

# SIEMENS

## WinCC/WebUX V7.3

Operation and monitoring to go –  
efficient, mobile and secure

[siemens.com/wincc](https://siemens.com/wincc)

Answers for industry.

# Always know what's going on with WinCC/WebUX – wherever you are

Also in the world of automation, the trend towards increased flexibility is omnipresent. Software solutions which facilitate the monitoring and operation of mobile terminal device processes are becoming ever more important in this sector. This is exactly what WinCC/WebUX by Siemens supports.

WinCC/WebUX enables you to monitor your plant processes via the Internet or Intranet by means of mobile terminal devices and to control them if required.

The software comprises an operating system-independent visualization solution which is suitable for HTML5- and SVG-capable browsers – and does not entail any engineering expenditures.

## Highlights at a glance

- + **Simple and efficient** through integration in WinCC
- + **Scalable clients** for demand-based operation and monitoring
- + Innovative and **web-based** for location-independent information
- + **Open and secure** on the basis of web standards
- + **Targeted** information for every user group

More efficient and economic –  
the suitable information for your corpora

**Management:** 24/7 access to important production characteristics

**Operations control:** Production information such as messages, trends and characteristics at a glance

rate task at all times

**Maintenance:** Time and cost savings through online access to error messages; secure remote operation (message acknowledgement, target value specification, etc.)

**Monitor as display panel:**  
Production characteristics for the staff

# Mobile remote access to the production process

## What our innovative software solution offers:

- Integration in WinCC
- Mobile SCADA
- Independency regarding the selection of terminal device and browser
- Zero client installation
- Flexible access to targeted information
- Monitoring and/or operation
- Additive licenses
-  **1 free MonitorClient**
- Use of web standards (SSL, HTML5, SVG)

## And your benefits:

- Integrated engineering in the familiar WinCC environment and security thanks to access authorizations with WinCC user management
- Short time-to-market
- Online access to important process information – 24/7
- Zero maintenance
- Reliable plant information for decision making
- Graded access rights
- Stageless licensing
- No entry barrier – getting started at once
- Free selection of devices and browsers
- Secure communication

# Selection and ordering data

## Web browser- and platform-independent

### Safety note:

When connecting an internal system to an external system, suitable protective measures have to be taken to ensure safe system operation (amongst others with regard to IT security, e.g. network segmentation).
