosure system VX25

System accessories Page 82 **VX25 basic enclosure** Page 54 **VX25 stainless steel** Page 75 **VX25 EMC-shielded** Page 74

Material and surface finish:

- Enclosure frame: Sheet steel, 1.5 mm, dipcoat-primed
- Roof: Sheet steel, 1.5 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Glazed door: Extruded aluminium section, powder-coated, single-pane safety glass, 3 mm
- Rear door: Sheet steel, 2 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Gland plates: Sheet steel, 1.5 mm, zinc-plated

Colour:

- Enclosure frame, door frame, corner pieces, panels: RAL 7035
- Viewing window (printed mask on the inside): RAL 9005

Protection category IP to IEC 60 529:

- IP55

Protection category NEMA:

- NEMA 12

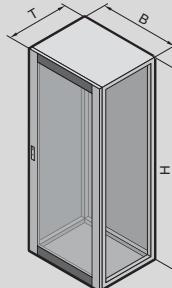

Supply includes:

- Enclosure frame
- Door(s) (r/h hinge, may be swapped to opposite side)
- Roof plate
- Glazed door at front
- Rear door
- Gland plates
- Lock: 3 mm double-bit

Approvals:

- UL
- cUL
- CSA

Further approvals can be found on the Internet.

Baying enclosure system VX25

System accessories Page 82 **482.6 mm (19") installation accessories** Page 208

Material and surface finish:

- Enclosure frame: Sheet steel, 1.5 mm, dipcoat-primed
- Roof: Sheet steel, 1.5 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Front frame: Extruded aluminium section, powder-coated
- Rear door: Sheet steel, 2 mm, dipcoat-primed, powder-coated on the outside, textured paint

Gland plates: Sheet steel, 1.5 mm, zinc-plated

- 482.6 mm (19") adaptor sections: Sheet steel, zinc-plated

Colour:

- RAL 7035

Supply includes:

- Enclosure frame
- Front frame (r/h hinge, held on the left via mechanical snap fasteners)
- Rear door (r/h hinge, may be swapped to opposite side)
- Roof plate
- Gland plates
- Adaptor sections, 482.6 mm (19"), front

Approvals:

- Bureau Veritas

Baying enclosure system VX25

System accessories Page 82 **Compartment configuration** Cat. 36, page 410 **Fuse-switch disconnector section** Cat.36, page 415

Material and surface finish:

- Enclosure frame: Sheet steel, 1.5 mm, dipcoat-primed
- Roof: Sheet steel, 1.5 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Door: Sheet steel, 2 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Rear panel: Sheet steel, 1.5 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Gland plate: Sheet steel, 1.5 mm, zinc-plated
- Front trim panel: Sheet steel, 1.5 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Compartment side panel: Sheet steel, 1.5 mm, zinc-plated

Colour:

- RAL 7035

Basis of test:

- IEC 61 439-1/-2
- IEC 61 641

Protection category IP to IEC 60 529:

- Up to IP3X, depending on the panels

Supply includes:

- Enclosure frame
- Door
- Roof plate
- Rear panel
- Gland plates
- Front trim panels
- Lock: 3 mm double-bit
- Compartment side panels
- Locating frame for disconnectors with fuses (brands ABB SlimLine/Jean Müller SASIL)

Baying enclosure system VX25

System accessories Page 877 **VX25 Basic enclosure** Page 116 **VX25 stainless steel** Page 242

The large enclosures in the VX25 series offer a good level of shielding across a broad frequency range, even in the standard version. For increased EMC requirements, Rittal's VX25 enclosure is also available in a high RF attenuation version.

Material and surface finish:

- Enclosure frame: Sheet steel, 1.5 mm, with magnesium zinc coating
- Roof: Sheet steel, 1.5 mm, with magnesium zinc coating, spray-finished on the outside and paint-free on the inside

- Door: Sheet steel, 2 mm, with magnesium zinc coating, spray-finished on the outside and paint-free on the inside
- Rear panel: Sheet steel, 1.5 mm, with magnesium zinc coating, spray-finished on the outside and paint-free on the inside
- Gland plates: Sheet steel, 1.5 mm, zinc-plated
- Mounting plate: Sheet steel, 3 mm, zinc-plated

Colour:

- RAL 7035

Protection category IP to IEC 60 529:

- IP55

Protection category NEMA:

- NEMA 12

Supply includes:

- Enclosure frame
- Door(s) (door hinge on the right, may be swapped to the left)
- Rear panel
- Roof plate
- Gland plates
- Mounting plate
- Lock: 3 mm double-bit
- 2 punched rails 18 x 39 mm

Note:

- For bayed enclosures, the EMC shielding seal is required

Approvals:

- UL
- cUL

Further approvals can be found on the Internet.

Baying enclosure system VX25, stainless steel

Lock systems Page 128 **VX25, sheet steel** Page 54

Material and surface finish:

- Enclosure frame: Stainless steel 1.4301 (AISI 304), 1.5 mm
- Roof: Stainless steel 1.4301 (AISI 304), 1.5 mm, exterior brushed, grain size 400
- Door: Stainless steel 1.4301 (AISI 304), 2 mm, exterior brushed, grain size 400
- Rear panel: Stainless steel 1.4301 (AISI 304), 1.5 mm, exterior brushed, grain size 400
- Gland plates: Stainless steel 1.4301 (AISI 304), 1.5 mm
- Mounting plate: Sheet steel, 3 mm, zinc-plated

Protection category IP to IEC 60 529:

- IP55

Protection category NEMA:

- NEMA 1, 12

Supply includes:

- Enclosure frame
- Door(s) (r/h hinge, may be swapped to opposite side)
- Roof plate
- Gland plates
- Rear panel
- Mounting plate
- Lock: 3 mm double-bit
- 2 punched rails 18 x 39 mm

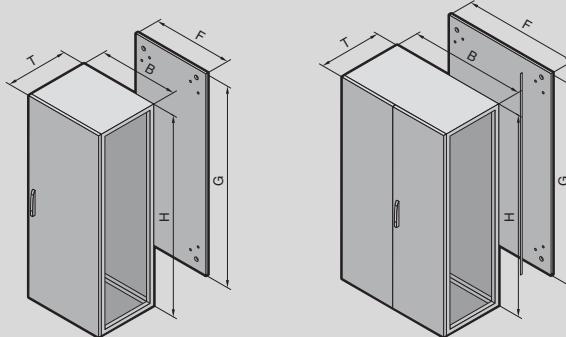

Note:

- Due to the hardness of the material, we recommend using metal multi-tooth screw 2486.400 for the interior installation

Approvals:

- UL
- cUL
- DNV-GL

Baying enclosure system VX25, stainless steel

System accessories Page 82 **Cable entry** Page 198

Material and surface finish:

- Enclosure frame: Stainless steel 1.4301 (AISI 304), 1.5 mm
- Roof: Stainless steel 1.4301 (AISI 304), 1.5 mm, exterior brushed, grain size 400
- Door: Stainless steel 1.4301 (AISI 304), 2 mm, exterior brushed, grain size 400
- Rear panel: Stainless steel 1.4301 (AISI 304), 1.5 mm, exterior brushed, grain size 400
- Gland plates: Stainless steel 1.4301 (AISI 304), 1.5 mm
- Mounting plate: Sheet steel, 3 mm, zinc-plated

Protection category IP to IEC 60 529:

- IP66

Protection category NEMA:

- NEMA 1, 3R, 4, 4X, 12

Supply includes:

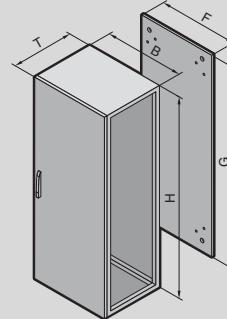

- Enclosure frame
- Door(s) (r/h hinge, may be swapped to opposite side)
- Roof
- Gland plate
- Rear panel
- Mounting plate
- Lock: 3 mm double-bit
- 2 punched rails 18 x 39 mm

Note:

- Due to the hardness of the material, we recommend using metal multi-tooth screw 2486.400 for the interior installation

Approvals:

- UL
- cUL

Perfect integration into bayed enclosure suites

VX25 TopTherm chillers

VX25 TopTherm chillers are compact in design and cover a diversity of applications. They integrate perfectly with the enclosure – as series products promising a minimised footprint, increased efficiency and fast availability.

The benefits for you:

- Up to 35% smaller CO₂ footprint
- Microchannel technology reduces the volume of refrigerant required
- Integral safety functions create enhanced safety
- Minimum footprint
- A single housing size for four output categories
- Convenient servicing

40%
less refrigerant

Up to **35%**
smaller CO₂ footprint

34%
smaller footprint

Less complexity

- Fast parameterisation, data reading as well as plain-text system and error messages on the smart, multilingual, industry-grade touch display
- Simple configuration with the chiller configurator
- Predefined options shorten delivery times
- Suitable for global use with a dual-frequency connection voltage

Sustainable technology

- Proven energy savings; the carbon footprint is reduced by up to 35%
- Microchannel technology uses 40% less refrigerant
- Eliminates the requirement for an annual leak test, for significantly reduced maintenance costs

Perfect integration

- Integrated into the VX25 baying system and therefore perfect for baying in an enclosure suite
- 20 kW output category on a footprint of just 0.48 m²
- One enclosure system for four output categories (8 to 20 kW)
- Compatible VX25 system accessories for assembly, baying and attachment

Enhanced safety

- Integrated safety functions (overflow valve, flow monitor and fill level and phase rotation monitoring)
- Pre-installed external NTC sensor for ambient temperature-led differential control
- Prolonged component life and high levels of machining accuracy with precise temperature control (± 1 K)
- Smart interfaces support remote monitoring

High availability

- Fast delivery off the shelf
- Qualified service technicians help to minimise downtime and boost efficiency
- Excellent availability of original spare parts and 24-hour contactability
- Modular design for optimum accessibility

Base/plinth system VX

Integral centring aid
The centring aid for base/plinth mounting on the enclosure frame ensures precise positioning of the enclosure on the base/plinth.

Separate trim panels
Screw-fastened trim panels from the front ensure high stability and easy access to the cable management level behind.

Enclosure attachment
The nuts integrated into the base/plinth corner piece allow screw-fastening directly from above, through the stable base frame, or from below, into the enclosure corner piece. The reinforcement brackets on the base/plinth corner ensure greater stability.

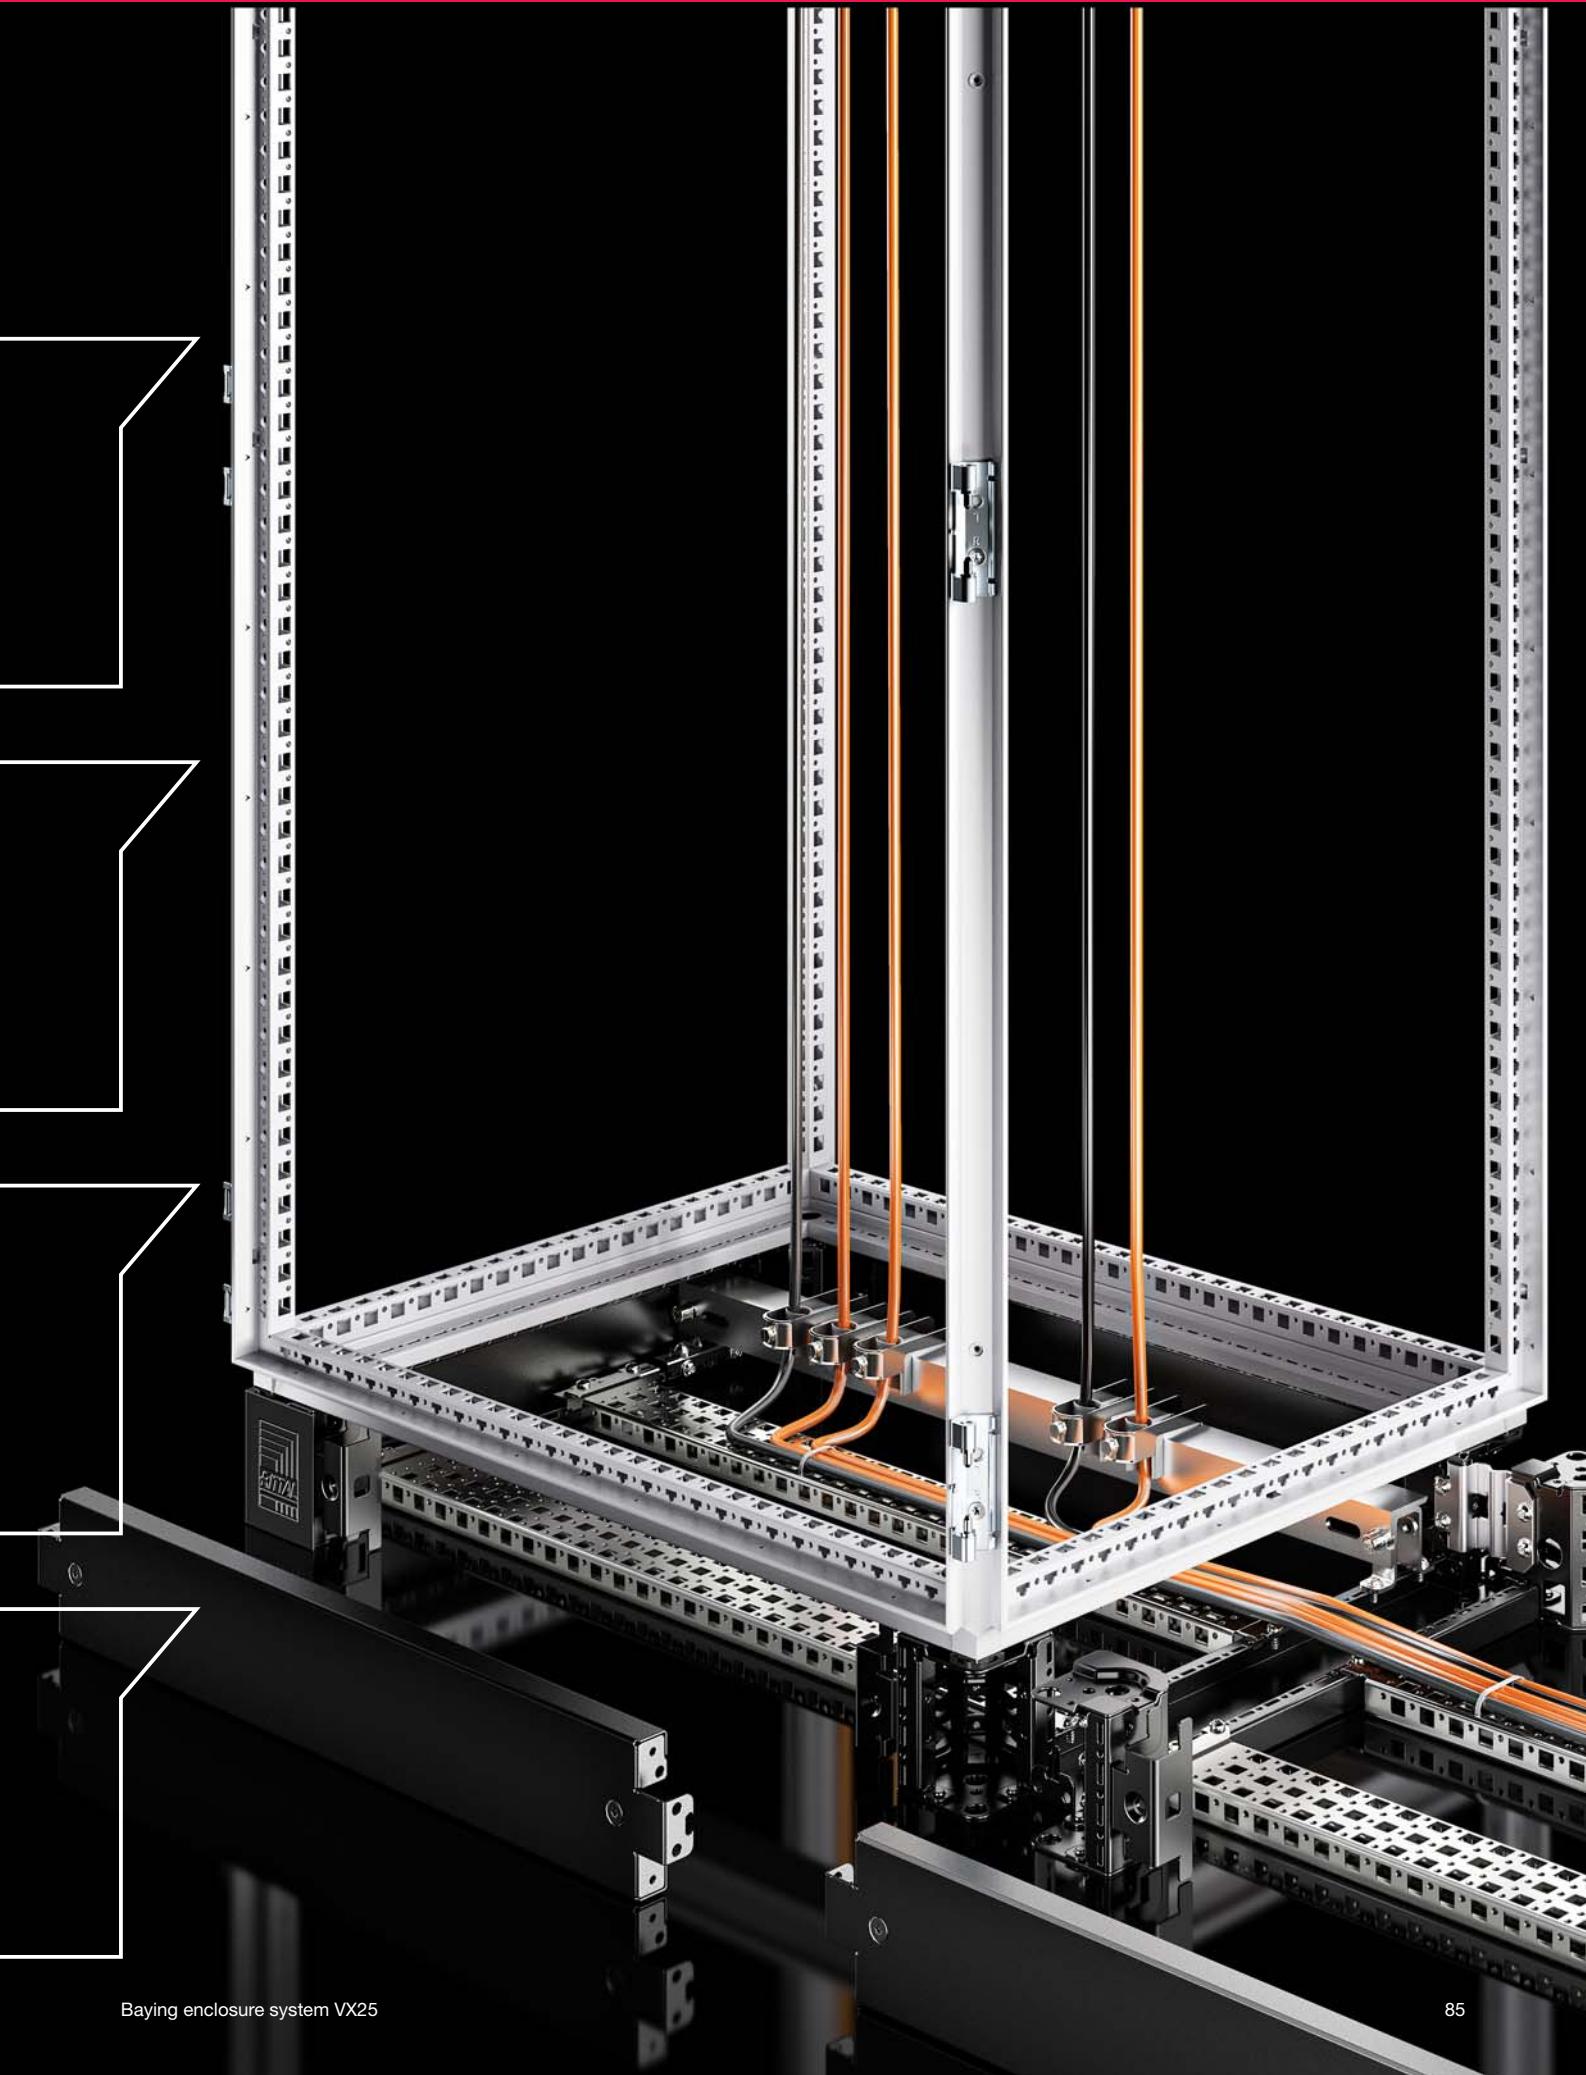

Simple cable management
Secure cable attachment and cable routing via the punched section with mounting flange in the base/plinth.

Additional cable chamber
Gain space with simple integration of the cable clamping rail and C rail for secure, user-friendly cable routing.

Base/plinth system VX

Base/plinth system VX

Base/plinth system VX
All trim panels may optionally be clipped into the corner piece, or securely screw-fastened. Depending on the application, users can dispense with the trim panels between bayed enclosure suites, or a 100 mm high trim panel may be used to stabilise the base/plinth corner pieces.

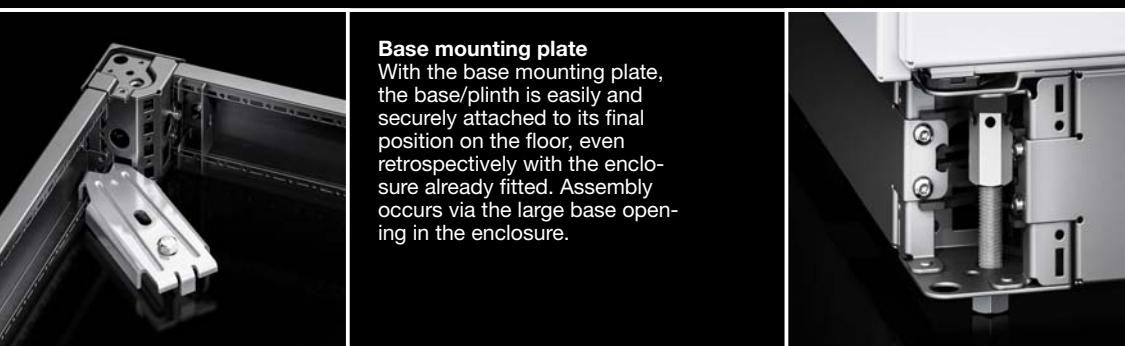

Trim panels
The solid trim panels supplied as standard are easily replaced with vented trim panels or trim panels with brush strips. Two 100 mm high trim panels may also be used in a 200 mm high base/plinth.

Twin castors
The twin castors may be screw-fastened directly to the enclosure corner piece from the outside. Mounting on the VX base/plinth system is also supported via an adaptor.

Transportation
Easily transported by forklift or lifting truck with the front trim panel dismantled, even with bayed enclosures.

Base mounting plate
With the base mounting plate, the base/plinth is easily and securely attached to its final position on the floor, even retrospectively with the enclosure already fitted. Assembly occurs via the large base opening in the enclosure.

Levelling component
The levelling component may be used for retrospective levelling on uneven floors. Unevenness of up to 15 mm can be compensated in this way.

Base/plinth system VX

Base/plinth

Base/plinth system VX

Modular base/plinth diversity

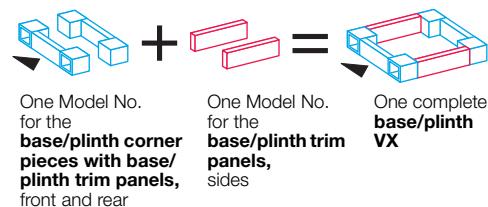

The new, innovative base/plinth system VX offers an unprecedented diversity of functions and applications. It combines all existing base/plinth functions in a single solution, as well as opening up many new applications. As if that wasn't enough, it is also compatible with existing enclosure solutions VX, VX IT, VX SE, TX, PC, TopConsole and IW. In short, it is a base/plinth system.

The base/plinth system VX comprises the following components:

- Base/plinth corner pieces with base/plinth trim panels, front and rear
- Base/plinth trim panels, sides

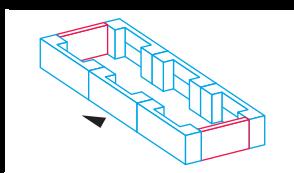

Thanks to fully symmetrical corner pieces, and by using the same base/plinth trim panels in the width and depth, the system opens up many new applications. For example, the vented trim panels and trim panels with brush strips available as accessories may now optionally be attached at the sides, or exchanged for the front/rear trim panels.

All trim panels may optionally be clipped into the corner piece, or securely screw-fastened. Depending on the application, for example, users can dispense with the trim panels between bayed enclosure suites, or a 100 mm high trim panel may be used to stabilise the base/plinth corner pieces. In combination with its extensive range of accessories, and thanks to its compatibility with enclosure accessories, the base/plinth system VX offers almost infinite possibilities in terms of siting, transportation, cable routing, cable attachment and base/plinth configuration.

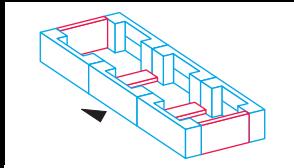

Base/ plinth	Basic form	Cable entry options				Stabilisation of bayed base/plinths
100 mm						
200 mm						

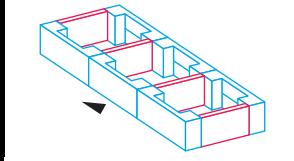

Configuration examples

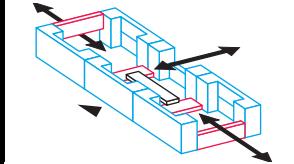

Order includes	Functional benefits
3 packs of Base/plinth corner pieces with base/plinth trim panels 1 pack of Base/plinth trim panels, sides, 200 mm high	Continuous cable chamber

3 packs of Base/plinth corner pieces with base/plinth trim panels 1 pack of Base/plinth trim panels, sides, 200 mm high 1 pack of Base/plinth trim panels, sides, 100 mm high 1 pack of with inlaying brackets (8617.500, packs of 6) 4 pieces are required for this solution	Additional stability during transportation with base/plinth trim panels rotated through 90°
---	---

3 packs of Base/plinth corner pieces with base/plinth trim panels 2 packs of Base/plinth trim panels, side, 200 mm high	Shielding of the base/plinths from one another
--	--

- Other options:
- Cable entry at the side by fitting a 100 mm base/plinth trim panel with brush strip
 - Cable entry from the rear by dismantling one or more trim panels from the base/plinth corner pieces and replacing them with trim panels with brush strips
 - Cable routing in the base/plinth by using punched sections with mounting flanges on the base/plinth trim panels

Base/plinth

Base/plinth system VX

Base/plinth corner pieces with base/plinth trim panels, front and rear

Sheet steel

High-load capacity base/plinth corner pieces with moulded self-positioning to the enclosure, may be used with or without trim panels depending on the application. Large openings in the base/plinth corner piece for optimum access to the screw-fastening point, may be concealed with a plastic corner and baying cover.

Material:

- Base/plinth corner piece: Sheet steel
- Base/plinth trim panel front/rear: Sheet steel
- Corner and baying cover: Plastic

Colour:

- RAL 9005

100 mm high supply includes:

- 4 base/plinth corner pieces, 100 mm high
- 4 corner covers
- 1 baying cover
- 2 base/plinth trim panels, front/rear, 100 mm high
- Assembly parts

200 mm high supply includes:

- 4 base/plinth corner pieces, 200 mm high
- 4 corner covers
- 1 baying cover
- 1 base/plinth trim panel, front/rear, 200 mm high
- 2 base/plinth trim panels, front/rear, 100 mm high
- Assembly parts

Base/plinth trim panels with brush strip

Sheet steel

For cable entry in the base/plinth. With a base/plinth height of 200 mm, one or two trim panels with brush strips may optionally be used. Thanks to the complete symmetry of the base/plinth system VX, the trim panels with brush strip may either be fitted at the front, rear or side on the base/plinth corner piece.

Material:

- Base/plinth trim panels: Sheet steel
- Brush strip: Plastic, self-extinguishing

Colour:

- RAL 9005

Supply includes:

- 2 base/plinth trim panels with brush strip
- Assembly parts

Base/plinth

Base/plinth system VX

Base/plinth trim panels, vented

Sheet steel

For venting the enclosure via the base/plinth. Specifically in applications such as power distribution where the enclosure gland plates are not used, this can be used to achieve a higher air throughput inside the enclosure. Various solutions to raise the roof and special roof plates with vent openings are also available for enclosure venting. With a 200 mm base/plinth height, one or two vented trim panels may optionally be used. Thanks to the complete symmetry of the base/plinth system VX, the vented trim panels may either be fitted at the front, rear or side on the base/plinth corner piece.

Material:

- Sheet steel

Colour:

- RAL 9005

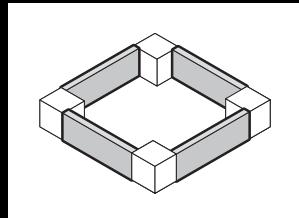

Supply includes:

- 2 base/plinth trim panels, vented
- Assembly parts for mounting on the base/plinth corner piece

For enclosure width/depth mm	Model No.
600	8620.090
800	8620.091

Accessories:

- Base/plinth installation bracket, see page 93
- Spacers for lifting the roof, see page 145
- Roof plate with vent holes, see page 146

Base/plinth corner pieces with base/plinth trim panels, front and rear

Stainless steel

High-load capacity base/plinth corner pieces with moulded self-positioning to the enclosure, may be used with or without trim panels depending on the application. Large openings in the base/plinth corner piece for optimum access to the screw-fastening point, may be concealed with a plastic corner and baying cover.

Material:

- Base/plinth corner piece: Stainless steel 1.4301 (AISI 304)
- Base/plinth trim panel front/rear: Stainless steel 1.4301 (AISI 304 steel)
- Corner and baying cover: Plastic

Surface finish

- Trim panel: Grain size 400

100 mm high supply includes:

- 4 base/plinth corner pieces, 100 mm high
- 4 corner covers
- 1 baying cover
- 2 base/plinth trim panels, front/rear, 100 mm high
- Assembly parts

200 mm high supply includes:

- 4 base/plinth corner pieces, 200 mm high
- 4 corner covers
- 1 baying cover
- 1 base/plinth trim panel, front/rear, 200 mm high
- 2 base/plinth trim panels, front/rear, 100 mm high
- Assembly parts

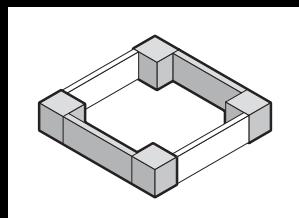

For enclosure width mm	Height mm	Model No.

1200	200	8620.063

Also required:

- Base/plinth trim panels, sides, to finish off a unit, for additional stabilisation between base/plinths, or for interior configuration, see page 92

Accessories:

- Base/plinth installation bracket, see page 93
- Levelling component for base/plinth, see page 93
- Base mounting plate, see page 92
- Base/plinth adaptor for twin castors and levelling feet, see page 97
- Transport castors for base/plinth, see page 92
- C rail 30/15, see page 167

Base/plinth

Base/plinth system VX

Base/plinth trim panel, sides

Stainless steel

To finish off a base/plinth unit at the sides and for additional stability or interior configuration of bayed base/plinths. One 200 mm high or two 100 mm high trim panels may optionally be fitted on 200 mm high base/plinths.

Material:

- Stainless steel 1.4301 (AISI 304)

Surface finish:

- Brushed, grain size 400

Supply includes:

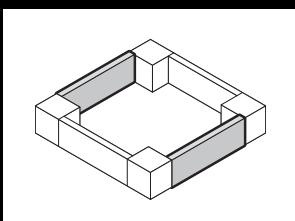

- 2 base/plinth trim panels
- Assembly parts

For enclosure depth mm	Height mm	Model No.
400	100	8620.070
500	100	8620.071

- Base/plinth installation bracket, see page 93

Transport castors

For locating onto the base/plinth corner piece, 100 or 200 mm high.

Load capacity:

- Maximum permissible load per twin castor:
1000 N

Colour:

- RAL 9005

Supply includes:

- 4 twin castors, 2 x with, 2 x without locks

Floor clearance mm	Model No.
100	8100.700

Accessories:

- Base/plinth trim panels, sides, for stabilisation,
see page 90

Base mounting plate

For attaching the base/plinth to the floor.
For assembly screws up to 12 mm Ø.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Packs of	Model No.
10 pc(s).	2817.000

Base/plinth

Base/plinth system VX

Base/plinth installation bracket

For configuring the base/plinth with punched sections with mounting flanges or cable clamp rails. To fit 100 and 200 mm high base/plinth trim panels in sheet steel and stainless steel.

Material:

- Stainless steel 1.4301 (AISI 304)

Supply includes:

- 2 installation brackets
- 2 mounting brackets for cable clamp rail
- Assembly parts

Note:

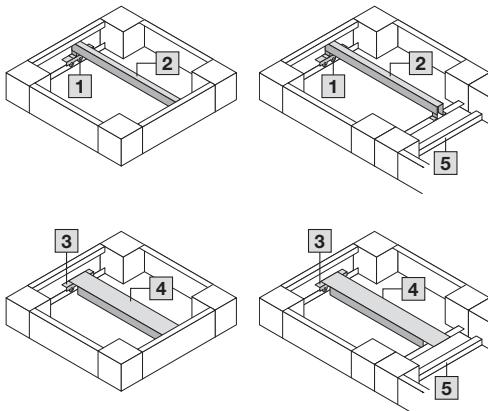

- For interior installation on upright base/plinth trim panels
- For base/plinth trim panels rotated through 90°, the installation bracket is not needed, because in this position, the system punchings of the base/plinth trim panels may be used directly.

- [1] Installation bracket with mounting bracket for cable clamp rail
- [2] Cable clamp rail
- [3] Installation bracket
- [4] Punched section with mounting flange, 23 x 89 mm
- [5] Base/plinth trim panel, rotated through 90°

For base/plinth trim panel height mm	Packs of	Model No.
100	2 pc(s).	
200	2 pc(s).	8620.400

Accessories:

- Punched section with mounting flange, 23 x 64 mm, see page 164
- Punched section with mounting flange, 23 x 89 mm, see page 165
- Cable clamp rail, see page 204

Levelling component

For retrospective levelling on uneven floors at the installation site up to a maximum of 15 mm. Installed through the base/plinth corner piece. Adjusted using a hex spanner, width across flats 19 mm.

Benefits:

- A door offset caused by uneven flooring can be corrected
- Installed on the assembled enclosure, i.e. no need to plan levelling in advance

Load capacity:

- Max. admissible load: 2500 N per levelling component (check the load capacity of the floor)

Supply includes:

- Assembly parts

For base/plinth height mm	Packs of	Model No.
100	4 pc(s).	8100.710
200	4 pc(s).	8100.711

Base/plinth

Base/plinth system VX

Cross member

adjustable

- To increase stability
- Height 70 mm
- Adjustable to the enclosure depth

To increase stability, the cross member is positioned below the base frame of the enclosure and protrudes 138 mm at the front and rear. For deeper enclosures, the rear part may be extended and screw-fastened again. For screw-fastening to the floor and enclosure with mounting hole at the sides, front and rear. The castors and levelling feet may be secured to the welded nuts M12.

Material:

- Sheet steel

Surface finish:

- Spray-finished

Colour:

- RAL 7015

For enclosure depth mm	Model No.
400	8601.450
500	
600	8601.680
800	

Accessories:

- Twin castors 6148.000, 7495.000, see page 96
- Levelling feet 4612.000, see page 96

Assembly

- Ensure sufficient stability to prevent the enclosure from tipping over

Filter mat

for base/plinth trim panel, vented

The filter mat is simply inserted into the trim panel from the rear.

Supply includes:

- 1 pack = 2 rolls, length 2 m each, may be shortened to required length

Packs of	Model No.
1 pc(s).	8620.100

Baying cover

To neatly close the gap between two bayed base/plinths and it is required to close the gap at the rear when baying three or more base/plinths.

Height mm	Packs of	Model No.
100	10 pc(s).	8620.010
200	10 pc(s).	8620.011

Material:

- Plastic ABS, halogen-free

Colour:

- RAL 9005

Note:

- A baying cover is already included as standard with the supply of base/plinth corner pieces with base/plinth trim panels, front and rear.

Base/plinth

Base/plinth system VX

Cable chamber

With integral system punchings for individual system accessories.

Height: 200 mm

Material:

- Sheet steel

Colour:

- RAL 7035

Supply includes:

- 1 frame
- 2 trim panels front/rear
- Assembly parts for mounting on the enclosure

Accessories:

- Side panels for cable chamber, see page 95

Side panel

for cable chamber

Height: 200 mm

Material:

- Sheet steel

Colour:

- RAL 7035

Supply includes:

- 2 side panels
- Assembly parts

For enclosure depth mm	Packs of	Model No.
500	2 pc(s).	8600.510
600	2 pc(s).	8600.520

Paint

For touching up and repairing powder-coated and wet-painted surfaces, air-drying.

	Colour	Model No.
Spray can 150 ml	RAL 9005	2440.905

Base

Levelling feet

To compensate for height differences with floor irregularities. Mounting thread M12.

Load capacity:

- Max. admissible load: approx. 3000 N per levelling foot

Material	Levelling range mm	Packs of	Model No.
Sheet steel	18 – 43	4 pc(s).	4612.000
Stainless steel	30 – 110	4 pc(s).	8100.780

! Also required:

- For mounting on the base/plinth:
Base/plinth adaptor, see page 97

Levelling feet

85 – 115 mm high

For mounting on enclosures, for easier floor cleaning and to compensate for floor irregularities ±15 mm.

Load capacity:

- Max. admissible load: 3,500 N per levelling foot

Material:

- Stainless steel 1.4301 (AISI 304)

Supply includes:

- Assembly parts

Packs of	Model No.
4 pc(s).	2859.000

Twin castors

For mobile use, for mounting directly on the enclosure. Mounting thread M12 x 20.

Supply includes:

- Packs of 4 twin castors,
2 x with, 2 x without locks
- Assembly parts

①	Maximum admissible load (per castor)	750 N
	Floor clearance	85 mm
	Lock	2 with, 2 without
	Packs of	4 pc(s).
	Colour	Black with grey running surface
	Model No.	6148.000

②	Maximum admissible load (per castor)	1200 N
	Floor clearance	125 mm
	Lock	2 with, 2 without
	Packs of	4 pc(s).
	Colour	Black
	Model No.	7495.000

! Also required:

- For mounting on the base/plinth:
Base/plinth adaptor, see page 97

Base/plinth adaptor

for twin castors and levelling feet

For mounting twin castors and levelling feet to the base/plinth.

Material	Packs of	Model No.
Sheet steel	4 pc(s).	8100.770
Stainless steel	4 pc(s).	8100.771

! Also required:

- When fitting twin castors, side trim panels, see page 90, are required.

Note:

- Combined with twin castors, the admissible overall weight load is 3000 N

System divider

Divides the enclosure width into two zones. For example, this allows mounting plates, cable clamp rails or swing frames from 600 mm wide enclosures to be fitted in 1200 mm wide enclosures.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

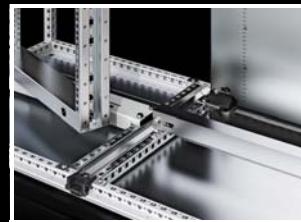

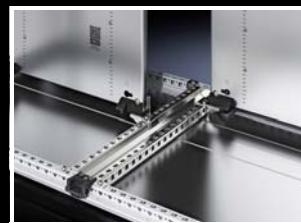

Supply includes:

- Assembly parts

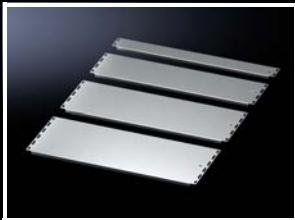

Depth	Packs of	Model No.
600	2 pc(s).	8620.901

+ Accessories:

- Swing frame mounting kit, see page 210
- Cable clamp rail, see page 204
- Support rails 48 x 26 mm, see page 167

Base

Gland plates

For individual configuration of the floor space. Potential equalisation is provided via assembly components and earthing points.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

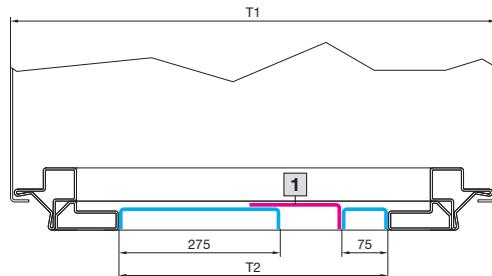

Note:

- At least one sliding plate is required to fully seal a base opening.
- For two-door enclosures, one pack is sufficient for one half of the enclosure

Example with enclosure depth 600 mm

T1 (600 mm) - 148 = T2 (452 mm)

Sliding plate

Accessories:

- Sliding plate, see page 98

For enclosure width 600 mm

A photograph showing two side panels being installed into a metal cabinet frame.	A close-up photograph of a small, integrated positioning aid on a side panel.	Side panels Simple one-man installation with the positioning aid provided as standard.	A photograph of a hinge mechanism on a side panel.	A schematic diagram of a square panel being hinged open at an angle of 180 degrees.	Hinge The hinge for side panels provides unhindered access from the side at any time, so the side panel can be opened at an angle of 180°.
A photograph of a side panel holder being attached to a cabinet wall.	A photograph of a side panel holder installed on a rear panel of a cabinet.		A schematic diagram showing a side panel holder being clipped onto a cabinet wall, with internal earthing wires connecting it to the panel.	Side panel holder The side panel holders are easily retro-fitted and removed at any time because they simply clip into position from the outside, even with the rear panel fitted. Internal earthing inserts ensure automatic potential equalisation, while at the same time guaranteeing enhanced EMC protection.	
A photograph of a cabinet with a large, multi-hole divider panel installed.	A photograph of a cabinet with a smaller, rectangular module plate installed.	A close-up photograph of a door handle and lock mechanism.		Divider panel for module plates A complete system comprised of a divider panel, module plates and adaptors, and even a cover with a door, is available for mounting heavy connectors. It goes without saying that the door can also be integrated into the complete lock system, with all its variants.	
A photograph of a cabinet with an isolator door cover installed on the left side.		Right A schematic diagram of a cabinet cross-section showing the isolator door cover installed on the right side, with a blue line indicating the center and red boxes marking the door's position.	Left A schematic diagram of a cabinet cross-section showing the isolator door cover installed on the left side, with a blue line indicating the center and red boxes marking the door's position.	Isolator door cover The solution for all switchgear subject to the requirements of UL 508 A for bayed enclosure suites. The Isolator door cover can be used on the left or right, and is finished off with the standard side panel.	

Walls

Side panels

Side panel, screw-fastened, sheet steel

- Time-saving assembly thanks to clip-in side panel holders
- Automatic potential equalisation and higher EMC protection, thanks to enclosure panel holders with earthing inserts located on the inside
- Easy positioning in the height and depth with the location aid
- One-person assembly
- Earthing bolts with large, paint-free contact surface for optimum contact

Material:

- Sheet steel, 1.5 mm

Surface finish:

- Dipcoat-primed, powder-coated on the outside

Colour:

- RAL 7035

Protection category IP to IEC 60 529:

Side panels

Hinge

for side panel, screw-fastened, sheet steel

The 180° opening angle allows unhindered access from the side.

Material:

- Die-cast zinc

Colour:

- RAL 7035

Protection category IP to IEC 60 529:

- IP55

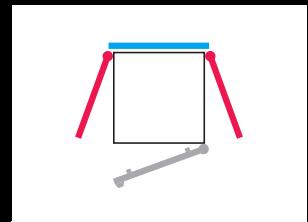

Supply includes:

- Assembly parts

Packs of	Model No.
6 pc(s).	8106.260

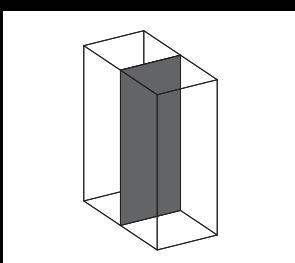

Note:

- Hinge mounting (red) is only possible in the vicinity of the rear panel (blue)
- Only for use with a side panel depth of 800 mm or less

Walls

Divider panels/partitions

Divider panel

For shielding individual enclosure cells. Thanks to the symmetry of the frame system, the divider panel can also be used at the rear. All-round, double fold for stability and to hold the seal.

Material:

- Sheet steel, 1.5 mm

Surface finish:

- Zinc-plated

Protection category IP to IEC 60 529:

- IP54

Supply includes:

- Assembly parts

Also required:

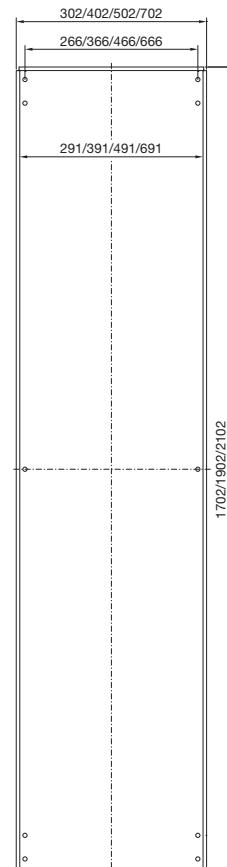

- When baying in conjunction with a divider panel:
Baying bracket, internal 8617.500, see page 112
or baying connector, external 8617.502,
see page 112

Accessories:

- Cover with door, see page 107

For enclosures		Model No.

Divider panels/partitions

Divider panel

for module plates

With cut-outs for the installation of module plates for connectors or for cable entry, and also for the entry of busbar systems and other installed equipment. All-round, double fold for stability and to hold the seal. The symmetry of the enclosure frame means that divider panels may also be fitted at the rear, dimensions permitting.

Material:

- Sheet steel, 2 mm

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

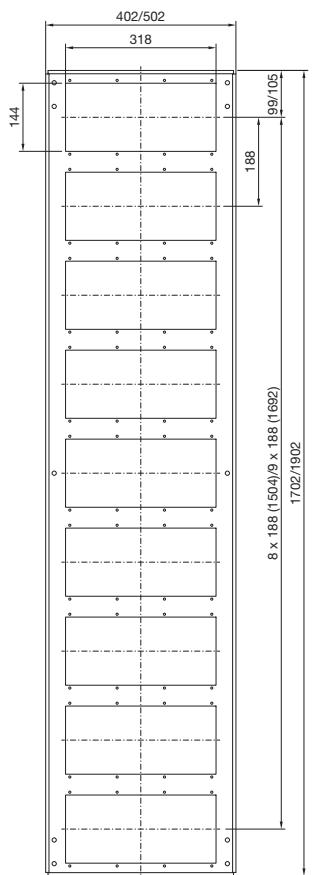

Also required:

- When baying in conjunction with a divider panel:
Baying bracket, internal 8617.500, see page 112
or baying connector, external 8617.502,
see page 112

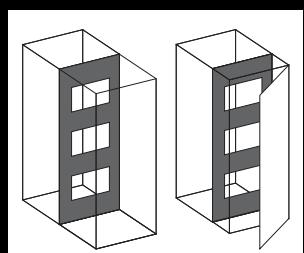

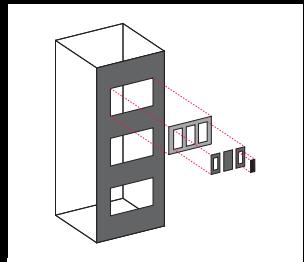

Accessories:

- Module plates, see page 106
- Cover with door, see page 107
- Baying bracket, internal, see page 112

For enclosures		Number of cut-outs	Model No.

Supply includes:

- Including seal

Design	Cut-outs	Packs of	Model No.
Solid	-	1 pc(s).	8609.160
For 16-pole connectors	4	1 pc(s).	8609.150
For 24-pole connectors	4	1 pc(s).	8609.140
For cable entry	1	1 pc(s).	8609.170
With cable sleeve	1	1 pc(s).	8609.390

**Solid**

For sealing unused cut-outs.
Easily machined for individual cut-outs.

**For 16/24-pole connectors**

With cut-outs to accommodate connectors.

**Accessories:**

- Adaptor, cover plate, see page 107
- Connector gland for connector cut-outs, see page 107
- Sealing frame, modular, see page 201

**For cable entry**

For inserting pre-assembled cables. Sealed, secure routing is achieved via adjustable angle brackets with inserted foam cable clamp strip. Fixed bracket, punched, for cable clamping.

**Accessories:**

- Cable tie for fast assembly 2597.000, see page 205

**With cable sleeve**

For cable diameters from 10 to 65 mm. The flexible grommet adapts to the cable's bending radius

Walls

Divider panels/partitions

Adaptor

for connector cut-outs

For using connectors with varying numbers of poles.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Seal and assembly parts

For reduction	Packs of	Model No.
From 24 to 16 poles	5 pc(s).	2479.000
From 24 to 10 poles	5 pc(s).	2480.000

From 16 to 6 poles	5 pc(s).	2402.000

Cover plate

for connector cut-outs

For unused cut-outs.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Seal and assembly parts

For	Packs of	Model No.
24-pole cut-outs	20 pc(s).	2477.000
16-pole cut-outs	20 pc(s).	2478.000

Connector gland

for connector cut-outs (24-pole)

For inserting 2 pre-assembled cables through the connector cut-out, without dismantling the cable connector.

Cable diameters : 8 – 36 mm

Material:

- Enclosure: Plastic
- Clamp terminal plate: Sheet steel

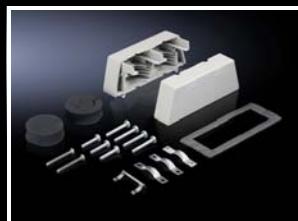

Surface finish:

- Clamps: Zinc-plated

Supply includes:

- Assembly parts

Packs of	Model No.
1 pc(s).	2400.000

Cover with door

- To protect and finish off connectors or other installed equipment.
- Optional cable entry from above or below

Material:

- Cover with door: Sheet steel, 1.5 mm
- Door: Sheet steel, 2.0 mm

Surface finish:

- Spray-finished

Colour:

- RAL 7035

Protection category IP to IEC 60 529:

- IP55

Protection category to NEMA:

- NEMA 12

Supply includes:

- Cover
- Door with locking rod and double-bit lock insert
- 2 trim panels for top and bottom

For enclosures		Model No.
Height mm	Depth mm	
2000	500	8609.220
2000	600	8609.230

Accessories:

- Lock inserts, type G, see page 129
- Comfort handle, see page 128
- 180° hinge, see page 119

Walls

Isolator door locking

Isolator door cover

Including main door latch for safety locking of enclosures and bayed enclosure suites in accordance with UL regulations. Tested in conjunction with actuator lever for master switch from the following companies:

- Allen Bradley
- Square D
- General Electric
- Eaton
- Siemens

A detailed overview of types can be found on the Internet, together with the product description.

Benefits:

- Meets the requirements of UL 508 A
- In conjunction with the operating mechanism, adjacent door lock and interconnecting rods, these requirements are also met for bayed combinations
- Optional mounting on the left or right of the enclosure. With this cover, all single-door bayed enclosures may be configured as isolator door enclosures. The complete installation surface of the enclosure is retained.
- In conjunction with the integrated mounting plate infill, the mounting surface of the main enclosure can be enlarged by up to 14%.
- Two cut-outs for actuator levers on the front, for internal mounting at varying heights

Material:

- Sheet steel, 1.5 mm

Surface finish:

- Powder-coated

Colour:

- RAL 7035

Protection category IP to IEC 60 529:

- IP55

Protection category to NEMA:

- NEMA 12

Supply includes:

- Main door lock, cover plate and assembly parts

Note:

- Cover may only be mounted on a single-door enclosure with tubular door frame

Also required:

- Operating mechanism 4912.000, for enclosure with isolator door cover and additionally in every fourth adjacent enclosure, see page 109
- Adjacent door latch 4911.000, 4911.100, for every adjacent enclosure, see page 109
- Interconnecting rods, for every adjacent enclosure in the appropriate enclosure width, see page 109
- Side panel, screw-fastened, see page 102

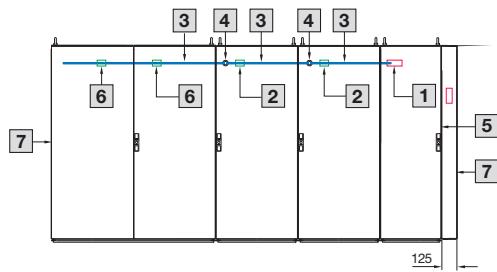

Accessories:

- Mounting plate infill, see page 151

Isolator door locking

- [1] Operating mechanism
- [2] Adjacent door latch (single-door)
- [3] Interconnecting rod
- [4] Connection component
- [5] Main door latch
- [6] Adjacent door latch (two-door)
- [7] Side panel, screw-fastened

Installation to the right of the enclosure

Isolator door locking

Door latch for bayed enclosure suites

In conjunction with the isolator door cover, the requirements of UL 508 A are also met for bayed enclosure suites. Depending on the baying combination, different components will be required; refer to the assembly sketch on page 108.

Note:

- The door latch for bayed enclosure suites can also be used without the isolator door cover and in combination with commercially available master switches. In this way, adjacent doors cannot be opened until the main door has been opened.

- [1]** Operating mechanism
Fitted in the enclosure with main switch and additionally in every fourth adjacent enclosure

	Packs of	Model No.
Operating mechanism	1 pc(s).	4912.000

- [2]** Adjacent door latch
Installation in adjacent enclosure

Adjacent door latch for	Packs of	Model No.
Single-door enclosures	1 pc(s).	4911.000
Two-door enclosures	1 pc(s).	4911.100

- [3]** Interconnecting rod
To extend locking from the main enclosure to the adjacent enclosures of a bayed suite. One interconnecting rod corresponding to the width of the enclosure is required for each adjacent enclosure.

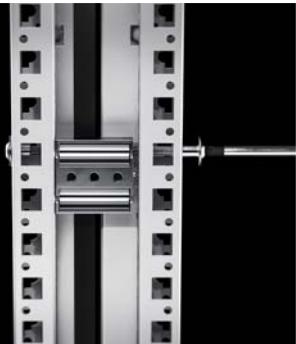

For enclosure width mm	Packs of	Model No.
600	10 pc(s).	4916.000
800	10 pc(s).	4918.000
1200	10 pc(s).	4920.000

Baying system

25

Baying connector, external
Simple baying on the vertical sections, even retrospectively, if installed equipment makes it difficult or impossible to bay from the inside.

Baying block, internal
Flexible positioning at the baying point, flush with the enclosure section on a 25 mm pitch pattern. Top-mounting of the baying block is easily achieved. Enclosures are easily pushed together.

Baying cover, top
Reliably protects the baying point at the top to prevent the accumulation of dirt and liquids.

Baying seal
Fast, secure-fit, all-round attachment of the baying seal onto the section edge; easily removed at any time without leaving any residues. Lends itself readily to reuse.

Baying bracket, internal
For flexible positioning at the baying point on a 25 mm pitch pattern, thereby avoiding collisions with equipment installed across multiple enclosures. The option of screw-fastening the baying bracket from the side makes it easy to push enclosures together.

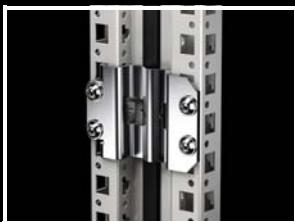

Combination angle
The combination angle can be exchanged for the roof mounting screw, to ensure optimum load distribution among the enclosure corner points when bayed enclosure suites are transported by crane.

Baying base/plinth corner pieces
The internal baying bracket can also be used for stable baying of base/plinth corner pieces in the base/plinth system VX.

Baying kit, VX25 to TS 8
Ensures the secure baying of a VX25 when extending existing TS 8 enclosure suites.

Baying system

Baying

Baying bracket, internal

- Fast, secure installation either from the front or from the side.
- For all-round installation on the baying point
- May be flexibly positioned to avoid collisions with installed equipment
- Also suitable for baying base/plinth components

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Baying bracket, internal
- Baying seal
- Assembly parts

Packs of	Model No.
6 pc(s).	8617.500

Note:

- 1 pack is sufficient for one baying joint

➡ Possible alternative:

- Baying block, internal, see page 112
- Baying connector, external 8617.502, see page 112

Baying block, internal

- Side mounting creates a flush surface to the extrusion, suitable for top mounting, thus avoiding collisions with installed equipment
- For all-round installation on the baying point

Material:

- Die-cast zinc

Supply includes:

- Baying block, internal
- Baying seal
- Assembly parts

Packs of	Model No.
6 pc(s).	8617.501

Note:

- 1 pack is sufficient for one baying joint

➡ Possible alternative:

- Baying bracket, internal, see page 112
- Baying connector, external 8617.502, see page 112

Baying connector, external

For mounting on the vertical enclosure sections from the outside.

Supply includes:

- Baying connector, external
- Baying seal
- Assembly parts

Material	Packs of	Model No.
Sheet steel, zinc-plated	6 pc(s).	8617.502
Stainless steel 1.4301 (AISI 304)	6 pc(s).	8617.503

Note:

- 1 pack is sufficient for one baying joint

➡ Possible alternative:

- Baying bracket, internal, see page 112
- Baying block, internal, see page 112

Baying system

Baying

Quick-fit baying clamps

- For all-round installation on the baying point
- May be flexibly positioned to avoid collisions with installed equipment
- Simply tighten the screws, tap in the quick-fit baying clamp, pull the enclosures together and secure
- Additional mounting level between bayed enclosures, e.g. for mounting cable ducts

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

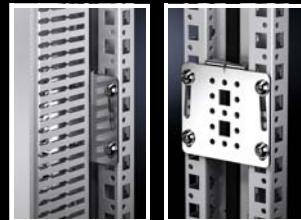

Packs of	Model No.
6 pc(s).	8617.506

Note:

- 1 pack is sufficient for one baying joint

+ Accessories:

- gasket-fit baying clamps 8617.507, see page 113

Angular baying bracket

For stable connection in the corners of bayed enclosures. Perfectly suited for aligning enclosures with one another on uneven floors.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

Packs of	Model No.
4 pc(s).	8617.508

Note:

- 1 pack is sufficient for one baying joint
- To achieve the required protection category and transportation stability, further baying connectors should be used halfway up the enclosure

Baying seal

May be used individually for baying on all existing enclosure sizes. The seal sits securely around the section edge, and is easily removed at any time without leaving any residues. It is also reusable.

Packs of	Model No.
1 pc(s).	8617.507

Material:

- EPDM

Supply includes:

- 8 m

Baying system

Baying

Combination angle

For optimum distribution of tensile forces during transportation of bayed enclosures by crane.

Supply includes:

- Assembly parts

Material	Packs of	Model No.
Sheet steel	4 pc(s).	4540.000
Stainless steel	2 pc(s).	4540.500

Accessories:

- Baying cover, top, see page 114

Baying cover, top

A cover with two end caps may additionally be clipped over the seal between the two enclosures. This prevents dirt and liquid from accumulating on the baying seal.

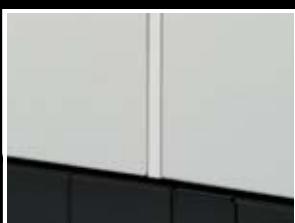

Supply includes:

- Assembly parts

Note:

- May also be fitted in the width with enclosure suites bayed back-to-back
- May also be used in conjunction with dust guard trim, see page 144

Baying cover, vertical

To balance out the gap between the side panels when baying back-to-back. For enclosure height 2200 mm, or may be cut to length individually for lower heights.

Material:

- Cover section: Plastic

Colour:

- RAL 7035

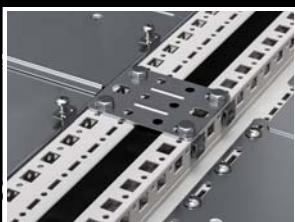

Supply includes:

- Assembly parts

Packs of	Model No.
2 pc(s).	8800.875

Also required:

- Baying connector, external, 8617.502, see page 112

Baying kit, VX25 to TS 8

For extending existing TS 8 bayed enclosure suites with VX25 enclosures.

Material:

- Baying connector: Sheet steel

Supply includes:

- 8 baying connectors
- 1 seal
- Assembly parts

Packs of	Model No.
1 pc(s).	8617.505

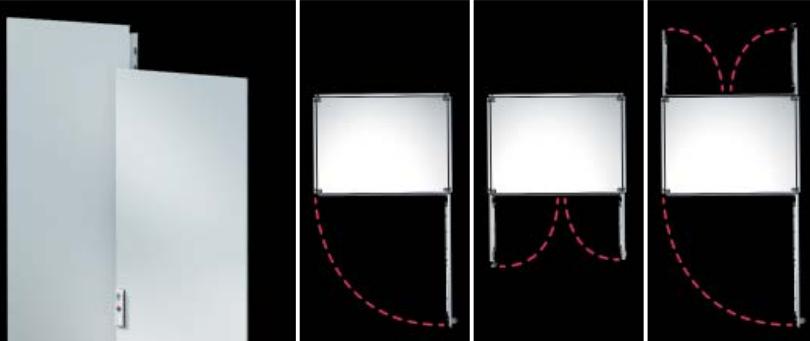

Door variants

25

Glazed door

The glazed door is an easy replacement for a sheet steel door, without the need for machining. The single-pane safety glass features a designer grid pattern print at the top and bottom. The glazed door is pre-fitted as standard with 180° hinges.

Lockable and adjacent door

In 800 mm wide enclosures, the one-piece standard door may be replaced for a two-piece lockable and adjacent door, so that mandatory escape routes can still be observed in confined spaces. The lockable and adjacent door may also be fitted instead of the rear panel.

Protective bar

In open control systems, the protective bar prevents people from falling into the switchgear. In combination with the hinged trim panel, top, this allows the safe accommodation of display and control components despite the open switchgear.

Modular climate control concept

The modular climate control concept allows cooling unit components up to 2500 W to be integrated into the enclosure door, without the need for machining. The standard door is easily replaced for the modular climate control door. In two-door enclosures, either the lockable door or the adjacent door may be exchanged for a modular climate control door.

Partial doors

Partial doors allow individual configuration of the enclosure front. Sheet steel variants and variants with a viewing window are available.

Transport and mounting handle

The transport and mounting handle is an ergonomic tool to make the fitting and removal of doors easier. It is simply suspended from the tubular door frame.

Door variants

Doors/locks

Door variants

Glazed door

Instead of a sheet steel door or rear panel.

Material:

- Frame: Extruded aluminium section
- Viewing window: Single-pane safety glass, 3 mm

Surface finish:

- Powder-coated

Colour:

- Frame and corner pieces: RAL 7035
- Viewing window (printed mask on the inside): RAL 9005

Protection category IP to IEC 60 529:

- IP55

Supply includes:

- Glazed door
- Locking rod with double-bit lock insert
- 180° hinges, 4 pc(s)

Modular climate control concept – Cooling module "Blue e"

VX25 enclosures Page 54 **Base/plinth VX** Page 89

All cooling modules may be individually combined with any climate control door. The cooling modules are equipped with energy-efficient Blue e technology, with integral e-Comfort controller, RiNano coating on the condenser and electric condensate evaporation as standard.

Benefits:

- May be linked to the IoT interface via the Blue e IoT adaptor

Temperature control:

- e-Comfort controller (factory setting +35 °C)

Material:

- Sheet steel

Colour:

- RAL 7035

Protection category IP to IEC 60 529:

- External circuit IP34
- Internal circuit IP54

Supply includes:

- Cooling module prepared for installation in climate control door
- Nano-coated condenser
- Integral electric condensate evaporation
- Fully wired ready for connection (plug-in terminal strip)

Note:

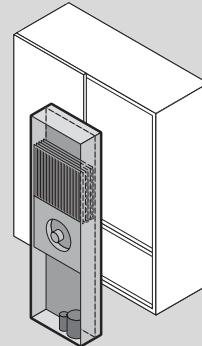

- A base/plinth with a height of 100 or 200 mm is required for efficient operation

Doors/locks

Installation accessories for modular front design

Modular front design

Suitable for 400 to 1200 mm wide enclosures instead of a door or rear panel. The partial doors with and without viewing panels, including cross members, may be combined with one another as required. A trim panel is required at the top and bottom in each case. The requirements for your individual front design and the considerations which must be taken into account are illustrated on the sample configuration opposite.

- [1] Front trim panel, top
- [2] Front trim panel, bottom
- [3] Partial door with viewing window
- [4] Partial door

Doors/locks

Installation accessories for modular front design

Partial door

The door may be optionally hinged on the right or left. The partial door is attached to the enclosure with no drilling required. Standard double-bit lock insert may be exchanged for lock inserts, type A.

Material:

- Partial door: Sheet steel, 2 mm
- Viewing window: 3 mm single-pane safety glass

Surface finish:

- Textured paint

Colour:

- RAL 7035

Protection category IP to IEC 60 529:

- IP54 up to enclosure width 800 mm

Supply includes:

- Cross member, hinges and lock components
- Assembly parts

Note:

- Opening angle of partial doors max. 130°

Also required:

- Front trim panel, top, see page 124 or top-hinged trim panel, see page 125
- Front trim panel, bottom, see page 124

Accessories:

- Mini comfort handle (from AE enclosure height 380 mm, from AE enclosure width 200 mm)
- Lock inserts, type A, see page 123
- Perforated mounting strips, see page 124

Lock systems

25

	<p>Electronic lock systems When using electronic lock systems that require additional cabling, punchings are provided as standard in the door so that they can be fitted retrospectively without the need for machining.</p>		<p>Multiple lock Up to six padlocks may be attached to the multiple lock, providing individual access rights for different individuals or groups of individuals.</p>
---	---	--	---

Standard lock

The standard lock allows convenient, tool-free installation and removal. Simply unlatch the locking pin with the door opened. Replacing the lock insert or exchanging it for a comfort handle couldn't be simpler.

Comfort handle

Installation of the comfort handle is completely tool-free, and with its ingenious fold-down system, it does not require any swing space or door surface area. The comfort handle is available in all standard versions and lock inserts.

Seamless lock system

Because a full range of standard lock inserts is available for all the locks used, a seamless lock system can be created.

Doors/locks

Lock system

Comfort handle VX

As the handle does not take up any swing space, due to its folding action, the door surface area available for installed equipment is maximised. Simple assembly, thanks to the snap-mounted handle system. Prepared for the installation of lock inserts, lock and push-button inserts or for the installation of standard commercially available 40 or 45 mm profile half-cylinders.

Safety lock

Fitted to doors, to protect against contact with live electrical equipment whilst the master switch is ON.

Function:

- Locks the door when the master switch is ON.
- Mains power (voltage) is only enabled whilst the door is closed.
- Monitoring of the lock magnet via an additional closing contact.

Supply includes:

- Lock
- Actuator
- Angle bracket
- Assembly parts

Connection voltage for lock magnet	Model No.

Door installation

25

		<p>Punched section with mounting flange, 14 x 39 mm The punched section with mounting flange, 14 x 39 mm, allows completely flexible door installation on the tubular door frame, no machining required.</p>	
		<p>Spacers Spacer bolts allow a mounting level to be quickly and easily created at the correct distance, onto which a top hat rail or a contact hazard protection cover for built-in components can be easily installed in the door.</p>	
		<p>Ride-up roller Even the heaviest populated door is easily opened and closed with the ride-up roller.</p>	
		<p>Door stay The door stay for escape routes guarantees convenience and safety. The enclosure door is securely locked into position for assembly work. In dangerous situations, the stay is released automatically under pressure, and by using 180° hinges, escape routes can be kept clear in both directions.</p>	

Doors/locks

Door, internal

Punched section with mounting flange, 14 x 39 mm

Secure location and fast mounting on the tubular door frame.

For attaching

- Cable ducts
- Cable conduit holders
- Equipment installed on the door, etc.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

For door width mm	Packs of	Model No.
400	4 pc(s).	8619.700

1000	4 pc(s).	8619.750

Accessories:

- Screws and self-tapping screws M5 for configuring the customer's own components on the punched section with mounting flange, see page 172

Spacers

The universal assembly component for all situations where a distance from the mounting level is required. With self-tapping thread for 4.5 mm diameter holes. The following components may be attached to the rear using 5.5 x 13 mm screws:

- Top-hat / cross rails
- Contact hazard protection covers
- Master switch trim panels
- Cable clamp rails

etc.

Material:

- Hexagonal steel (SW8)

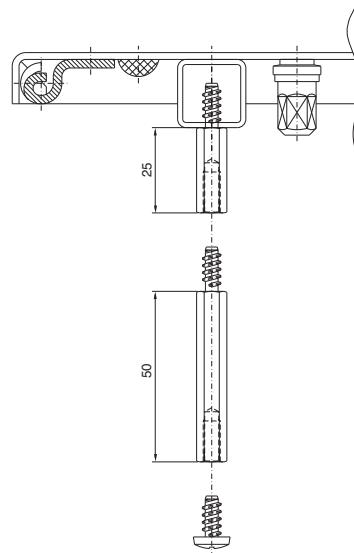

Surface finish:

- Zinc-plated

Accessories:

- Screws 5.5 x 13 mm, see page 172

Door stay

To secure the door in the open position. May be fitted without machining the enclosure/housing.

Supply includes:

- Assembly parts

Assembly	Packs of	Model No.
bottom	1 pc(s).	8618.430

Door stay for escape routes

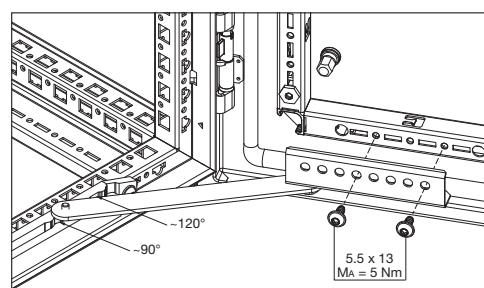

In an emergency situation, conventional door stays could block the escape route. The stay is activated automatically by pressure, releasing the door in both directions. In conjunction with 180° hinges, this ensures that no escape routes are blocked by open doors in the event of an emergency. The space-saving design does not obstruct the installed equipment in the door.

Supply includes:

- Assembly parts

Packs of	Model No.
1 pc(s).	8618.425

	Accessories:
- 180° hinge, see page 119	

Ride-up roller for door

Lifts up the door when there is heavy installed equipment (e.g. cooling unit) as a closing aid. For attaching to the tubular door frame.

Packs of	Model No.

Doors/locks

Viewing window

System window

To cover display and operating elements or cut-outs, and to protect against dirt and liquids as well as unauthorised access.

Consisting of the following 2 components:

1. Base frame:

- Easily screw-fastened to the door thanks to modified dimensions (tubular door frame may be used as a drilling template)
- Readily height-adjustable
- Stabilises the door cut-out
- Conceals the cut edge
- The rain canopy
 - prevents dirt from landing on the seal
 - protects the glass from being lifted out
 - prevents the ingress of dirt, and prevents moisture from running behind the window when opened
- Frame section height 30 mm or 60 mm

2. Viewing window:

- Made from single-pane safety glass:
 - High level of resistance to solvents and scratches
 - Anti-static
 - Reduced risk of injury if broken
- Cam lock with double-bit insert, may be exchanged for lock inserts, type A, and semi-cylinders in the Ergoform-S lock system (not for 2735.500 and .560)
- Hinge with 180° opening angle, easily inserted

Material:

- Extruded aluminium sections with die-cast zinc corner pieces and single-pane safety glass

Surface finish:

- Base frame: Powder-coated in RAL 7035
- Hinge and lock section: Natural-anodised

Protection category IP to IEC 60 529:

- IP54

Note:

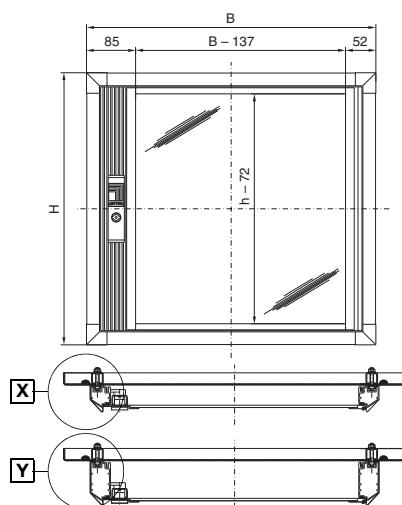

- Not suitable for outdoor siting

- Assembly parts

Packs of	Model No.
1 pc(s).	2379.900

	Eyebolts For transporting by crane, the standard roof fixing screw is easily exchanged for eyebolts, or in the case of bayed enclosure suites, combined with the combination angle. With both variants, the automatic potential equalisation is retained.	 Spacer Spacers are available in three different heights, so that the roof can easily be raised for ventilation purposes.
	Dust guard trim The dust guard trim prevents dust from depositing on the upper edge of the door and in the gap between the door and the horizontal enclosure section. The integral transparent plastic is a simple way of adding individual labelling or branding to the enclosure module.	 Wall bracket For enclosures with a low depth or heavy equipment in the door or swing frame, the wall brackets provide stability.
	Pressure stopper The pressure stopper allows retrospective fitting of a pressure relief function to comply with health and safety regulations for arc-proofing to IEC/TR 61 641.	 Punched section with mounting flange Standard punched sections may also be used to support the roof and side panels. This simplifies engineering and assembly, and relieves pressure on the parts warehouse.
	 Top-mounting module The top-mounting module quickly and easily creates 200 mm extra space in the height for busbar systems across enclosures, or for a cable chamber in the roof space. The base/plinth system VX can also be used for simple cable routing and paneling.	

Roof

Dust guard trim

To protect against dust deposits on the upper edge of the door and between the door and upper horizontal enclosure section. The dust guard trim provides space for texts or company logos.

Colour:

- RAL 7035

Supply includes:

- Clear plastic strip for text labels (height 29.5 mm)
- Assembly parts

Pressure stoppers for roof plate

For converting the IP55 roof plate into a roof plate with pressure relief function. The pressure relief function is essential for compliance with health and safety regulations for arc-proofing to IEC/TR 61 641. After fitting the pressure stopper, a protection category of IP54 is achieved.

Material:

- Polyamide

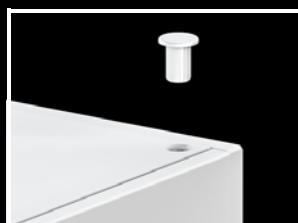

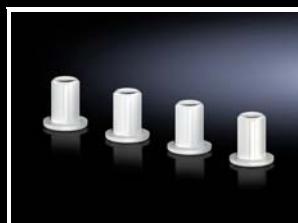

Supply includes:

- 4 warning stickers
- Including seal

Packs of	Model No.
4 pc(s).	9674.790

Note:

- 2 pressure stoppers and 1 warning sticker are required for one roof plate
 - The arc-proofing compliance limits are dependent on the busbar system used
 - The arc fault kits 9686.400 – 9686.430 are suitable for achieving arc flash class A (personal protection) and B (human safety and protection of equipment) to IEC/TR 61 641.
- Further information can be found on the Internet.

Cable entry gland for roof plate

For simple, secure cable entry in the roof zone.
External dimensions: 250 x 160 mm

Colour:

- RAL 7035

Protection category IP to IEC 60 529:

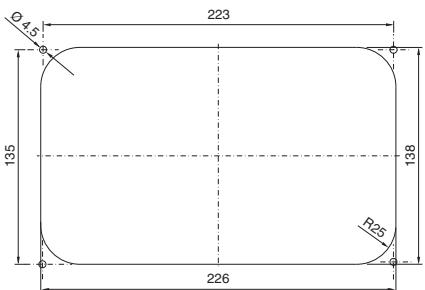

- IP55

Supply includes:

- Including seal

Cut-out dimensions for 9665.750 to 9665.785

Mounting plates

25

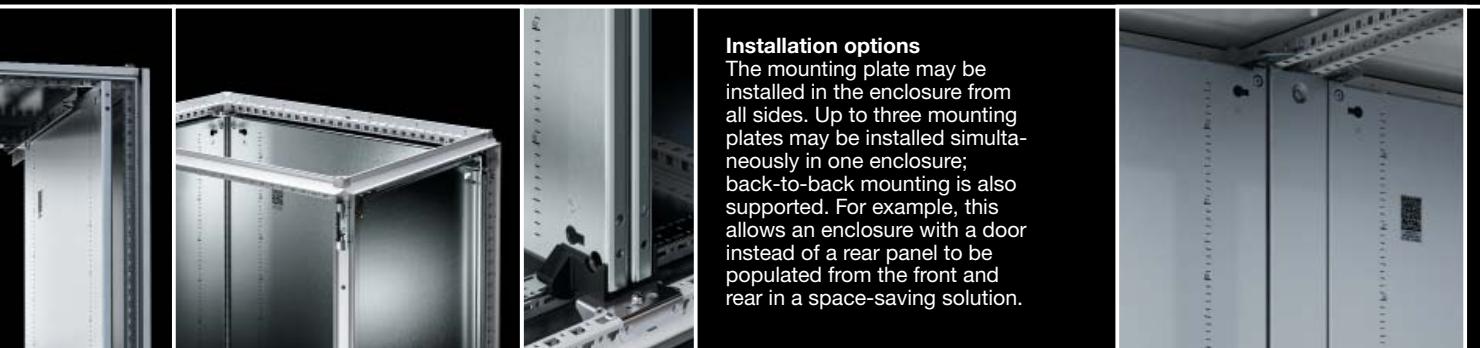

Earthing

The keyhole opening allows simple retrospective earthing of the mounting plate from the front while in an installed state, without having to hold a screw or nut behind the mounting plate.

Transportation

For transportation purposes, or with high dynamic loads, the mounting plate can easily be additionally secured at the top and bottom with a screw attachment.

Installation options

The mounting plate may be installed in the enclosure from all sides. Up to three mounting plates may be installed simultaneously in one enclosure; back-to-back mounting is also supported. For example, this allows an enclosure with a door instead of a rear panel to be populated from the front and rear in a space-saving solution.

Depth adjustment

The mounting plate supports straightforward depth adjustment on a 25 pitch pattern using slide blocks and the patented mounting plate attachment at the top. Using a special installation kit, the mounting plate may be offset by a further 20 mm in the depth, and populated mounting plates may also be installed from the rear.

System divider

Divides the enclosure width into two zones. For example, this allows mounting plates, cable clamp rails or swing frames from 600 mm wide enclosures to be fitted in 1200 mm wide enclosures.

Mounting surface

In the rearmost installation position, the mounting plate forms a continuous installation space with the enclosure frame. In a set forward position, a separate mounting plate infill performs this role.

Partial mounting plates

The partial mounting plates quickly and flexibly create additional mounting surfaces at all enclosure levels. They may be used as a component shelf, and can also be hinged to retain access to the mounting level behind. May even be used on the tubular door frame. The keyhole attachment ensures extremely fast, safe assembly by simply locating into position and securing.

Interior installation

Mounting plates

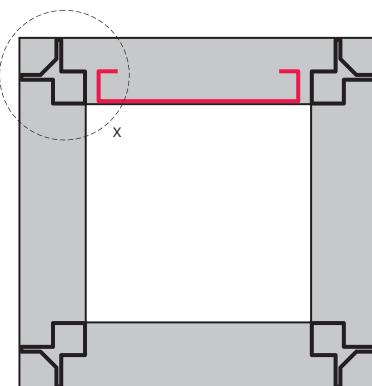

Mounting positions

The mounting plate included with the supply, together with the

- Mounting plate infills
- Partial mounting plates
- etc.

available as accessories, lend themselves to extremely flexible use inside the enclosure, enabling you to achieve the ideal mounting position for every application.

Detail X	Mounting position Mounting plate	Function	Benefits
	Flush with the enclosure frame Position: ±0 mm	Included for enclosures with mounting plate.	The mounting plate and enclosure frame create a continuous mounting surface at the same depth. Simple top-mounting of the enclosure frame is supported, and can be used for continuous enclosure-to-enclosure cable trunking, support rails etc. The usable mounting width is enlarged by up to 25%, depending on the enclo- sure selection.
	Set forward from the enclosure frame on a 25 mm pitch pattern Position: -25 mm -50 mm -75 mm etc.	Included for enclosures with mounting plate.	Creates space behind the mounting plate for the installation of compon- ents or for cable routing. Ideal for moving the centre of gravity of instal- led equipment closer to the centre of the enclosure, or when a short dis- tance from the door is required, e.g. in order to fit a master switch. The distance between the mounting plate and the door is reduced on a 25 mm pitch pattern compared with the flush mounting position.
	Set back behind the enclosure frame Position: +20 mm	Via multi-functional installation kit for mount- ing plate 8617.370, see page 154	For maximising the installation depth in the enclosure. Particularly useful in situations where deep installations in a single enclosure, such as fre- quency converters, would increase the depth for the entire bayed enclo- sure suite. The installation depth in the enclosure is increased by 20 mm compared with the flush mounting position.

Interior installation

Mounting plates

Mounting plate infill

For a continuous mounting surface in bayed suites where the mounting plate is set forward.

Material:

- Sheet steel, 2 mm

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

For enclosure height mm	Packs of	Model No.
1800	1 pc(s).	4590.700
2000	1 pc(s).	4591.700

Detail	Mounting position of mounting plate	Benefits
	Set forward from the enclosure frame on a 25 mm pitch pattern Position: -25 mm -50 mm -75 mm etc.	The usable mounting width is enlar- ged by up to 25%, depending on the enclosure selection.

Mounting plate attachment

Type A

For additional clamping and to reduce potential vibration of the mounting plate.

Simple mounting directly on the enclosure frame. During installation, the mounting plate latches automatically into the mounting plate attachment. The mounting plate attachment type A keeps the front of the mounting plate completely free for unrestricted use. Populated mounting plates may be mounted from the front without dismantling the rear panel.

Packs of	Model No.
5 pc(s).	8617.353

Material:

- Spring steel

Supply includes:

- Safety clip
- Assembly parts

Detail	Mounting position of mounting plate	Installation option	Attachment to the mounting plate
	Flush with the enclosure frame Position: ±0 mm, fitted at the rear	Fitted on the left and right of the mounting plate	Latched home
	Flush with the enclosure frame Position: ±0 mm, fitted at the front	Fitted on the left and right of the mounting plate at half height	Latched home

Interior installation

Mounting plates

Mounting plate attachment

Type B

For additional clamping and to reduce potential vibration of the mounting plate.

Simple mounting directly on the enclosure frame or on the punched section with mounting flange 23 x 64 mm. The mounting plate may optionally be screw-fastened with the mounting plate attachment, or form-fit connected. Depending on the installation situation, the mounting plate attachment type B either minimally surrounds the mounting plate, or keeps the front of the mounting plate completely free for unrestricted use. May be mounted from the front or the rear, depending on the situation.

Packs of	Model No.
10 pc(s).	

Material:

- Sheet steel

Surface finish:

- Zinc-plated, passivated

Supply includes:

- Assembly parts

Accessories:

- Punched section with mounting flange 23 x 64 mm for the inner level, see page 164

	All-round between the enclosure and mounting plate in any quantity. One punched section with mounting flange 23 x 64 mm to match the enclosure depth is required for each mounting plate attachment.		

Interior installation

Mounting plates

Mounting plate attachment

Type C

For additional clamping and to reduce potential vibration of the mounting plate.

Simple mounting directly on the enclosure frame. The mounting plate may be form-fit connected and clamped with the mounting plate attachment. The mounting plate attachment type C keeps the front of the mounting plate completely free for unrestricted use. With the mounting plate installed and the rear panel dismantled, it can be fitted from the rear.

Packs of	Model No.
10 pc(s).	8617.352

Material:

- Sheet steel

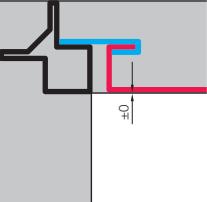

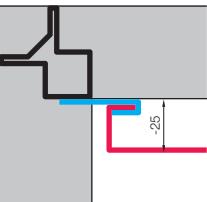

Surface finish:

- Zinc-plated, passivated

Supply includes:

- Assembly parts

Detail	Mounting position of mounting plate	Installation option	Attachment to the mounting plate

1200	2 pc(s).	8617.402

Cross-brace

for mounting plates

Additional horizontal rigidity for vibration damping and/or retrospective stabilisation of wide mounting plates. This brace may also be used as an attachment aid for heavy components.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- 2 sections

For enclosure width mm	Model No.
1200	4333.120
1600	4333.160
1800	4333.180

Interior installation

Mounting plates

Partial mounting plate

To accommodate additional components inside the enclosure. Partial mounting plates are extremely versatile, providing a platform for a diverse range of applications. For optional installation either upright as a vertical mounting surface, or flat as a horizontal base. For attachment either directly to the enclosure section or, with a set-forward construction, for example, to any mounting level in the enclosure using punched sections with mounting flanges. For multi-level installation one behind the other, partial mounting plates may be vertically hinged, via hinge attachment 8617.650, to allow rapid access to the levels behind.

Material:

- Sheet steel, 2.5 mm

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

Note:

- Depending on the mounting situation, additional parts such as punched sections with mounting flanges may be required, see installation example on page 156

Accessories:

- Punched section with mounting flange for the inner and outer level, see page 164
- Hinge attachment 8617.650, see page 157

Installation examples:

See page 156

Interior installation

Mounting plates

Installation examples

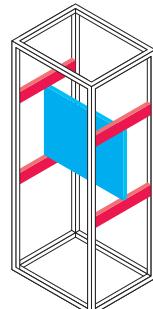

Full installation in the width/depth

Choose a partial mounting plate 100 mm smaller than the nominal size of the enclosure. For example, a partial mounting plate with dimensions 500 x 700 mm can be installed in enclosures with nominal dimensions of 600 and 800 mm.

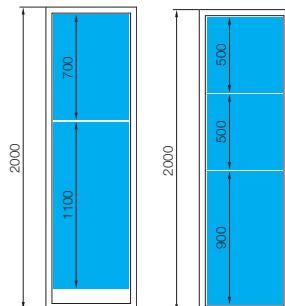

Full installation, set forward in the width/depth

For set-forward installation, punched sections with mounting flanges are required for the inner or outer mounting level, according to the enclosure depth.

Full installation in the height

The sum total of partial mounting plates should be 100 mm smaller than the nominal size of the enclosure. For example, in a 2000 mm high enclosure, the sum total of partial mounting plates should not exceed 1900 mm.

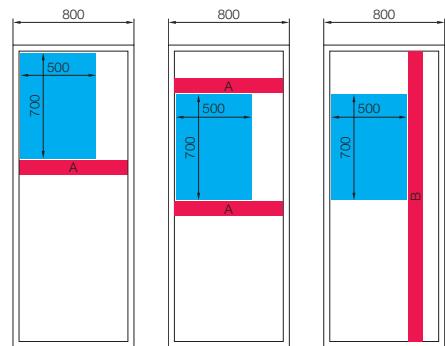

Partial installation

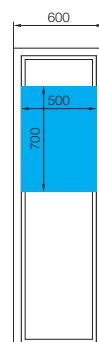

Also required:

- Punched section with mounting flange 23 x 64 mm (**A**) to match the enclosure width or depth, see page 164
- Punched section with mounting flange 23 x 64 mm (**B**) to match the enclosure height, see page 164

Door installation

Choose a partial mounting plate 100 mm smaller than the nominal size of the enclosure. For example, a partial mounting plate with dimensions 500 x 700 mm can be installed on the tubular door frame of enclosures with a nominal size of 600 mm.

Interior installation

Mounting plates

Hinge attachment

for partial mounting plate

In conjunction with the mounting kit for swing frames, small, the partial mounting plate can be hinged to allow access to the components behind it for servicing.

Installation options:

- At the front, on the frame section
- Set back, in the enclosure depth
- At the side, in conjunction with the hinged side panel

Material:

- Steel

Surface finish:

- Zinc-plated

Supply includes:

Outer mounting level

Inner mounting level

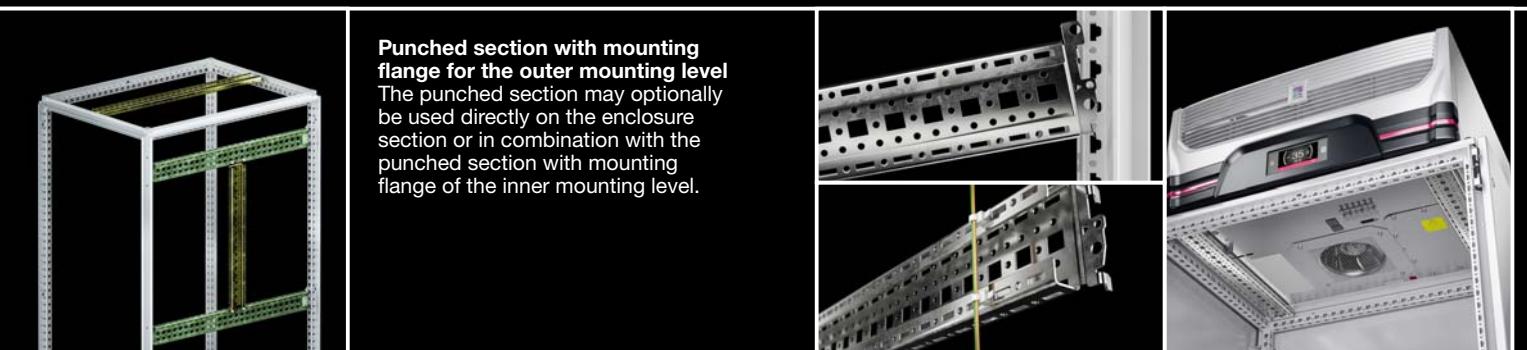

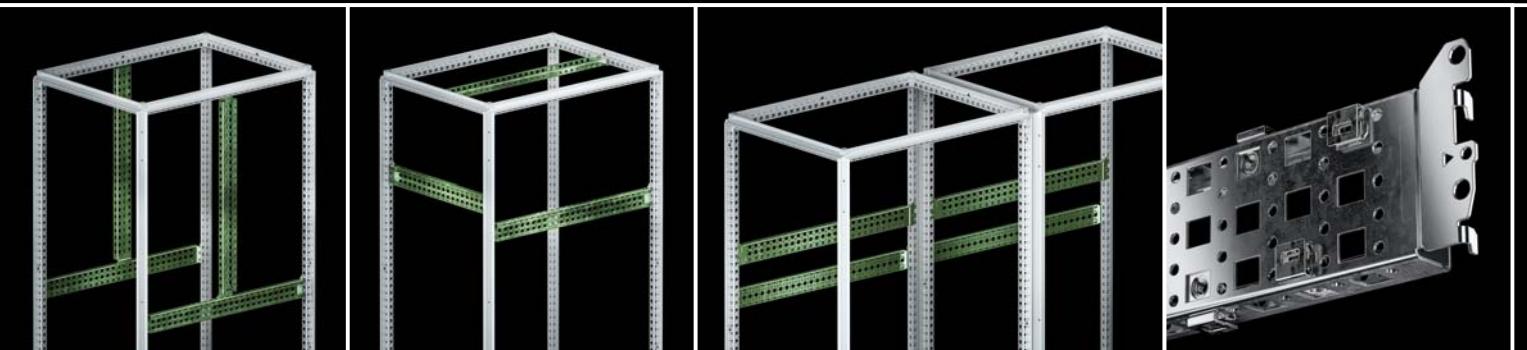

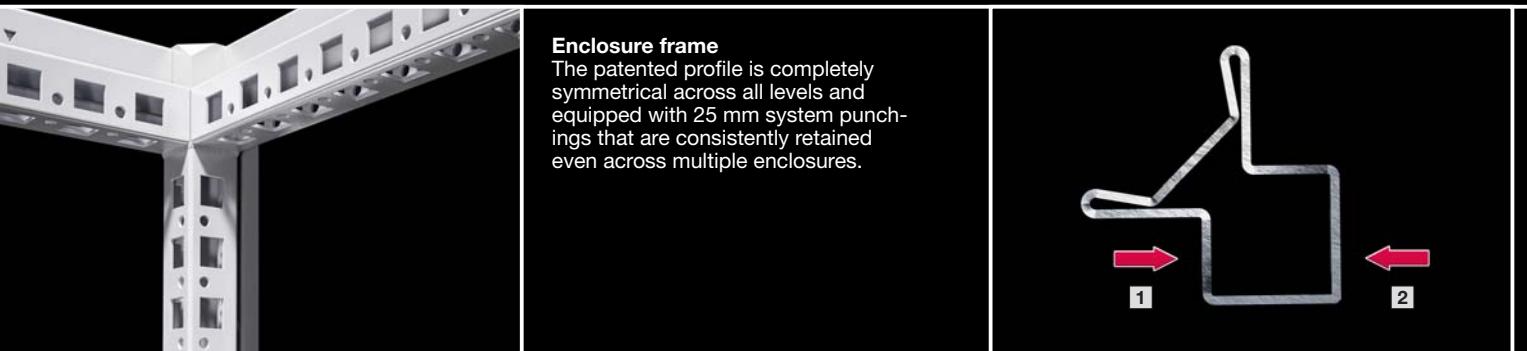

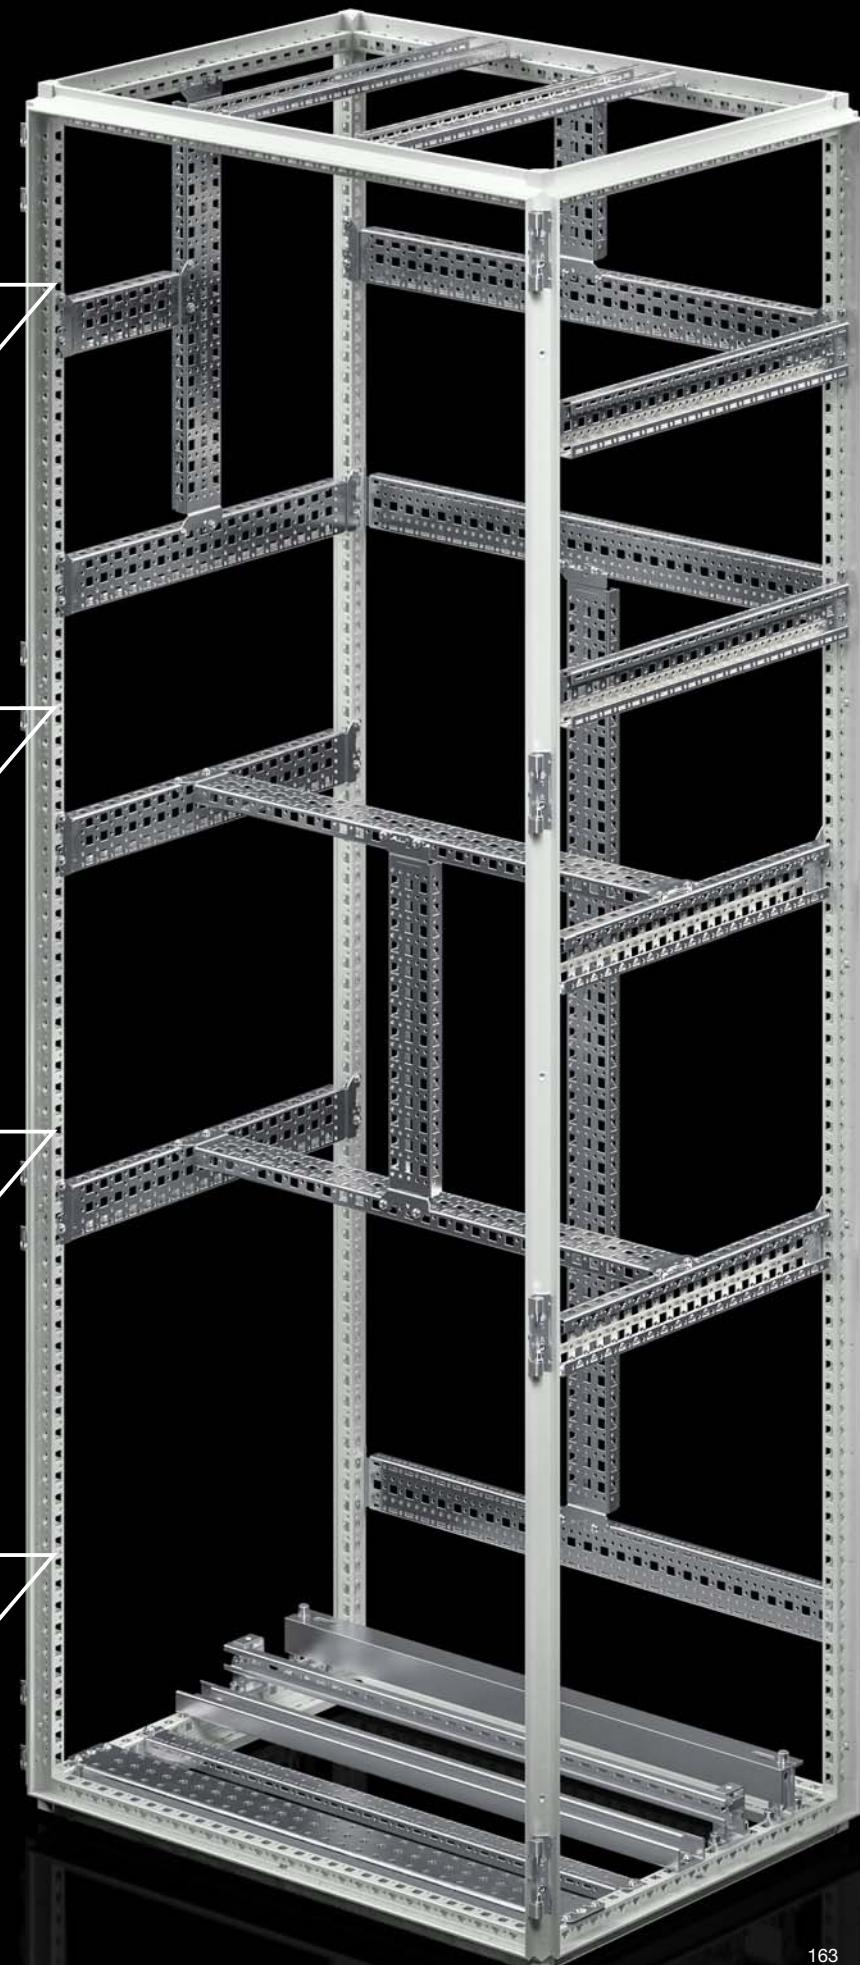

1 Partial assembly plate

2 Punched section with mounting flange, 23 x 64 mm

Rail systems

**Two mounting levels**

The two mounting levels, spaced 25 mm apart, allow optimum flexibility and maximise the space available for interior installation.

- [1] Outer mounting level
- [2] Inner mounting level

Punched section with mounting flange for the inner mounting level

The punched section with mounting flange supports system configuration on a 25 mm pitch pattern across all levels of the VX25, even beyond enclosure boundaries. With the system punchings, cage nuts up to M8 can be used across three levels. This allows you to securely fasten your own components with metric screws. Direct mounting on the horizontal enclosure section is also supported.

Punched section with mounting flange for the outer mounting level

The punched section is easily retro-fitted, even with the side panel already installed, because the rounded edges allow it to be screwed in. The additional C-fold may be used to support heavy installed equipment on the side panel or roof, or for attaching cable connectors.

Punched section with mounting flange, 14 x 39 mm

The punched section enables individual interior installation on the tubular door frame provided as standard.

Interior installation

Rail systems

Punched section with mounting flange, 18 x 64 mm

For variable, individual interior installation of the enclosure frame on the outer mounting level. Simply locate into the system punchings from the outside and screw-fasten. System punchings on all four sides.

Installation options:

- On the outer mounting level, on the enclosure section
- On the outer mounting level, between two punched sections with mounting flanges 23 x 64 mm

For heavy installed equipment such as base isolators or transformers.

Installation options:

- On the inner mounting level, on the enclosure section

Material:

- Steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

For enclosure width mm	Packs of	Model No.
600	2 pc(s).	8612.960
800	2 pc(s).	8612.980

Support rail TS 35/15

For snap-mounting terminals or other components with a snap-in system to EN 60 715.

For enclosure width/depth mm	Support rail length mm	Packs of	Model No.
500	455	6 pc(s).	4933.000
600	555	6 pc(s).	4934.000
800	755	6 pc(s).	4935.000
1200	1155	6 pc(s).	4937.000
-	2000	6 pc(s.).	2313.150

Support rail TS 35/7.5

For snap-mounting terminals or other components with a snap-in system to EN 60 715.

For enclosure width/depth mm	Support rail length mm	Packs of	Model No.
-	2000	6 pc(s.).	2313.750

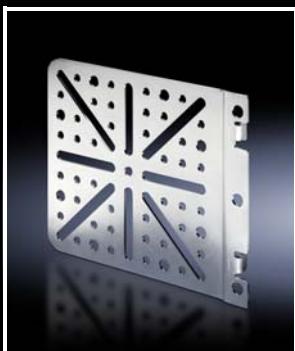

Mounting clip

For fast, secure attachment of:

- Cable ducts
- Mounting plates
- Mounting angles

on support rail TS 35/7.5 and 35/15 to EN 60 715.
Simply pre-assemble the mounting clip on the part to be installed, then snap into position on the support rail.

Packs of	Model No.
30 pc(s.).	2309.000

Mounting plate

Locatable

Installation options:

- On the inner and outer mounting level, on the enclosure section
- On punched sections with mounting flanges

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly screws

Packs of	Model No.
4 pc(s.).	8612.400

Accessories:

- Screws, see page 172
- Cable ties 2597.000, see page 205

Interior installation

Rail systems

Mounting plate

Screw-fastened, large

Installation options:

- On all enclosures and mounting parts with system punchings on a 25 mm pitch pattern

Material:

- Sheet steel

Surface finish:

- Zinc-plated

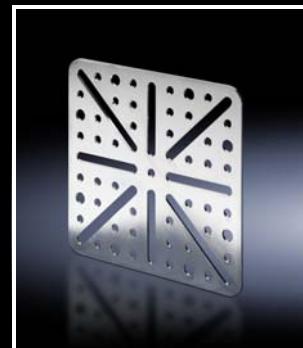

Supply includes:

- Assembly screws

Packs of	Model No.
4 pc(s).	8612.410

 **Accessories:**

- Screws, see page 172
- Cable ties 2597.000, see page 205

Mounting plate

Screw-fastened, small

Installation options:

- On all enclosures and mounting parts with system punchings on a 25 mm pitch pattern

Material:

- Sheet steel

Surface finish:

- Zinc-plated

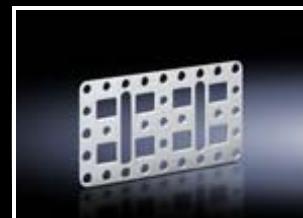

Supply includes:

- Assembly screws

Packs of	Model No.
4 pc(s).	4532.000

 **Accessories:**

- Screws, see page 172
- Cable ties 2597.000, see page 205

Mounting plate

with integral top-hat rail

For direct snap-mounting of components such as speed control, enclosure internal thermostat and hygrostat.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

Packs of	Model No.
1 pc(s).	7526.964

Mounting bracket

Installation options:

- On all enclosures and mounting parts with system punchings on a 25 mm pitch pattern

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly screws

Packs of	Model No.
4 pc(s).	4597.000

 **Accessories:**

- Screws, see page 172
- Cable ties 2597.000, see page 205

Interior installation

Assembly components

Bracket/spacer

For the attachment of C rails, punched rails or cable clamp rails (angle piece). On the sides, to accommodate square sections or tubes (\varnothing 20 mm). Attachment points with M8 thread.

Installation options:

- On the vertical and horizontal enclosure section
- On punched sections with mounting flanges for the inner mounting level

Material:

- Die-cast zinc

Supply includes:

- 1 pc(s). =
 - 1 bracket or spacer
 - 2 screws M8 x 16 mm
 - 2 spring lock washers,
 - 2 cage nuts M8
 - 2 screws

Packs of	Model No.
6 pc(s).	4199.000

Accessories:

- Angle piece 4134.000, see page 170

Quick-assembly block

For a variety of installation options.

Installation options:

- On the vertical and horizontal enclosure section
- On punched sections with mounting flanges for the inner mounting level

Material:

- Die-cast zinc

Supply includes:

- 12 quick-assembly blocks
- 12 threaded blocks M8
- 24 screws M8 x 12 mm
- 24 square nuts M8

Packs of	Model No.
12 pc(s).	4133.000

Accessories:

- Angle piece 4134.000, see page 170

Angle piece

For assembling mounting surfaces with a 45° incline.

With two mounting options as standard:

- Conductively connected to the subsurface
- Insulated from the mounting surface

Installation options:

- On the vertical and horizontal enclosure section
- On punched sections with mounting flanges for the inner mounting level
- On the bracket/spacer
- On the quick-assembly block

Material:

- Angle pieces: Die-cast zinc
- Cover section: Plastic

Supply includes:

- 1 pc(s).
 - 1 angle piece
 - 1 insulating piece
 - 1 insulating screw
 - 2 assembly screws
 - 1 threaded block M8

Packs of	Model No.
12 pc(s).	4134.000

Interior installation

Assembly components

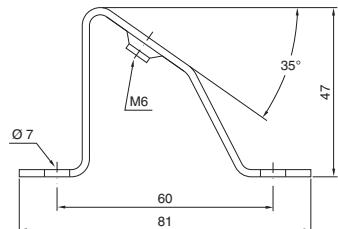

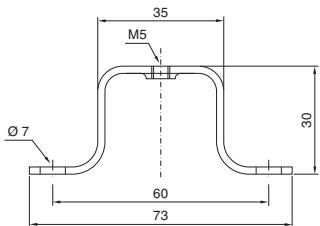

Rail mounting bracket

For individual mounting of rails at a distance from the mounting surface.

Material:

- Sheet steel, zinc-plated

Rail mounting bracket	Packs of	Model No.
Flat	20 pc(s).	2365.000
Inclined	20 pc(s).	2366.000

Cage nut

For all-round metric mounting on the enclosure section.

Benefits:

- For all-round mounting on the enclosure section
- The compression spring, designed as an insertion aid, ensures reliable mechanical and electrical connection in the system punchings.
- Simply slides in from the side
- Safely and easily released with a screwdriver

Thread	Packs of	Model No.
M6	20 pc(s).	4164.500
M8	20 pc(s).	4165.500

Installation options:

- On the vertical and horizontal enclosure section
- On punched sections with mounting flanges, 23 x 64 mm
- On punched sections with mounting flanges, 23 x 89 mm, stainless steel

Threaded block

For all-round metric mounting on the enclosure section. With snap-off insertion aid, made from die-cast zinc.

Installation options:

- On the vertical and horizontal enclosure section
- On punched sections with mounting flanges, 23 x 64 mm
- On punched sections with mounting flanges, 23 x 89 mm, stainless steel

Thread	Packs of	Model No.
M6	50 pc(s).	4162.000
M8	50 pc(s).	4163.000

Interior installation

Assembly components

Multi-tooth screw

M6 x 12 to fit:

- Cage nuts 4164.500
- U nuts 4179.000
- Threaded blocks 4162.000

M8 x 12 to fit:

- Cage nuts 4165.500
- U nuts 4180.000
- Threaded blocks 4163.000

Metal multi-tooth screw

For the round holes Ø 4.5 mm or 4.7 mm in the enclosure section, punched rails and punched sections without mounting flanges.

Multi-tooth drive for optimum transmission of torques, an extended tool life and increased safety and reliability when tightening and loosening screw connections.

Type of screw	Size mm	Packs of	ModelNo.
Multi-tooth screws	M6 x 12 M8 x 12	300 pc(s). 300 pc(s).	2504.500 2504.800
Metal multi-tooth screws	5.5 x 13	300 pc(s).	2486.600
Metal multi-tooth screws for stainless steel	5 x 13	300 pc(s).	2486.400
Self-tapping screws (hex screws)	M5 x 10	500 pc(s).	2504.000
Self-tapping screws	ST 4.8 x 16	300 pc(s).	2487.000

Self-tapping screw

For the round holes Ø 4.5 mm or 4.7 mm in the enclosure section, punched rails and punched sections without mounting flanges.

Self-tapping screw

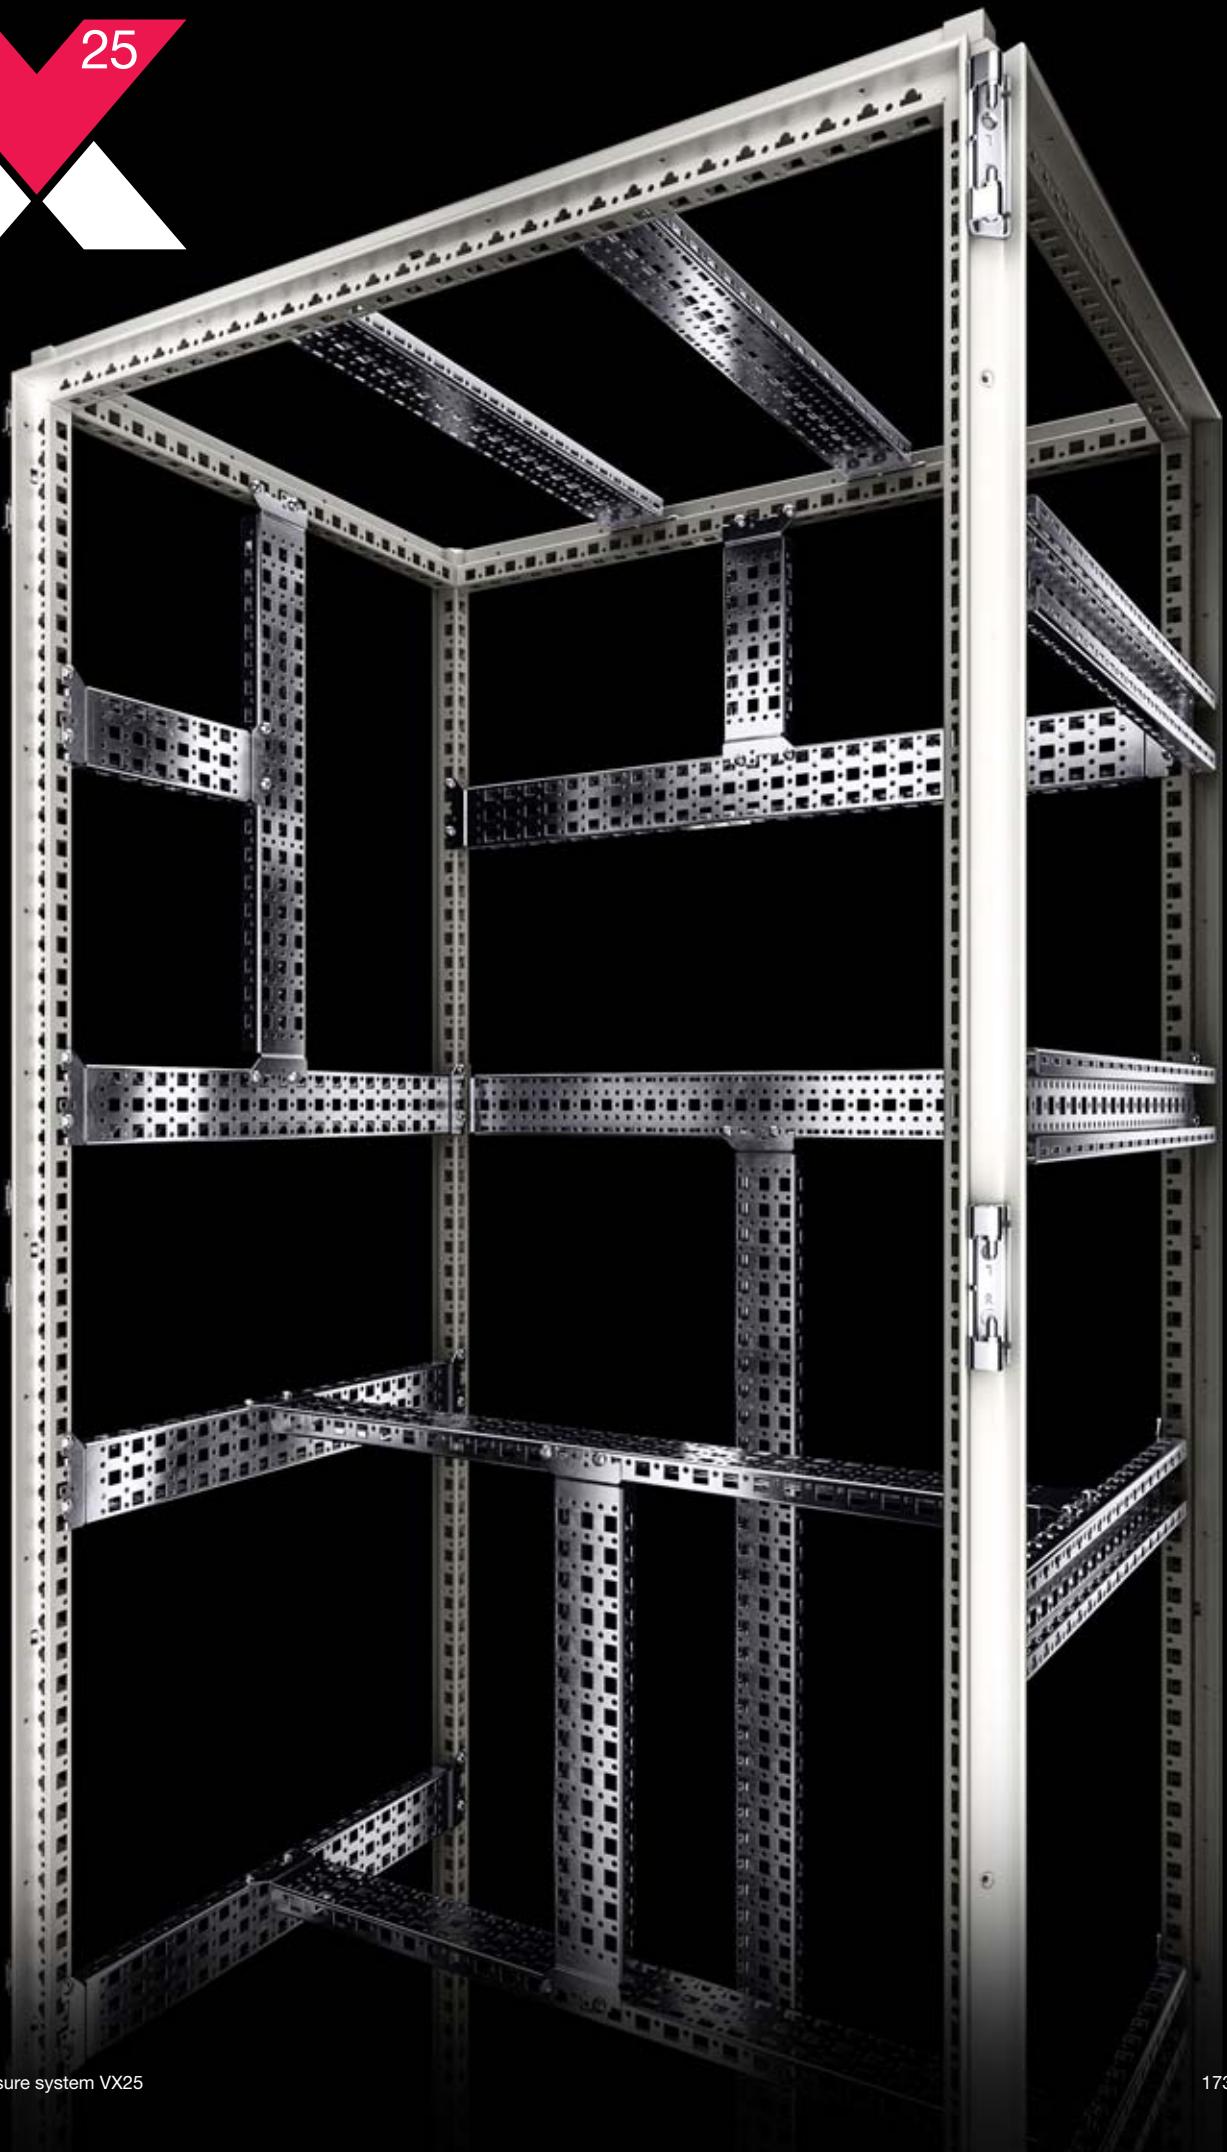

Mark, drill and tighten in a single operation using electric or pneumatic tools.

For metal thickness: 0.8 – 3 mm

Length: 16 mm

Usable length: ± 9.5 mm

Width across flats: 8 mm

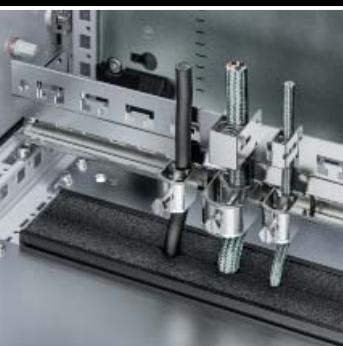

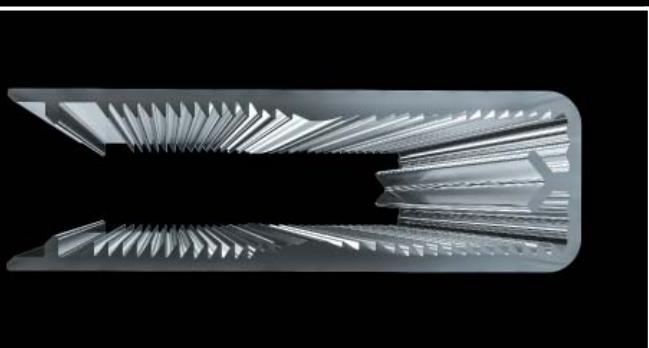

Interior installation

25

Component shelves

The component shelves for frame attachment enable the fast creation of support surfaces for devices; if necessary, they may also be equipped with telescopic slides. The shelves are slotted to support natural convection inside the enclosure. Additionally, the devices may be screw-fastened directly to these punchings to prevent slipping; no machining is required. The optional hinged cable support ensures secure cable routing into the enclosure.

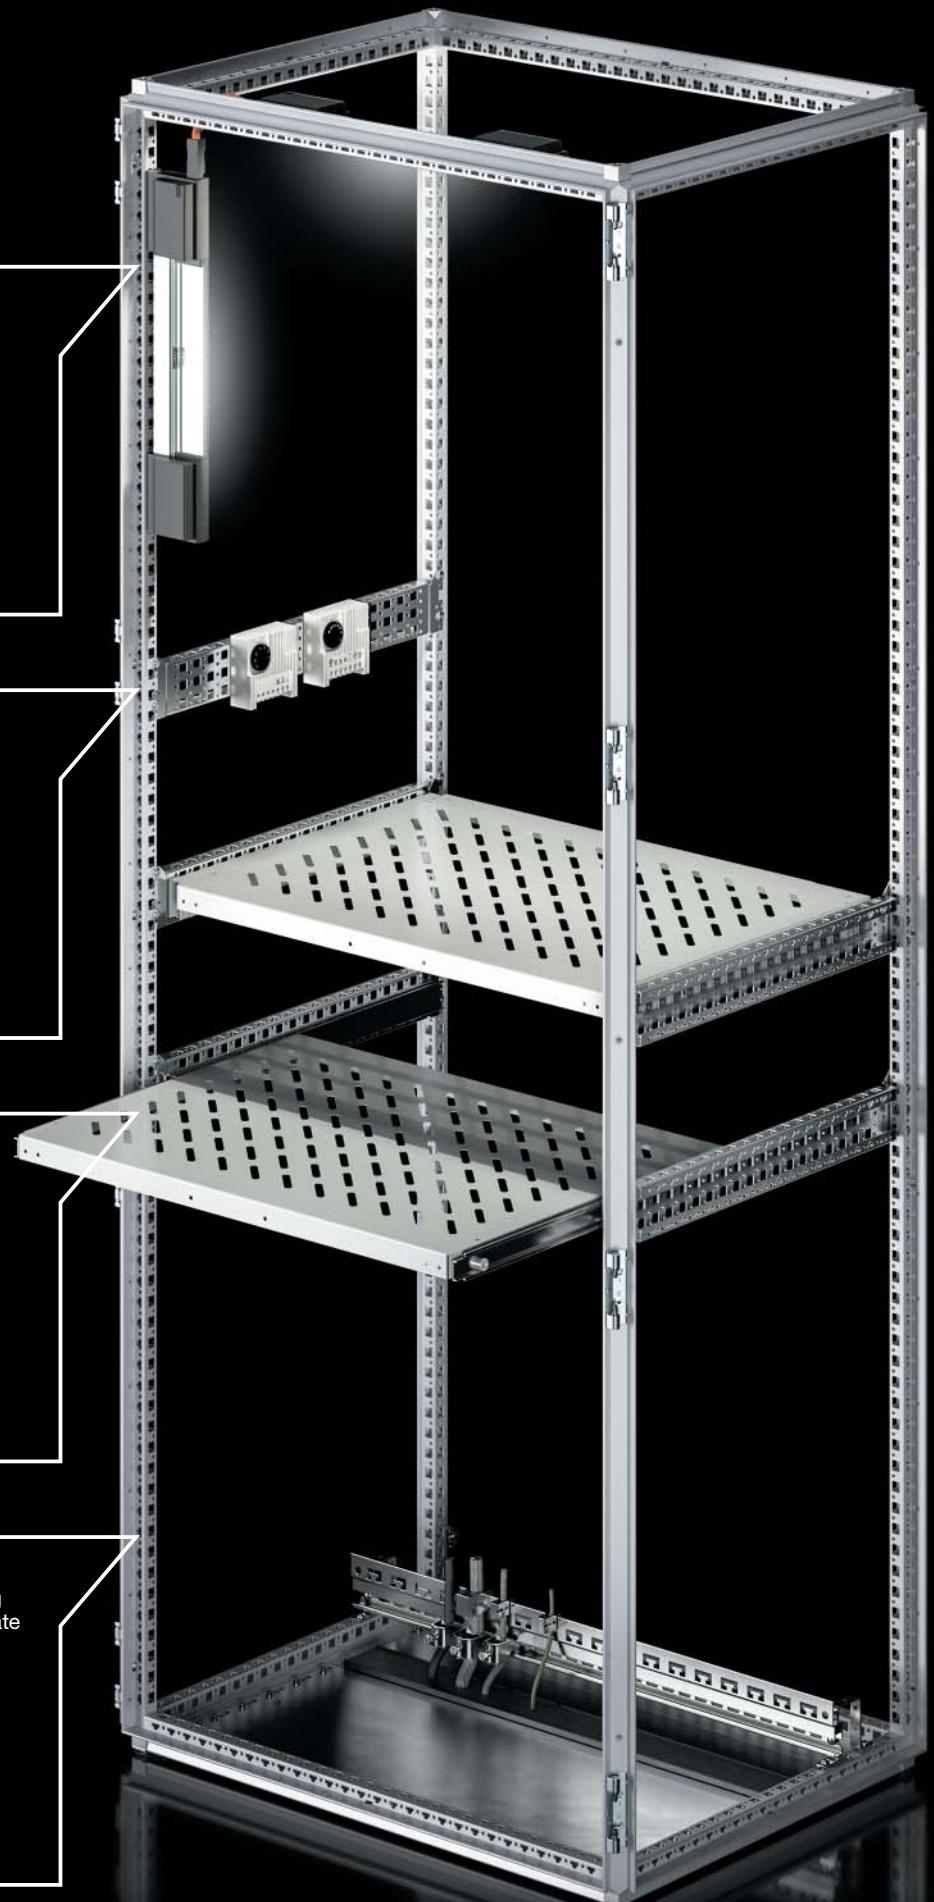

EMC protection

The level of EMC protection in the VX25 baying enclosure system is already high, but can be further significantly improved by adopting simple measures for cable entry. The rail for EMC shielding brackets provides strain relief as well as EMC contacting of inserted cables. The rail can be fitted on the horizontal or vertical enclosure section, as well as directly onto the mounting plate.

EMC cable glands

The EMC cable gland can be used for EMC-compatible insertion of individual cables. The lock nut creates a conductive connection with the enclosure. Cable glands can be used on all suitable surfaces on the enclosure.

**LED system light**

The LED system light is specifically designed to provide optimum illumination of the entire enclosure, when fitted both horizontally and vertically. Two different Fresnel structures ensure that all the light remains inside the enclosure, illuminating every last corner. For tool-free mounting directly into the system punchings using a system of clip-in hooks.

Easy connection

Connection is just as straightforward as assembly. The rotating connectors allow user-friendly connection, even in tight spaces. The wide ranging power supply unit means that the light can be used anywhere in the world.

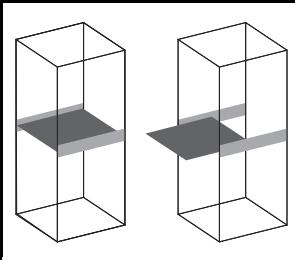

Thermostat/hygrostat
For optimum monitoring and adjustment of climate control.

Interior installation

Component shelves for frame attachment

Component shelf for frame attachment

for enclosure width 600 and 800 mm

For installation in enclosures **without** 482.6 mm (19") accommodation.
Max. depth of component shelves =
Enclosure depth - 100 mm.

Technical specifications:

- Mounting bolts or mounting rails may be installed on a 25 mm pitch pattern in the enclosure depth
- Mounting hole for handles provided.
- Component shelf, vented

Material:

- Sheet steel

Surface finish:

- Spray-finished

Colour:

- RAL 7035

Supply includes:

- Assembly parts

LED system light

Mounting kit magnet

for LED system light

For sticking onto the rear of lights without a socket.

Packs of	Model No.
2 pc(s).	2500.490

Socket box

for LED system light

In combination with the LED system light, the socket box creates a flexible modular system for international use.

Benefits:

- Identical connection accessories as for LED system light
- Cascadable with LED system light
- Supports flexible installation throughout the entire enclosure and on the tubular door frame
- No additional wiring required, thanks to simple connection technology and integration of the LED system light into the circuit

Material:

- Plastic

Colour:

- RAL 7016

Supply includes:

- Assembly parts

Configuration examples:

See from page 1020.

Interior installation

Climate control accessories

Thermostat

Enclosure internal thermostat

Particularly suitable for controlling fans, heaters and heat exchangers, this thermostat can also be used as a signal generator for monitoring the enclosure internal temperature.

Benefits:

- Time-saving connection technique using a terminal strip with a screw connection from the outside
- Flexible mounting on a vertical or horizontal 35 mm support rail to EN 50 022, and snap fastening in the enclosure section or on the mounting plate using the supplied adaptor

Technical specifications:

- Bi-metal controller as a temperature-sensitive element with thermal feedback
- Contact population: Single-pole change-over contact as a quick-break contact
- Permissible contact load:
Category 5 – 3 (heating):
AC 10 (4) A (inductive load at $\cos \phi = 0.6$)/
category 5 – 4 (cooling): AC 5 (4) A
(inductive load at $\cos \phi = 0.6$)/DC = max. 30 W
- Switching difference: approx. $1\text{ K} \pm 0.8\text{ K}$

Colour:

- RAL 7035

Accessories:

- Bottom-mounted adaptor, see Cat. 36, page 548
- Mounting plate, see page 168

W x H x D mm	Rated operating voltage V, ~	Setting range	Packs of	Model No.

Hygrostat

Activates the heater and/or fan when a preset relative humidity inside the enclosure is exceeded. This raises the relative humidity above the dew point and prevents condensation on assemblies and electronic components.

Benefits:

- Time-saving connection technique using a terminal strip with a screw connection from the outside
- Flexible mounting on a vertical or horizontal 35 mm support rail to EN 50 022, and snap fastening in the enclosure section or on the mounting plate using the supplied adaptor

Technical specifications:

- Contact population: Single-pole change-over contact as a quick-break contact
- Permissible contact load: AC ~ 5 (0.2) A (inductive load at $\cos \phi = 0.6$)/DC = max. 20 W
- Setting range: 50 – 100% relative humidity
- Switching difference: approx. 4%

Colour:

- RAL 7035

Accessories:

- Bottom-mounted adaptor, see Cat. 36, page 548
- Mounting plate, see page 168

- 8 m

Packs of	Model No.
1 pc(s).	8800.695

EMC divider panel seal

With bayed EMC enclosure systems and when using a zinc-plated divider panel, this seal ensures optimum contact and shield attenuation.

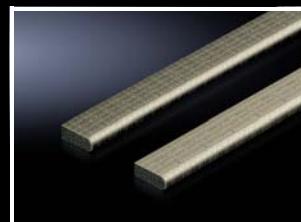

Material:

- PU foam with electrically conductive sheathing

Supply includes:

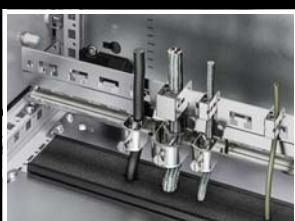

- 6 m

Packs of	Model No.
1 pc(s).	4348.500

Interior installation

EMC

Rail

for EMC shielding bracket and strain relief

Combined rail for strain relief and EMC contacting of inserted cables.

Design:

- C rail to accommodate cable clamps
- T-head cut-outs on a 40 mm pitch pattern for cable clamping using cable ties

Benefits:

- Additional contacting on the left or right of the rail via existing holes (9 mm diameter)
- Prepared for tool-free mounting of EMC shielding brackets

Installation options:

- On the horizontal/vertical enclosure section
- On the mounting plate, may also be fitted without a retaining bracket

Material:

- Extruded aluminium section

Surface finish:

- Chrome-free passivated

Supply includes:

- 1 rail
- 2 retaining brackets
- Assembly parts

For enclosure width mm	Length mm	Packs of	Model No.

¹⁾ For one enclosure half only

EMC gland plate

For shielded cables with a maximum diameter of 20 mm.

Combined EMC/IP seal provides low-resistance contact between cable shield and gland plate. For all 400, 500, 600 and 800 mm deep enclosures in conjunction with standard gland plates.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- 1 gland plate with twin hammer-head punching
- 1 sliding base plate
- 2 EMC/IP seals

Interior installation

EMC

EMC cable gland

The cable sheathing may optionally be interrupted at the contact point or removed completely inside the enclosure. The cable shielding in the enclosure is retained. The supplied lock nut cuts automatically into the paint when screwed onto spray-finished enclosure surfaces, thus creating a conductive connection.

Protection category IP to IEC 60 529:

- IP68

Cable glands, metric

Size	Cable diameter mm	Minimum shield diameter ¹⁾ mm	Packs of	Model No.
M16	4.5 – 10	3	5 pc(s).	2843.160

Interior installation

For areas at risk from earthquakes

The versions listed have been tested and meet the requirements to Telcordia GR 63-CORE. They should be seen as a comparative variable to the customer's own plant, since empty enclosures cannot be certified.

Note:

- Further information can be found in the white paper "Earthquake protection for switchgear systems" on the Internet

VX25 in earthquake zone 3 and 2 to Telcordia GR 63-CORE

VX 8806.000:

W x H x D:
800 x 2000 x 600 mm,
see page 63

Fitted with:

- Side panels, see page 102
- Base/plinth VX (corner pieces with base/plinth trim panels, front and rear and side base/plinth trim panels, 100 mm high), see page 89/90

VX25 for earthquake zone 3 to Telcordia GR 63-CORE

VX 8806.000:

W x H x D:
800 x 2000 x 600 mm,
see page 63

Fitted with:

- Side panels,
- see page 102
- Comfort handle VX,
- see page 128
- Earthquake base/plinth,
- see page 185

VX25 for earthquake zone 4 to Telcordia GR 63-CORE

VX 8806.000:

W x H x D:
800 x 2000 x 600 mm,
see page 63

Fitted with:

- Side panels, see page 102
- Comfort handle VX,
- see page 128
- Earthquake base/plinth,
- see page 185
- Earthquake kit, see page 185

Interior installation

For areas at risk from earthquakes

Earthquake base/plinth

Height 100 mm

- For stable attachment of the earthquake-resistant enclosure to the subsurface.
- External metric M6 thread for a stable connection to the subsurface from the outside

Material:

- Corner pieces: Sheet steel 5 mm
- Trim panels: Sheet steel 2 mm

Surface finish:

- Powder-coated

Colour:

- RAL 7022

Supply includes:

- 1 pc(s).
- 4 corner pieces
- 2 depth stays, 1 trim panel each front and rear fully assembled

For enclosures W x D mm	Packs of	Model No.
800 x 600	1 pc(s).	8601.860

Earthquake kit

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

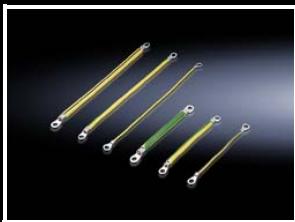

- 1 pc(s). =
 - 2 side reinforcements, bottom
 - 4 bracing struts, sides
 - 6 gusset plates
 - 2 door safety brackets
 - 4 punched sections with mounting flanges, 23 x 64 mm
 - 2 punched rails 18 x 39 mm
 - 8 angle plates
- Mounting plate attachment
- Including assembly parts

For enclosures W x H x D mm	Packs of	Model No.
800 x 2000 x 600	1 pc(s).	8618.600

Interior installation

Earthing

Earth strap

For configuring a reliable earthing connection with perfect contact

- With M8 ring terminals to match the earthing screws and bolts
- Length-optimised and ready to install

Connection	Cross-section mm ²	Length mm	Packs of	Model No.
M8	4	170	5 pc(s).	2564.000

M8	25	300	10 pc(s).	2412.325

Also required:

- Assembly parts for earth straps, see page 186

Assembly parts

for earth straps

For fastening the earth straps and earthing braids to:

- Horizontal and vertical enclosure sections
- Punched section with mounting flange, 23 x 64 mm
- Punched section without mounting flanges, 23 x 64 mm
- Gland plates

Size	Packs of	Model No.
M8	10 pc(s).	2559.000

Also required:

- For mounting on horizontal and vertical enclosure sections: Cage nuts, see page 171

PE busbar

699 mm long PE busbar with 42 pre-fitted screws, including terminal clamps up to 6 mm² (fine wire conductors), 10 mm² (single wire or multi-wire conductors) and main terminal clamp up to 35 mm².

Packs of	Model No.
1 pc(s).	2364.000

Accessories:

- Cable retainer, see page 171

Interior installation

Earthing

Contact washer

Serrated contact washers facilitate the secure connection of PE conductors, so there is no need to manually strip paint in the connection area.

Size	Packs of	Model No.
M8	100 pc(s).	2335.000

Central earthing point

For connecting

- Earth straps
 - Earthing braids
- to the vertical and horizontal enclosure sections. The connection bracket is connected to the enclosure frame with 2 screws and is securely contacted. Earth connection is via the threaded bolt M8 x 20 mm.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Packs of	Model No.
1 pc(s).	7829.200

Supply includes:

- 1 connection bracket
- 2 assembly screws for mounting on the enclosure section
- 2 serrated washers
- 1 nut M8
- 1 contact lock washer M8
- 1 washer

ISV distribution enclosures

Installation kits

ISV installation kit

For mounting ISV installation modules in the enclosure.

Material:

- Mounting frame holder: Sheet steel, zinc-plated
- Contact hazard protection: Sheet steel, spray-finished
- Contact hazard protection, sides: PVC

Supply includes:

- Mounting aid support
- Contact hazard protection
- Assembly parts

**Accessories:**

- Cross rail, see page 195
- Mounting angle, see page 195
- Depth stay, see page 195
- Equipment support connector, see page 195

Packs of	Model No.
1 pc(s).	9666.665

Wiring bracket

For tool-free attachment to the support rail 35/15 mm, for cable entry at the rear of support rail modules.

Material:

- Polyamide

Packs of	Model No.
10 pc(s).	9666.670

Depth extension frame

For extending the depth of the contact hazard protection cover. Allows unrestricted connection of NH fuse-switch disconnectors, size 00 (3-pole, 60 mm bar centre distance).

Material:

- Polystyrene

Colour:

- RAL 7035

Supply includes:

- Assembly parts

Size				Packs of	Model No.
Width unit	Height unit				
WU	mm	U	mm		
1	250	2	300	1 pc(s).	9666.680

1 WU \leq 250 mm

1 U \leq 150 mm

Note:

- NH fuse-switch disconnectors, size 00, with covers and depth extension frame cannot be used in conjunction with other equipment.

ISV distribution enclosures

Accessories

Cross rail

For horizontal sub-division of the support frame in the enclosure.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

+

Accessories:

- Equipment support connector, see page 195

Depth stay

for installation kits ISV

For attaching the installation kit in the enclosure.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

For enclosure depth mm	Packs of	Model No.
400		
500		
600	2 pc(s).	9666.732

Equipment support connector

for mounting angles ISV

- For connecting 2 mounting angles
- Increases the stability of the frame structure

Material:

- T-section: Aluminium

Supply includes:

- Assembly parts

Packs of	Model No.
4 pc(s).	9666.740

Cable management

25

The collage consists of six images arranged in a grid:

- Gland plates:** Two images showing the base assembly with gland plates and cable entry points.
- Cable duct:** Three images showing the modular base assembly with punchings, mounting holes, and a cable duct component.
- Cable clamping:** One image showing orange cables being clamped in the base/plinth area.
- Cable ties:** One image showing orange cables secured with white cable ties attached to a metal panel.
- Cable entry on surfaces:** One image showing a front panel with a sealing frame and cable entry options.
- Cable conduit and cable conduit holder:** One image showing a cable being routed through a metal frame with a crush-proof holder.

Gland plates
The modular base assembly allows completely flexible cable entry into the VX25, adapted to your individual requirements. Essential cable clamping takes place in the base/plinth area, directly above the insertion point, or on the mounting plate.

Cable duct
In addition to the DIN punchings, the mounting holes of Rittal cable ducts also have punchings on a 25 mm pitch pattern, completely eliminating the need for any machining. Components are simply screw-fastened into the round holes. The screw heads may be securely covered with an isolator cap for insulation purposes.

Cable clamping
Various cable clamping options are available and can be used identically both inside the enclosure and in the base/plinth. Relocating cable clamping into the base/plinth area frees up more mounting space inside the enclosure, rather than being lost to allow for bending radii.

Cable ties
Simple, super-fast attachment of cables to all round holes on the enclosure and punched sections. Simply clip into position.

Cable entry on surfaces
There are a number of options available, from a simple stepped collar through to a sealing frame, which also allows the insertion of pre-assembled cables with connectors.

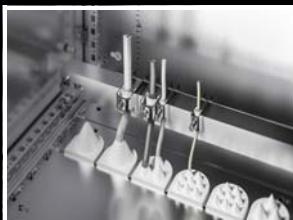

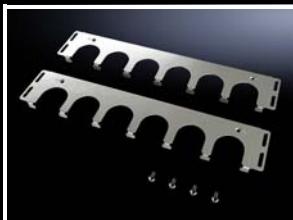

Cable conduit and cable conduit holder
Allows crush-proof cable routing to moving parts such as doors, with minimal assembly work.

Cable management

Cable management

Cable entry

Cable entry plate

For:

- Cable entry grommets
 - Connector grommets
- instead of segments from the standard divided gland plates

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Protection category IP to IEC 60 529:

- IP55 in conjunction with cable entry grommets or connector grommets

Supply includes:

- Assembly parts

Enclosure width mm	Cut-outs per plate	Packs of	Model No.
600	6	2 pc(s).	8619.800
800	8	2 pc(s).	8619.801
1000	5	4 pc(s).	8619.802
1200	6	4 pc(s).	8619.803

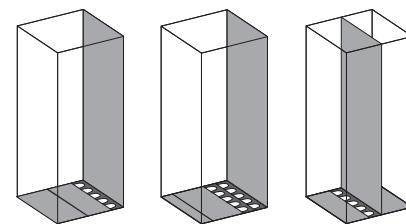

**Also required:**

- Cable entry grommet, see page 198 or
- Connector grommet, see page 198

Three examples from a wide range of possibilities

The diagrams show three examples for positioning cable entry plates instead of segments from the three-piece gland plates supplied as standard. In this way, they can be positioned to fit the mounting plate.

Thanks to the enclosure symmetry, where dimensions permit, cable entry plates may also be inserted in the enclosure depth, right and left, analogous to the gland plates.

Cable entry grommets

In conjunction with the cable entry plate, supports simple, fast sealing of cables inserted into the base area of enclosures.

Material:

- Body: Polypropylene
- Cover: Thermoplastic elastomer

Protection category IP to IEC 60 529:

- IP55 if installed correctly

Cables per grommet	Max. Ø mm	Packs of	Model No.
8	13	25 pc(s).	4316.000
3	21	25 pc(s).	4317.000
1	47	25 pc(s).	4318.000

Connector grommets

Suitable for cable diameters from 8 to 36 mm.

Material:

- Outer cover: Polypropylene covered with thermoplastic elastomer
- Seal: cellular rubber

Protection category IP to IEC 60 529:

- IP55 if installed correctly

Packs of	Model No.
10 pc(s).	4311.000

Cable management

Cable entry

Section for cable entry, centre

For top-mounting on gland plates.

Material:

- Extruded aluminium section
- Seal: PU foam
- Cross-section: 30 x 25 mm

Protection category IP to IEC 60 529:

- IP55 if installed correctly

Supply includes:

- Plug-in sections, incl. foam rubber clamp strips

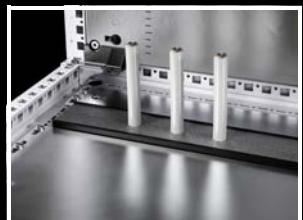

Note:

- You will need two pieces per cable entry point.
- From an enclosure width of 1000 mm, the base assembly is divided into two sections in the width. Two cable entry points (left/right) may be used.

For enclosure width mm	Packs of	Model No.

- Cable clamp rail, see page 204

Cable management

Cable gland

Cable gland, brass

Benefits:

- Because the gland and lock nut are sold together in a single pack, this saves additional ordering and storage
- Clamping membranes for even tightening and strain relief to protect the cables

Material:

- Brass
- Seal: CR/NBR

Surface finish:

- Nickel-plated

Protection category IP to IEC 60 529:

- IP68 (5 bar, 30 min.)

Approvals:

- VDE, UR, cUR

Cable management

Cable gland

Sealing frame, modular

For universal use on all surfaces and walls, for inserting pre-assembled cables with connectors. Can also be mounted onto 24-pole or 16-pole connector cut-outs.

Material:

- Plastic

Colour:

- Black

Protection category IP to IEC 60 529:

- IP66

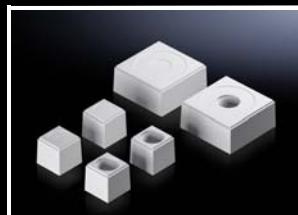

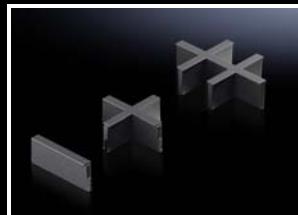

Supply includes:

- Sealing frame
- Locking frame

Number of small seal inserts	For cut-out mm	Model No.
10	113.5 x 46 (24-pole)	2583.100
8	91 x 46 (16-pole)	2583.080

Also required:

- Inlay for plastic gland plates, modular and sealing frame, modular, see page 201
- Seal inserts for cable gland plates, modular and sealing frame, modular, see page 201

Inlay

for plastic gland plate, modular and sealing frame, modular

Individual inserts to subdivide the cut-outs in the modular plastic gland plate and the modular sealing frame.

Material:

- Plastic

Colour:

- Black

482.6 mm (19") installation system

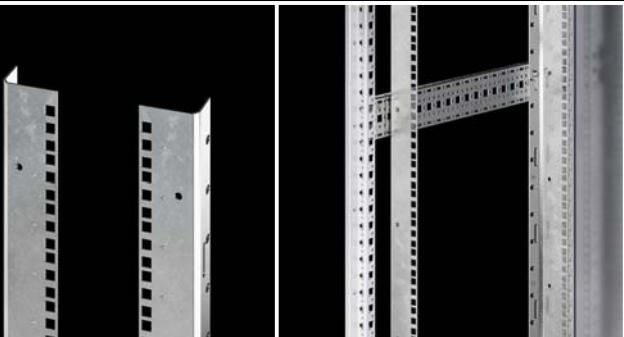

Swing frame, large

The swing frame, large, supports full or partial installation for 482.6 mm (19") components. It is fully depth-adjustable within the 25 mm pitch pattern, and hinged on the left or right. Two swing frames may also be fitted together in 1200 mm wide enclosures. An opening angle of 180° is also supported with a special hinge.

Swing frame stay

With the swing frame stay, even enclosures with heavy installed equipment can be held securely in position during maintenance work. The stay can be fitted at the top or bottom of the enclosure.

Adaptor section, 482.6 mm (19")

Turns any 600 mm wide VX25 into an electronic enclosure. The 482.6 mm (19") sections may be attached directly to the enclosure section or adjusted in the depth on a 25 mm pitch pattern on punched sections with mounting flanges. The sections may be shortened to any length for partial installation.

482.6 mm (19") installation system

Swing frame, small

The swing frame, small, is the ideal solution for partial installation with 482.6 mm (19") components. It can be positioned anywhere you like in the height and depth of the enclosure within the 25 mm pitch pattern, and is fitted in a flash.

Fastener

The 482.6 mm (19") fastener allows you to create attachment facilities for 482.6 mm (19") components in next to no time, without the need for time-consuming installation of individual cage nuts. Components are simply snap-mounted onto the 482.6 mm (19") mounting angle.

482.6 mm (19") installation system

Swing frame

Swing frame, small

for 600 and 800 mm wide enclosures
For mounting 482.6 mm (19") equipment.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Cam with double-bit lock insert, 2 x 130° hinge, and parts for attaching to the installation kit

Note:

- The swing frame stay is 8619.270 required to lock the open swing frame, see page 210

Accessories:

- 482.6 mm (19") fastener, 1 U, see page 212

1) Only in conjunction with 800 mm wide installation kit.

482.6 mm (19") installation system

Swing frame

Installation kit

for swing frame, large

For mounting:

- Directly on the enclosure section when installed across the entire enclosure height
- In conjunction with punched section with mounting flange 23 x 64 mm, for partial installation in the enclosure height

Material:

- Sheet steel, 3 mm

Surface finish:

- Spray-finished

Colour:

- RAL 7035

Supply includes:

- Assembly parts

For enclosure width mm	Load capacity N	Packs of	Model No.
600	3500	1 pc(s).	8619.040
800	3500	1 pc(s).	8619.041
1200	1500	1 pc(s).	8619.042

Swing frame stay

Secures the swing frame in the open position.

For mounting on swing frame, large:

- 8619.270 at the top of the enclosure
- 1980.200 at the bottom of the enclosure
(with safety stop at 160°)

	Packs of	Model No.
For 130° hinge	1 pc(s).	8619.270
For 180° hinge	1 pc(s).	1980.200

180° hinge

for swing frame, large

- To extend the opening angle from 130° to 180° in the foremost installation position
- Provides optimum access to the components and 482.6 mm (19") components located behind the swing frame

Load capacity:

- Up to 1500 N

Material:

- Die-cast

Packs of	Model No.
1 pc(s).	8619.051

Slide rail

for swing frames

To support heavy slide-in 482.6 mm (19") electronic equipment in the swing frame.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

For slide-in equipment with max. installation depth	Packs of	Model No.
< 190 mm	10 pc(s).	1962.200
> 190 mm	10 pc(s).	1963.200

482.6 mm (19") installation system

Mounting angles

Adaptor section, 482.6 mm (19")

For mounting electronic components, subracks and other 482.6 mm (19") equipment. Adaptor sections are easily shortened for partial assemblies.

Material:

- Sheet steel, 2 mm

Supply includes:

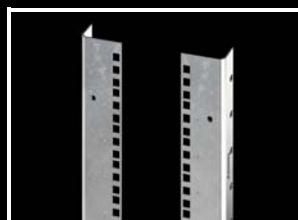

- Assembly parts

Note:

- The 482.6 mm (19") measurement is obtained when mounting on the frame for 600 mm wide enclosures
- Depth-offset installation in 600 mm wide enclosures is possible using punched sections with mounting flanges, 18 x 64 mm

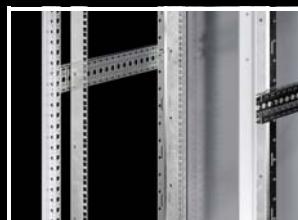

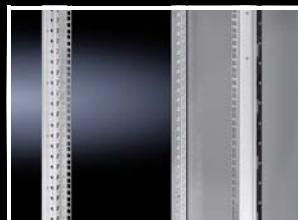

For enclosure height mm	U	Packs of	Model No.
1600	33	2 pc(s).	8619.300 ¹⁾
1800	38	2 pc(s).	8619.310
2000	42	2 pc(s).	8619.320 ¹⁾

¹⁾ For the rear of electronic enclosures, see page 68

Accessories:

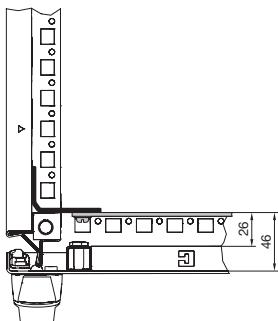

- 482.6 mm (19") fastener, 1 U, see page 212
- Slide rail VX for adaptor section 482.6 mm (19") with attachment on one side, see page 212
- Slide rail VX for adaptor section 482.6 mm (19") with attachment on both sides, see page 212
- Punched section with mounting flange, 18 x 64 mm, see page 164
- Multi-tooth screws, see page 172
- Metal multi-tooth screws, see page 172
- Self-tapping screws, see page 172

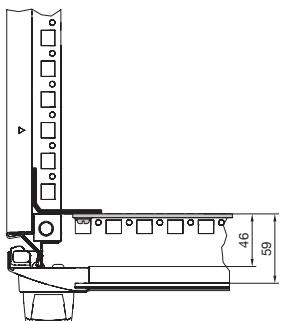

Installation examples for VX

Foremost installation position

In conjunction with sheet steel door

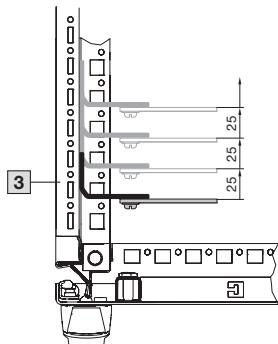

In conjunction with glazed door

Offset installation position

May be depth-mounted on a 25 mm pitch pattern on punched sections with mounting flanges

Adaptor piece, 482.6 mm (19")

The 1 U sub-section of adaptor sections. For the installation of subracks and other 482.6 mm (19") equipment.

Material:

- Sheet steel, 2 mm

Supply includes:

- Assembly parts

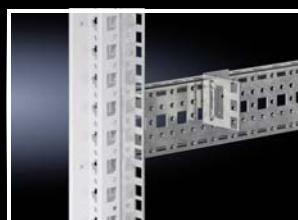

Note:

- The 482.6 mm (19") measurement is obtained when mounting on the frame for 600 mm wide enclosures
- Depth-offset installation in 600 mm wide enclosures is possible using punched sections with mounting flanges, 18 x 64 mm

U	Packs of	Model No.
1	4 pc(s).	8619.330

Accessories:

- 482.6 mm (19") fastener, 1 U, see page 212
- Punched section with mounting flange, 18 x 64 mm, see page 164
- Multi-tooth screws, see page 172
- Metal multi-tooth screws, see page 172
- Self-tapping screws, see page 172

482.6 mm (19") installation system

Mounting angles

Slide rail VX

for adaptor section 482.6 mm (19")
with attachment on both sides

Mounting between the 482.6 mm (19") front and rear adaptor sections or 482.6 mm (19") adaptor pieces.

Material:

- Sheet steel

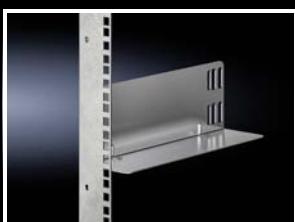

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

For enclosure depth mm	Packs of	Model No.
500	10 pc(s).	8613.151

800	10 pc(s).	8613.181

Slide rail VX

for adaptor section 482.6 mm (19")
with attachment on one side

Mounted on the adaptor section, 482.6 mm (19").

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

Length mm	Packs of	Model No.
270	10 pc(s).	4531.001

482.6 mm (19") fastener, 1 U

with contact

For simple screw connection of installation components within the 482.6 mm (19") mounting level.
Simply slide onto the mounting angle from the inside and lock home.

Benefits:

- Fast positioning and installation instead of using individual cage nuts
- Integral contacting for potential equalisation
- Preconfigured 1 U support with 3 cage nuts, including centre attachment to standard EIA 310
- Supports multiple dismantling and reuse

Material:

- Sheet steel, zinc-plated

Thread	Packs of	Model No.
M5	24 pc(s).	2090.000

Also required:

- Multi-tooth screws 7094.130, see page 212

Multi-tooth screw

M5 x 16 mm

For optimum transmission of torques, an extended tool life, and enhanced safety and reliability when tightening and loosening screw connections.

Supply includes:

- 50 plastic washers
- 50 assembly screws

	Bit size	Packs of	Model No.
M5	Multi-tooth 25	50 pc(s).	7094.130

The 3-phase coating procedure

Coating procedure	Technical properties	Technical specifications	
Degreasing, nanoceramic pretreatment, rinsing	Used as corrosion protection and to improve paint adhesion.	Nanoceramic conversion layer	
Interior/exterior: Anodic dipcoat priming	Even layer formation on all surfaces, edges and in cavities, which produces a high level of corrosion protection even at the assembly stage. The primer is readily overpainted and free from heavy metals, chromate and silicone.	Erichsen cupping test to DIN EN ISO 1520 Buchholz hardness to DIN EN ISO 2815 Cross cutting to DIN EN ISO 2409	≥ 4 mm ≥ 80 Gt 0
Stove enamelling			
Exterior: Textured powder coating	Powder-coating is distinguished by a high level of mechanical resistance, excellent corrosion protection, good resistance to chemicals and temperature, and its facility for decontamination. The powder coating is readily overpainted and is free from heavy metals, chromate and silicone.	Erichsen cupping test to DIN EN ISO 1520 Buchholz hardness to DIN EN ISO 2815 Cross cutting to DIN EN ISO 2409 Salt spray test to DIN EN ISO 9227 NSS Condensate test to DIN EN ISO 6270-2 CH Condensate test to DIN EN ISO 6270-2 AHT	≥ 3.5 mm ≥ 80 Gt 0 Test period: 168 hours Test period: 500 hours Test period: 20 cycles
Stove enamelling			

The coating is resistant to:

- Mineral oils
- Lubricants
- Machine emulsions
- Alcohol-based solvents (briefly, e.g. during cleaning)
- Weak acids and alkalines

Primer or powder coating suitable for overpainting

After careful cleaning of the surface, the standard coating may be overpainted with:

- DD gloss paints
- Single and dual-component gloss paints
- Car repair paints
- Powder paints
- Water-based paints

If in doubt, perform a compatibility test. Always follow the paint manufacturer's instructions. When overpainting, take care not to exceed 180 °C and a baking time of 15 minutes.

Outdoor use of enclosures

In order to guarantee satisfactory long-term function of enclosures in outdoor use, the relevant environmental factors must be taken into account.

These include:

- UV radiation, the corrosive action of air pollution, rain, icing, snow, wind or other factors in special climatic conditions.

Condensation inside the enclosure

Condensation must be prevented by means of appropriate measures, e.g. by venting or heating the enclosure.

Protection category

The enclosure may be exposed to extreme weather conditions during outdoor use. Long periods of rain, snow, ice, high winds and temperature fluctuations place particularly high demands on the enclosure sealing. The protection category IPX3 as envisaged for external weather conditions in DIN VDE 0100, part 737, point 5.2 is often insufficient to provide permanent protection for electrical equipment.

Technical information

Protection categories to IEC 60 529 (EN 60 529)

The IP protection category is characterised by 2 numerals.

Example of a protection category, e.g. IP43:

Code letters

IP

First numeral

4

Second numeral

3

Degrees of protection for protection against contact and foreign bodies: First numeral			Degrees of protection for protection against water: Second numeral		
First numeral	Degree of protection	Designation	Second numeral	Degree of protection	Designation
1	Protected against solid foreign objects with a diameter of 50 mm and greater	The object probe, a sphere 50 mm in diameter, must not penetrate fully. ¹⁾	1	Protected against vertically falling water drops	Vertically falling drops shall have no harmful effects.
2	Protected against solid foreign objects with a diameter of 12.5 mm and greater	The object probe, a sphere 12.5 mm in diameter, must not penetrate fully. ¹⁾ The articulated test finger may penetrate up to its length of 80 mm, but adequate distance from hazardous parts must be adhered to.	2	Protected against vertically falling water drops when the enclosure is tilted up to 15°	Vertically falling drops shall not have any harmful effects when the enclosure is tilted up to 15° on either side of the vertical.
3	Protected against solid foreign objects with a diameter of 2.5 mm and greater	The object probe, a sphere 2.5 mm in diameter, must not penetrate at all ^{1).}	3	Protected against sprayed water	Water sprayed at an angle of up to 60° on either side of the vertical shall have no harmful effects.
4	Protected against solid foreign objects with a diameter of 1.0 mm and greater	The object probe, a sphere 1.0 mm in diameter, must not penetrate at all ^{1).}	4	Protected against splashed water	Water splashed on the enclosure from any direction shall have no harmful effects.
5	Dust-protected	The ingress of dust is not fully prevented, but dust shall not enter to such an extent as to impair satisfactory operation of the device or safety.	5	Protected against water jets	Water directed at the enclosure from any direction in a jet shall have no harmful effects.
6	Dust-tight	No ingress of dust at a partial vacuum of 20 mbar inside the enclosure.	6	Protected against powerful water jets	Water directed at the enclosure from every direction in a powerful jet shall have no harmful effects.
			7	Protected against temporary immersion in water	Water must not ingress to such an extent as to cause harmful effects when the enclosure is temporarily immersed in water under standardised pressure and time conditions.
			8	Protected against continuous immersion in water	Ingress of water in quantities causing harmful effects shall not be possible when the enclosure is continuously immersed in water under conditions to be agreed between the manufacturer and the user. However, the conditions must be more difficult than for numeral 7.
			9	Protected against high-pressure and high-temperature water jets	Water projected at high pressure and high temperature against the enclosure from any direction shall not have harmful effects.

¹⁾ The full diameter of the object probe must not pass through an opening of the enclosure.

NEMA

The National Electrical Manufacturers Association (NEMA) is a standards organisation in Washington, USA, which publishes a number of technical standards but does not test or certify products itself.

The following NEMA classification outlines the protection of individuals from accidental contact with equipment and the protection of an enclosure from external factors.

Further information on protection categories may be found on the Internet at: www.ittal.com

UL/NEMA Type	Intended use and description
1	Enclosures for use predominantly indoors Protection against the penetration of foreign bodies
3	Enclosures for use predominantly outdoors Protection from rain, hail, dust, icing and the damage caused by icing
3R	Enclosures for use predominantly outdoors Protection from rain, hail, icing and the damage caused by icing
3S	Enclosures for use predominantly outdoors Protection from rain, hail and dust External mechanisms remain usable despite being coated in ice
4	Enclosures for indoor or outdoor use Protection against rain, foreign bodies, splashed water and hosed water and against damage caused by icing on the exterior of the enclosure
4X	Enclosures for indoor or outdoor use Protection against rain, foreign bodies, splashed water and hosed water and against damage caused by icing on the exterior of the enclosure Increased protection from corrosion.
12, 12K	Enclosures for use predominantly indoors Protection against dust deposits, foreign bodies and non-corrosive dripping liquids
13	Enclosures for use predominantly indoors Protection against dust deposits, sprayed water, oil, and non-corrosive coolants

The UL/NEMA classifications are not directly comparable with IP protection categories, since both the test conditions and the evaluation of the test results are different.

Approvals and permits

Product certifications and approvals are pivotal to the global acceptance of industrial products. Rittal products meet the highest internationally recognised quality yardsticks. All components are subjected to the most stringent testing in accordance with international standards and regulations. The consistently high product quality is ensured by a comprehensive quality management system. Regular production inspections by external test institutes also guarantee compliance with global standards

A precise allocation of products to marks of conformity can be found on our product and service pages on the Internet at www.ittal.com

PE conductor connection

The PE conductor connection must be designed by the manufacturer of switchgear in accordance with the relevant VDE and/or local regulations. The enclosure packs generally contain earthing materials (screws, nuts, washers). The assembly instructions contain recommendations on installing a PE conductor. The pre-assembled earth straps, available as accessories in various cross-sections and lengths, are intended to make assembly of a PE conductor easier.

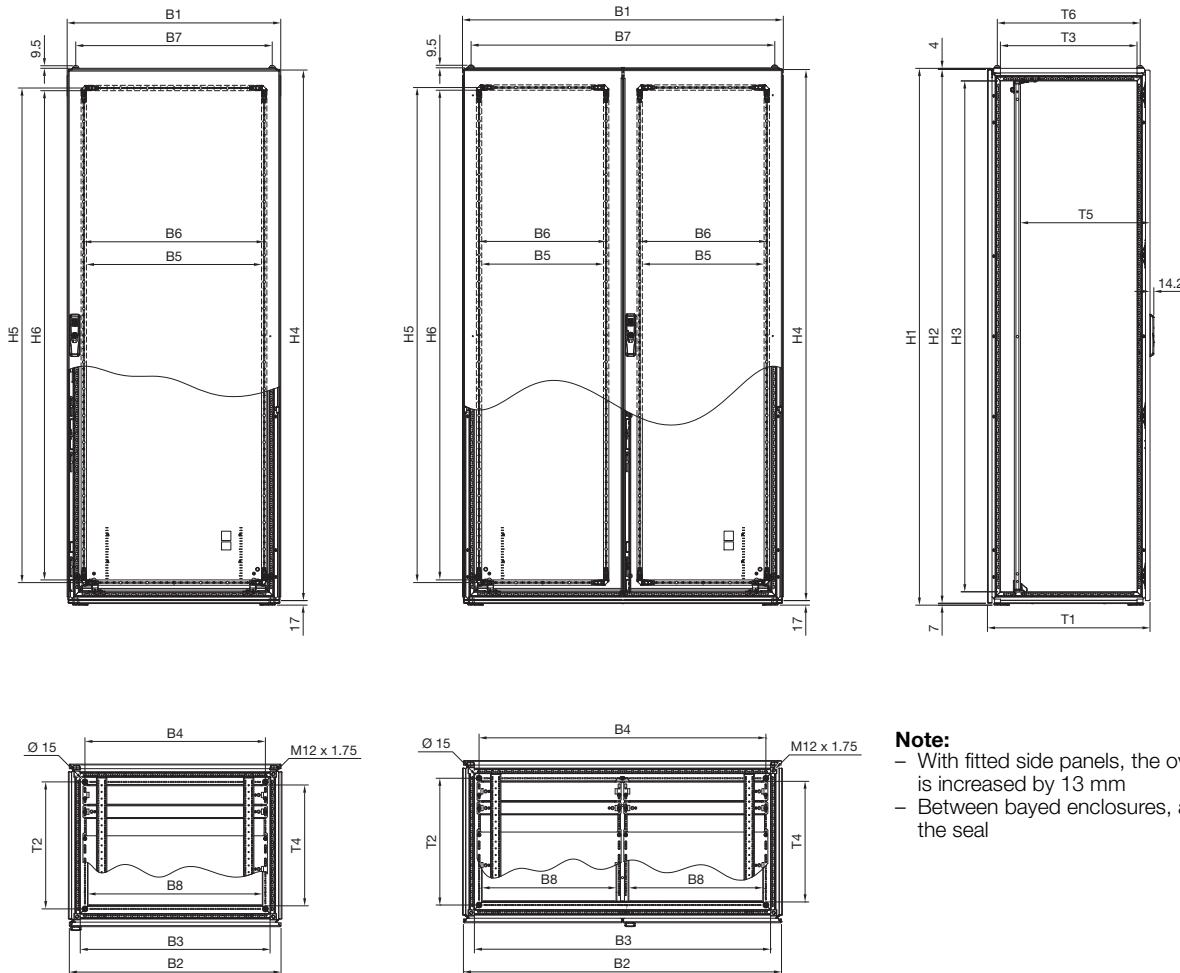

Further information can be found in our technical documentation "PE conductor connection, current carrying capacity".

Baying enclosure system VX25

Technical details

Basic enclosure

Sheet steel, stainless steel

Note:

- With fitted side panels, the overall width (B1) is increased by 13 mm
- Between bayed enclosures, allow 1 mm for the seal

VX25 installation examples

Partial installation

in 600 and 800 mm wide enclosures,
each in the highest or lowest position.

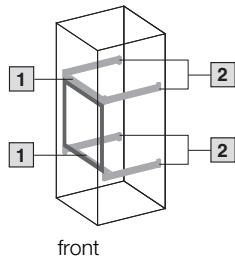

front

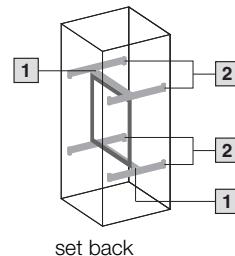

set back

Partial installation, centre

in 600 and 800 mm wide enclosures.

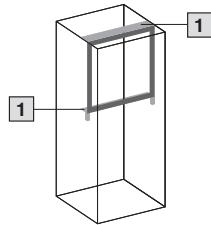

front

set back

Side installation

With an enclosure depth of 600 or 800 mm, side installation of a partial mounting plate is exactly the same as installation parallel to the front.
For access to the swing frame, we recommend hinges
for the side panel.

800 mm
set back

1200 mm
front

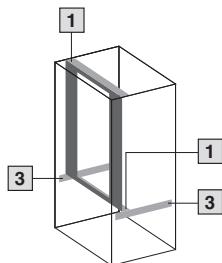

Side installation

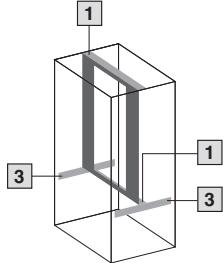

With an enclosure depth of 800 mm, side installation of a large swing frame is identical to installation parallel to the front.

For access to the swing frame, we recommend hinges for the side panel.

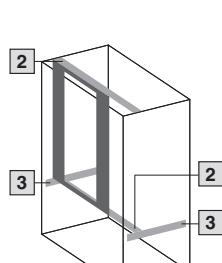

Partial installation, top

 - for side panel, screw-fastened, sheet steel 103
- Holder
 - for cable conduit 205
 - for protective bar 119
- Hygrometer 180

I

- Identification strip 139
- Inlay for plastic gland plate, modular and sealing frame, modular 201
- Installation kit
 - for back-to-back mounting plates 153
 - for swing frame, large 210
 - for swing frame, small, and partial mounting plate 208
- Installation modules ISV 188
- IP66/NEMA 4, VX25 69
- IP66/NEMA 4X, VX25 79
- Isolator cap for screw head 203
- Isolator door cover 108
- ISV distribution enclosure VX25 70
- ISV installation kit 188
- ISV installation modules 188

L

- Large enclosure
 - Baying enclosure system VX25, sheet steel 54
 - Baying enclosure system VX25, stainless steel 75
 - VX25 distribution enclosures 70
 - VX25 electronic enclosure 68
 - VX25 modular enclosure 71, 72
 - VX25 with glazed door 66
 - VX25, IP66/NEMA 4 69
 - VX25, IP66/NEMA 4X 79
- LED system light
 - Accessories 177
- Levelling component 93
- Levelling feet 96
- Lights
 - LED system light 177
- Lock components 118
- Lock insert 129
- Lockable and adjacent door 118
- Locking bar latch 128

M

- Meter mounting board module ISV 192
- Modular climate control concept
 - Climate control doors 121
 - Cooling module 120
- Modular enclosure VX25 71, 72
- Modular front design 122
- Module plates 106
- Mounting angles
 - C rail 195
 - C rail 167
- Mounting bracket 169
- Mounting clip 168
- Mounting kit
 - Connection terminal block 190
 - for LED system light 179
 - Magnet 179
- Mounting plate
 - Accessories 151
 - Locatable 168
 - Screw-fastened, large 169
 - Screw-fastened, small 169
 - with integral top-hat rail 169
- Mounting plate attachment
 - Type A 151
 - Type B 152
 - Type C 153
- Mounting plate infill 151
- Mounting plate modules ISV 189
- Mounting plates
 - Cross-brace 154
 - Mounting positions 150
 - Slide rail 154
 - Transport handle 158
- Mousepad
 - Support 140
- Multi-function mounting kit 154
- Multiple lock 130
- Multi-tooth screw 172, 212

N

- NH fuse-switch
 - disconnector modules ISV 190
- NH slimline fuse-switch
 - disconnector modules ISV 191
- Nut 171

P

- Paint 95
- Partial assembly plate VX 160
- Partial door 123
- Partial mounting plate 155
- Partial mounting plate holder 158
- PE busbar 186
- Perforated mounting strips
 - for partial doors 124
- Plate
 - for base mounting 92
- Pressure stoppers
 - for roof plates, for pressure relief 147
- Primer/paint
 - Contact paint 183
- Protective bar 119
- Punched rail
 - 18 x 39 mm 166
- Punched section with mounting flange
 - 14 x 39 mm 134
 - 18 x 64 mm 164
 - 23 x 64 mm 164
 - 23 x 89 mm 165
- Punched section without mounting flange, 23 x 64 mm 165

Q

- Quick-assembly block 170
- Quick-fit baying clamp, one-piece 113

R

- Rail
 - for EMC shielding bracket and strain relief 182
- Rail mounting bracket 171
- Ride-up roller for door 136
- Roof plate 146

S

Safety lock	130
Screws	172, 212
Seal inserts for plastic gland plate,	
modular and sealing frame, modular	201
Sealing frame, modular	201
Section for cable entry	
– Centre	199
– Rear	199
Self-tapping screw	172
Serial installation device module ISV	189
Sheet steel	
– Baying enclosure system VX25	73
– Baying enclosure system VX25,	
basic enclosure with glazed door	66, 67
– Baying enclosure system VX25,	
EMC enclosure	74
Shield bus, EMC	183
Shielding seal, EMC	181
Shipping brace	137
Side panel	
– EMC	181
– for cable chamber	95
– for top-mounting module	145
– Screw-fastened, sheet steel	102
– Screw-fastened, stainless steel	102
Slide rail	
– for mounting plate	154
– for swing frames	210
Slide rail VX	
– for adaptor section 482.6 mm (19")	212
Sliding panel	98
Socket box	
– for LED system light	179
Spacers	134
– for roof plate	145
Spare key	130
Stainless steel	
– Baying enclosure system VX25	75
– Viewing window	139
Stay	
– for door	136
– for door and escape routes	136
Stay for trim panel, hinged at the top	125
Stepped collar	202
Storage box	135
Strap, earth strap	186
Support	
– for mousepad	140
Support rail	
– 48 x 26 mm	167
– 65 x 42 mm	168
– 75 x 20 mm	167
– TS 35/15	168
– TS 35/7.5	168
Support rail module ISV	189
Support strip	166
Swing frame	208
– 180° hinge	210
– Large	209
– Small	208
– Stay	210
System divider	97
System window	138

T

T distributor for LED system light	178
Technical information	213, 215
Thermostat	
– Enclosure internal thermostat	180
Threaded block	171
Top-mounting module	144
Transport and mounting handle	137
Transport bracket	114
Transport castors	
– for base/plinth VX	92
Transport handle for mounting plates	158
Trim panel	
– Bottom	124
– Hinged at the top	125
– Top	124
Twin castors	96

U

Utility lectern	134
-----------------	-----

V

Viewing window	
– Stainless steel	139
VX25	
– Basic enclosure with glazed door	66
– Baying enclosure system, sheet steel	54
– Distribution enclosure	70
– Electronic enclosure	68
– EMC enclosure	74
– Enclosure, sheet steel	54
– Enclosure, stainless steel	75
– Fuse-switch-disconnector enclosure	73
– IP66/NEMA 4X	79
– Modular enclosure	71, 72

W

Wall bracket	145
Washer, contact washer	187
Windows	
– System window	138
– Viewing window	139
Wiring bracket	194
Wiring plan lectern	135
Wiring plan pocket	
– Plastic	135
– Sheet steel	135
– with transparent pouch	136
