Lighting & Indication

more sensors, more solutions

Who is Banner?

Every 3.5 seconds, a Banner sensor is installed somewhere in the world. Banner solves problems for most of the manufacturing companies in the Fortune 500, who rely on Banner for reliable automation solutions.

Banner products help manufacture the cars you drive, the TVs you watch, the food you eat, the medicine you take and virtually every product you consume. Whatever the industry, Banner has a solution to help you automate your plants, improve efficiency and manufacture quality products.

Manufacturing Specialists

Banner is a leading source for manufacturing needs with an extensive product line. With over 30,000 products, including our award-winning sensors, wireless solutions, vision sensors and lighting, machine safety, indicator lights and LED lighting, we have a solution for you.

Application Solution Experts

Our field sales engineers are the most highly-trained and experienced professionals in the industry. They can rapidly analyze an application to help you find the best solution.

Global Presence

We are a global company with a focus on our commitment to customers around the world. Banner has worldwide support with a network of 3,000 professionals who are ready to help you in your plant no matter where you are located.

Banner Specials

Banner's growing family of Lighting and Indicator products include thousands of standard products. However, if you have an application requiring a unique solution, contact one of Banner's Application Engineers and learn about our rapid customization and ability to deliver special product variations.

Table of Contents

New Products 4

Light Up the Visual Factory 6

Banner's Lighting and Indication Solutions

LED Lighting..... 16

Robust, high-quality and energy-efficient LED Lighting products have sleek designs and are ideal for a wide range of industrial and mobile applications.

Signal Tower Lights..... 42

Premium LED-based, stylish Signal Tower Lights are completely flexible with preassembled or modular models to suit application needs, and have a wide range of mounting accessories for quick and easy installation.

Indicators..... 58

Rugged Indicators require no additional protective enclosure and are flexible in design, size and mounting for a unique indication solution.

Touch Buttons..... 100

Touch Buttons come in a variety of options for lighting and touch functions and have unique, rugged packages that require no additional protective enclosure.

Pick-to-Light 116

Rugged, unique Pick-to-Light products help reduce assembly time and increase quality for online and offline operator guidance processes.

- Streamline Training

Pick-to-Light for Assembly and Kitting

Pick-to-Light for Warehouse and Logistics

Lean Principle

Light Up the 'Gemba'

Gemba is the Japanese term for "the real place" — or in lean manufacturing, the factory floor, where actual services are provided or where work gets done. Lighting up the "Gemba" means to make problems visible so they can be quickly fixed. Proper workplace illumination is a key step to achieve efficient processes, optimal defect detection and maximum worker safety.

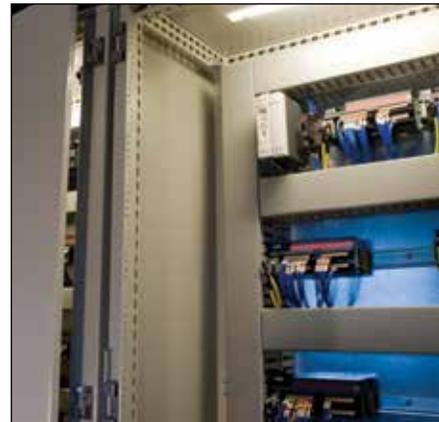

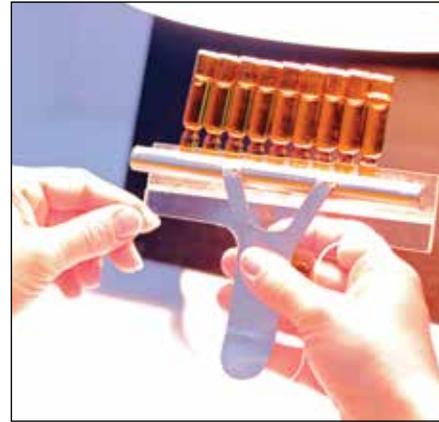

Illuminate Work Areas with High-Intensity LED Lighting

Increase efficiency, improve product quality and reduce costs with Banner's industrial LED lighting products. Banner LED lights are designed to withstand the toughest environments featuring high-quality, shatterproof housings and washdown safe models.

Boost Productivity – Proper lighting increases the speed and accuracy of visual task performance, reducing assembly times

Improve Product Quality – Appropriate lighting improves the ability of the human eye to detect part defects during assembly and inspection

Reduce Costs – Ultra-long lifetimes, no maintenance, and advanced energy efficiency for long-term savings

Communicate Status to Supervisors

Tower Lights
page 44

Beacon
Tower Lights
page 52

Wireless
Solutions
page 46

Bright, highly visible indication allows for improved communication across the manufacturing floor. Convenient, effective wireless options allow for rapid communication throughout the plant.

Immediate – Instant attention to problems as they occur can reduce downtime, improve quality and reduce safety issues

Simple – Efficient visual communication reduces complexity and focuses attention on key pieces of information

Standard – Consistent communication using established practices eliminates confusion and speeds up reaction times

Lean Principle

Jidoka

Enabling a machine or operator to detect abnormalities and stop the process is referred to as Jidoka. Bright, easily detectable status lights enable operators to simultaneously monitor several machines, resulting in significant productivity gains. Implementation can also prevent production of defective products, eliminate overproduction and focus attention on process problems and solutions. Typically the machine is "set" to do self inspection and notify a human if defects are detected.

Communicate Status to Operators

Clear status indication gives workers information when and where they need it, resulting in efficient processes.

Empower Operators – Indicators, touch buttons and E-stops for operator communication and interface improve accountability by empowering workers to take action when problems occur

Alert Supervisors – Tower lights and indicators communicate machine, work cell and inventory status, which helps supervisors identify and resolve issues quickly

Accelerate Problem Resolution – Immediate, overt status information ensures more efficient problem resolution

Indicators
page 58

Touch Buttons
page 100

E-Stops
page 112

Lean Principle

Andon

Andon is a device that calls attention to defects, equipment abnormalities or other problems. It typically reports status through a system of lights (red for failure, amber for marginal and green for normal operation are common). Andon is an important tool in lean manufacturing and should be:

Conspicuous – mounting them where they are most visible versus where the electrical enclosure is located

Unambiguous - there should be no confusion of on/off states

Lean Principle

Poke-Yoke

An example of the Poke-Yoke method, or mistake proofing, is light-guided assembly. With simple implementation in the factory, this technique speeds up manufacturing by visually guiding the assembler and providing feedback for correct and incorrect picks.

Increase Efficiency with Pick-to-Light Assembly Processes

Easy-to-see pick-to-light indication guides operators for assembly and kitting applications. Real-time sensor feedback ensures accuracy.

Fast – increase operator efficiency with visual guidance to the correct part location

Accurate – Visual indication and pick feedback result in increased operator accuracy

Cost Effective – Simple devices that can be easily implemented into a control system

Flexible – A variety of hardware solutions and mounting options

The Design:
Sleek yet
Rugged

The Products:
Simple yet
Intelligent

The Options:
Endless yet
Unique

Banner's lighting and indicator solutions are high-quality, stylish products designed to meet your application needs. With flexible designs and energy-efficient LED products, Banner gives you better indication solutions that require no maintenance.

ease-of-use

Banner's lighting and indicator products require no additional protective enclosure, have quick-disconnect options and a variety of mounting solutions, making products easy to install.

energy savings

With high-quality, long-life LED lights, Banner's lighting and indicator products provide efficient, energy-saving options that are extremely bright and highly visible on the factory floor.

high quality

All of Banner's lighting and indicator products are made for long-term use, requiring zero maintenance after installation.

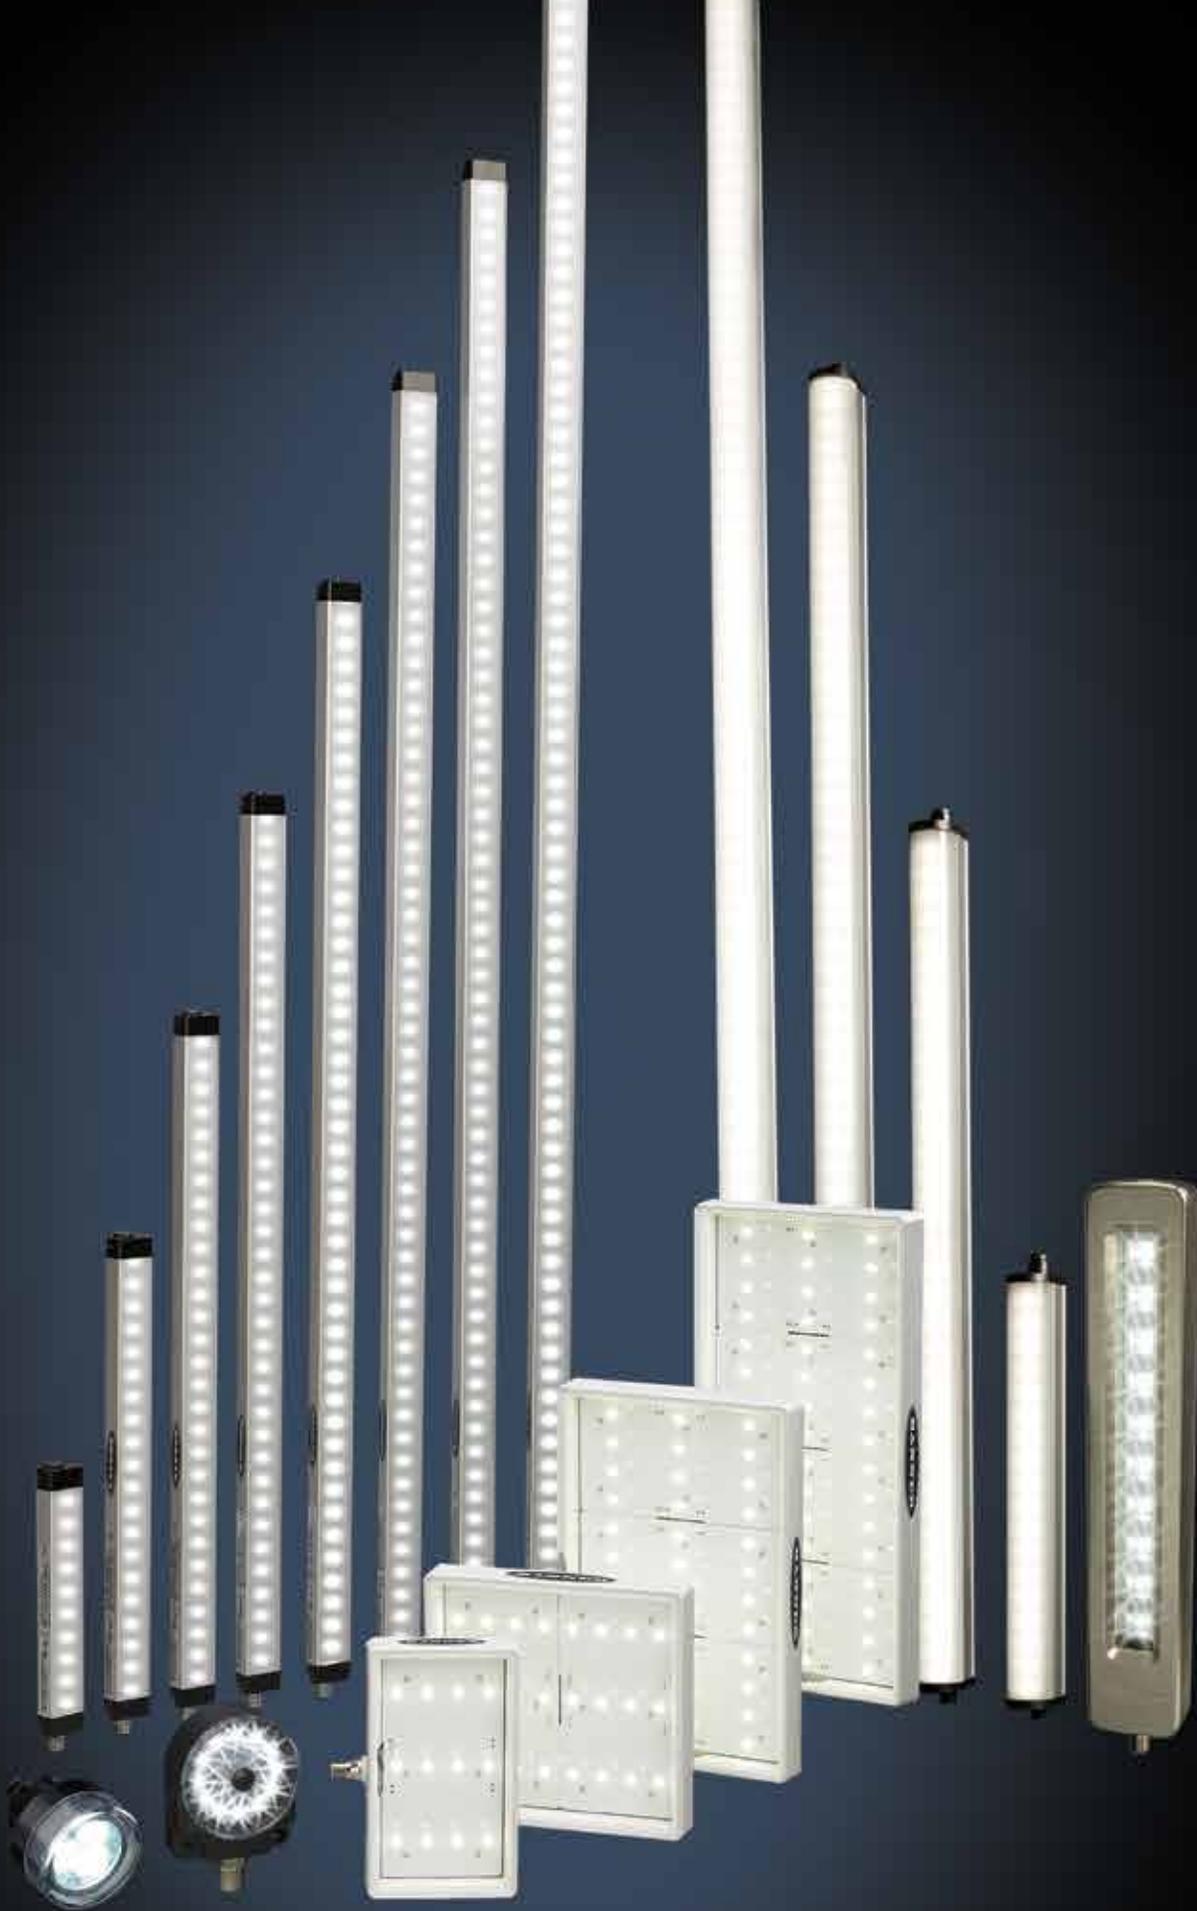

rugged

Banner's lighting and indicator products are made to last in the toughest environments with housings rated up to IP69K.

innovative

Banner's lighting and indicator products are advanced solutions that pinpoint what's important to give you a unique solution that suits your environmental, workplace efficiency and mounting needs.

BANNER

LED Lighting

Banner's LED lighting solutions are high-quality, energy-efficient products that provide bright illumination for up to 50,000 hours of working life. Robust, vibration-resistant housings and sleek designs make the Banner LED lighting line ideal for a wide range of industrial and mobile applications, including machine lighting, enclosure lighting, visual inspection illumination and work cell lighting. Low dc voltage operation allows for lighting control via a PLC or other control system for additional energy savings.

WLB32 LED Light Bar

The WLB32 utilizes advanced LED lighting technology providing high-quality and maintenance-free industrial lighting solutions that will last for years.

- High brightness with an even light output for a no-glare glow
- Robust metal housing, shatterproof light cover and easy installation
- Ideal for work stations, machine lighting, control cabinets and manufacturing lines
- Energy efficient for overall cost savings
- High/Low/Off switch allows users to customize light levels

WLB92 Industrial Light Bar

The WLB92 has design aesthetics for an office and rugged durability for the factory. With several mounting options, ac and dc models and a dimming function available, the WLB92 industrial LED light bar suits a wide variety of lighting application needs.

- Durable light stands up in your environment with a rugged metal housing and shatterproof light cover
- No maintenance time or cost with long-life, energy-efficient LEDs
- Easy installation with variety of mounting options: surface, swivel, snap and hanging brackets
- AC models are DLC qualified and have a five year warranty

WLS27 LED Strip Lights

Banner's WLS27 LED Strip Lights have sturdy internal aluminum housings, encased in shatterproof, UV-stabilized, polycarbonate shells, making them ideal for harsh indoor and outdoor applications.

- Round shape makes them suitable for laminar airflow applications
- Rugged, water-resistant IP67, IP68g and IP69k design
- Daisy chain power to multiple lights
- Capability to dim lights using the wiring pinout (Hi/Lo/Off)
- Automatic temperature protection built into the unit to protect the product lifetime

WLS28-2 LED Strip Lights

Banner's LED Strip Lights have sturdy aluminum housings, shatterproof windows and a low-profile, space-saving design. Convenient angle brackets can be used to direct the light exactly where it's needed.

- Magnetic mount options available for easy installation
- Lensed option or choice of clear or diffuse window
- Can be cascaded end-to-end to minimize wiring
- Ability to dim lights using wiring or High/Low/Off switch
- In-line or built-in motion detector switch available for an economic, automated way to switch ON/OFF lights

WLS28-2 Dual-Color LED Strip Lights

Banner's WLS28-2 Dual Color LED Strip Lights have a slim profile and are manufactured from a sturdy aluminum extrusion and die-cast metal end caps. The LED strip lights are ideal for applications requiring more than one color such as mobile vehicle illumination, where red light makes it easier for operators' eyes to transition to dark areas at night. Another application includes machine status indication, where alternating colors illuminate equipment during an error condition.

- Enhanced light quality with bright, densely-spaced LEDs
- Optional three-position switch for manual color selection
- Rugged, water-resistant IP69K models available
- Internal temperature control to protect the device in extreme conditions
- Cascadable models allow control of several lights with one power cable

WLC60 Heavy-Duty LED Light

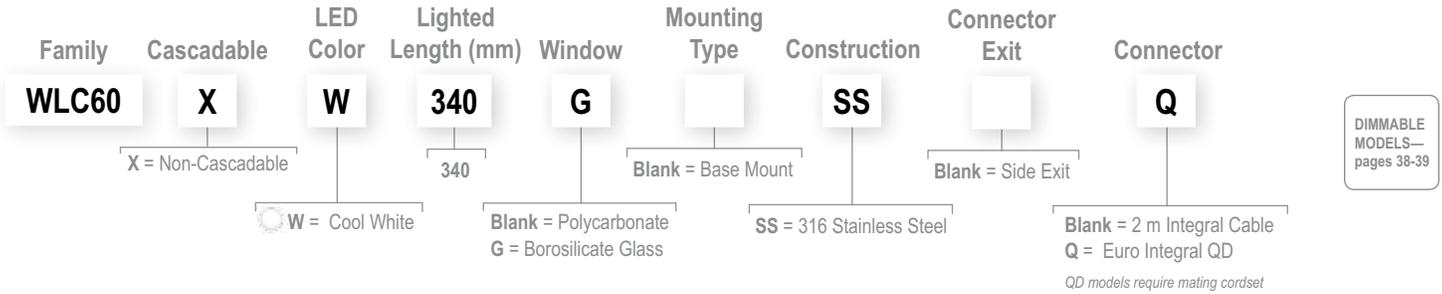

The WLC60 Heavy-Duty LED Light was designed to withstand the harshest environments. The ultra-bright light is oil, chemical and water resistant with IP68, IP68g and IP69K ratings, making it an ideal choice for many industrial lighting applications, including machine lighting and machine tool environments.

- Chemical-resistant design protects against liquid ingress
- Durable polycarbonate window or borosilicate glass (BSG) option available for enhanced chemical and thermal resistance
- High brightness paired with advanced glare-reducing optics
- Vibration and shock resistant
- Stainless steel models available with a corrosion resistant 316L housing, ideal for food and beverage, pharmaceutical, chemical and marine applications

WLC90 Heavy-Duty LED Light

Banner's WLC90 Heavy-Duty Lights are designed to operate in harsh environments, withstanding washdown and spray from water and chemicals such as coolants and detergents. They are extremely compact and bright, making them an excellent choice for machining centers and food processing equipment.

- Rugged housing resists water, coolants, oils and detergent with IP68, IP68g and IP69K ratings
- Wide operating temperature range with an internal monitoring circuit that will dim the LEDs to a safe level at extreme temperatures
- Three lens options to suit many application needs
- Pan and tilt brackets for versatile mounting to direct light in any direction
- All models have three discrete intensity level settings

WLA LED Area Lights

Banner's LED Area Lights provide high intensity, uniform light with low energy consumption and a small footprint. Banner's Area Lights are a versatile lighting source for a wide range of indoor and outdoor applications with angle bracket or magnetic mount options available.

- Up to 2600 lumens for extremely bright illumination
- Encapsulated models available for enhanced resistance to chemicals, vibration and shock
- Choice of clear or diffuse window for reduced glare
- Optical lensed options create more focused illumination
- Rugged housing rated to IP69K for high-pressure, high-temperature washdown applications

WL50S LED Spot Lights

Banner's high-intensity LED Spot Lights emit light in a controlled beam, providing extremely bright illumination directly at a target with optimal energy efficiency. These lights are rugged and water-resistant, making them a good choice for machine lighting, food and beverage applications and mobile applications.

- Three lens options to suit many application needs
- Rugged, sealed housing rated to IP69K
- 50 mm diameter with flat profile and 30 mm mounting base
- Stainless steel version with FDA-grade silicone gasket and Viton® O-Ring seal
- Many bracket options for simple mounting and alignment

WL50-2 LED Work Lights

Banner's LED Work Lights are ideal in areas where space is limited. Featuring a low-profile, 50 mm flat-pack design and robust housing, the LED Work Lights are suitable for many applications, including maintenance stations, control cabinets and general illumination applications.

- Low power consumption
- Aesthetic shape that sheds debris and moisture
- Rugged, water-resistant IP69K models
- VELCRO® brand VELCOIN® fasteners included for quick mounting and convenient repositioning of light (WL50F-2 models only)
- Long-lasting LED technology for zero maintenance after installation

LED Dimming Controller & Dimmable LED Lights

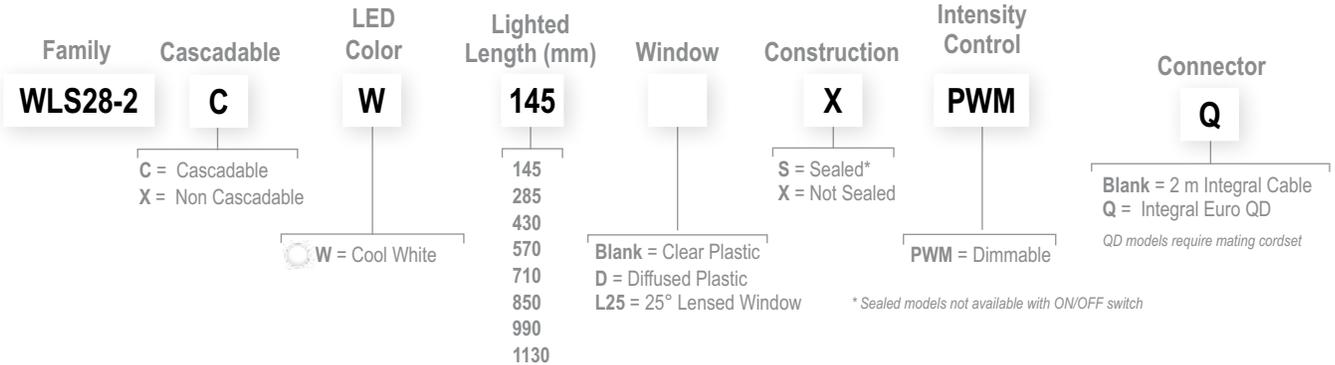

The LED Pulse-Width Modulation (PWM) Dimming Controller allows an operator to dim an LED light source without loss of accuracy. The high-frequency modulation allows for precise intensity control and flicker-free illumination. The Dimming Controller paired with Banner's LED lighting products helps further increase energy savings, helping to reduce overall energy costs.

- Ability to dim light at an operator station
- Works with special models of the strip lights, heavy-duty lights, area lights, spot lights and work lights
- Allows for control of multiple lights with one module
- PWM versions of LED lights can be controlled by other PWM output devices as well as Banner's controller
- Ability to control intensity from zero to 100 percent to suit the level required for the application

Flex Arm

Banner's Flex Arm Mounting Accessories provide versatile mounting options to easily direct lighting where it is needed, whether in a work station or along a manufacturing line. The Flex Arm is available for use with spot lights, work lights and vision spot lights.

- Versatile mounting options including magnetic mount, clamp mount and flange mount
- Vinyl coated to protect against moisture
- Adjustable arm allows for easy repositioning of light to suit many application needs
- Concentrate light exactly where needed
- Portability with magnetic and clamp mount options

BANNER

Signal Tower Lights

Banner's Signal Tower Lights are premium LED-based products that are designed for long life and no maintenance. These rugged, yet stylish tower lights are completely flexible with preassembled or modular models to suit application needs, and have an extensive range of mounting accessories, which allows for a quick and easy installation process. Various model offerings allow for customized solutions, including a choice of ac or dc supply power, three audible output options, standard or high light intensities and quick-disconnect or prewired options.

TL70 Tower Lights

Banner's TL70 Tower Light is a 70 mm, modular LED indicator with extremely bright and uniform light. The modularity gives the user flexibility to customize tower lights as needed and change positions in the field. The TL70 is also available preassembled for easy installation.

- Light segments have user-selectable solid ON or flashing
- Up to five colors plus audible in one device
- Rugged, water-resistant IP65 housing with UV stabilized material
- Bright, uniform indicator segments appear gray when off to eliminate false indication from ambient light
- Several connection options to choose from including M12 quick disconnect, cabled and terminal-wired

TL50 Compact Tower Lights

Banner's TL50 Compact Tower Lights are a hybrid between the TL50 Beacon and TL50 High Brightness models with a shorter design, making them ideal for status indication on small to mid-size pieces of equipment. The TL50 Compact displays up to five stacked colors in one tower with universal ac voltage and up to seven stacked colors in one tower with standard dc voltage.

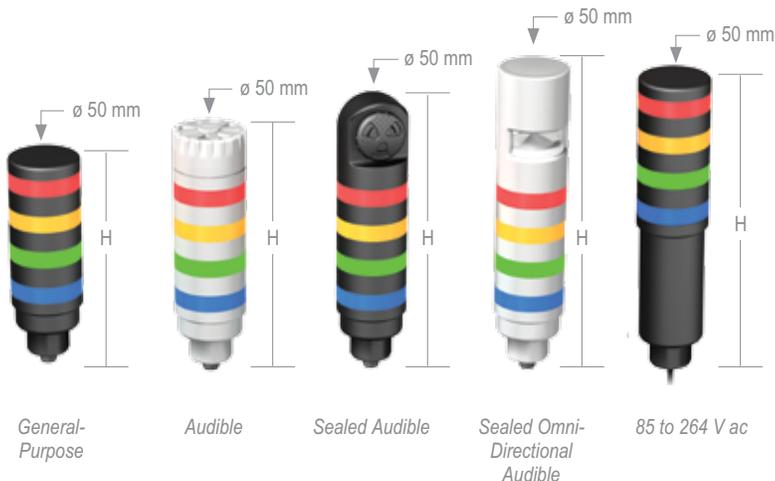

- Half the height of standard TL50 models
- Bright, uniform lighted segments with 10 color choices available
- Available with standard, sealed or Omni-Directional audible
- Compact, sleek, rugged design with IP67 models available
- DC models work down to 12 volts, allowing for use in battery-powered mobile equipment

K50L 50 mm Domed Indicators

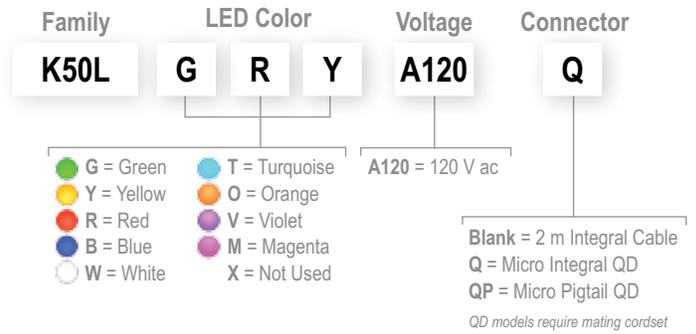

Banner's K50L is our most popular indicator light. The smooth 50 mm diameter dome gives uniform illumination from all directions. These indicators are completely epoxy encapsulated, which protects the electronics from the harshest environments, making them nearly indestructible. The neutral color when in the off condition eliminates false indication from surrounding ambient light.

- Up to five colors in one device with many different color combinations
- Long-lasting, energy-efficient LEDs for years of operation with zero maintenance
- Audible alarm models available with several tones and intensity levels
- Many models rated to IP69K to handle high-pressure washdown environments
- Base has internal and external threads allowing for a variety of mounting methods

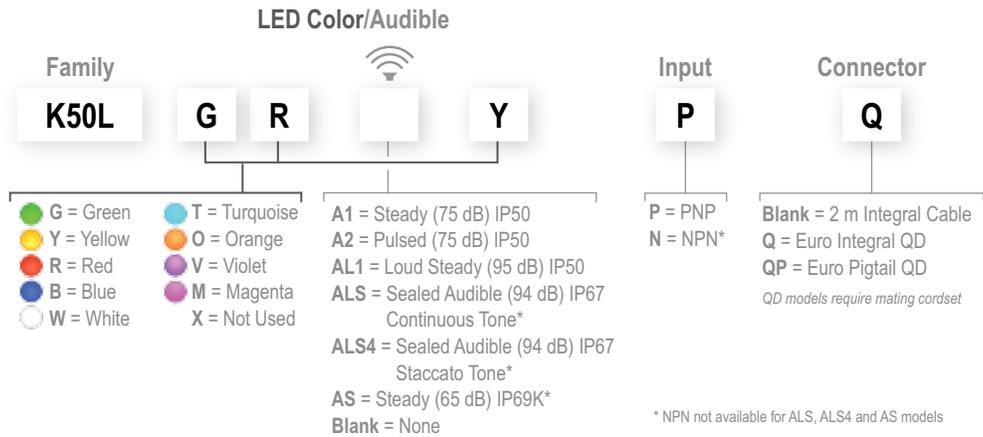

One-, Two- or Three-Color Indicators, 18 to 30V dc

One-, Two- or Three-Color Indicators, 85 to 120V ac

One-, Two- or Three-Color Audible Indicators

Multifunction options available on page 64

Supply Voltage

Sealed Audible: 12 to 30 V dc
 AC models: 85 to 130 V ac
 Other Models: 18 to 30 V dc

Construction

Base: polycarbonate
 Translucent Dome: polycarbonate

Environmental Rating

Standard Models:
 IEC IP67 Integral QD models meet
 DIN 40050 (IP69K)

Standard Audible Models (A1, A2, AL1):
 IP50

Fixed Audible Sealed Models (AS):
 IEC IP67/ IP69K per DIN 40050

Adjustable Loud Audible Sealed Models (ALS, ALS4):
 IEC IP67/ IP69K per DIN 40050

Operating Temperature

Sealed Audible: -20 to +50 °C (-4 to +122 °F)
 All Other Models: -40 to +50 °C (-40 to +122 °F)

Multifunction options and accessories are on pages 64-65

Multifunction Options

These multicolor indicator lights are extremely versatile. They allow for any of the colors to be ON, steady or flashing, or you can alternate between colors. The functionality is easily controlled with simple combinations of the hookup wires. Choose up to five colors in a single device with several different housing styles available.

K30L 30 mm Domed Indicators

The K30L Indicators are rugged, cost-effective and easy-to-install, providing simple indication solutions on the factory floor. These small, 30 mm dome indicators have long-life LEDs for zero maintenance after installation and provide highly visible indication.

- Illuminated dome provides easy-to-see operator guidance
- Easy-to-install 22 mm threaded base mount, no tools required
- Up to three colors in one device to communicate multiple statuses
- Many colors and color combinations available
- Rugged epoxy encapsulated design

K50 and K30 Hazardous Indicators

Banner's K50 and K30 Indicator Lights for hazardous areas have a smooth 50 or 30 mm diameter dome that provides uniform illumination from all directions. The indicators are available in models rated to IP67 and IP69K for use in harsh environments, making them nearly indestructible. Extensive approvals ensure indicator lights are safe to use in most classified zones or areas.

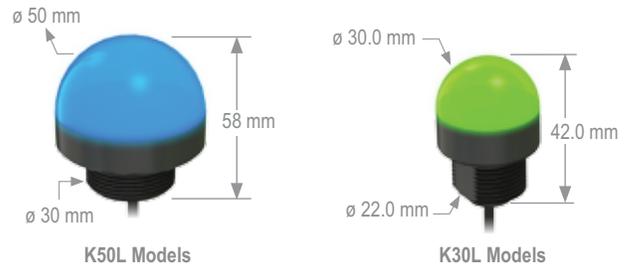

- Up to three colors in one device and five colors to choose from
- Models rated to IP67 and IP69K for use in harsh environments
- Unique design appears gray when off, eliminating false indication from ambient light
- Easy mounting and configuration
- Worldwide IECEx approval for quicker access into countries outside Europe and North America

K90L 90 mm Domed Indicators

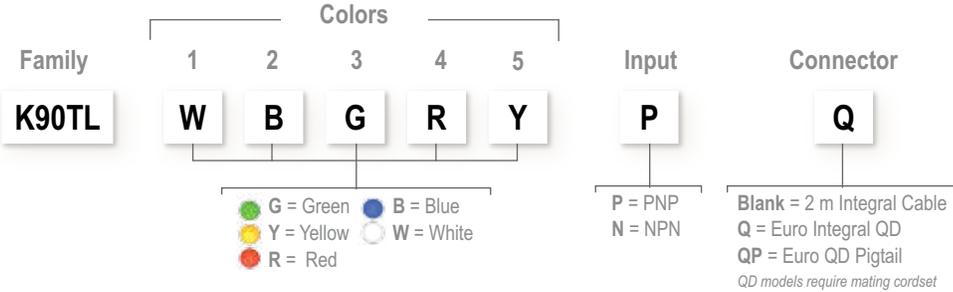

K90L and K90TL Domed Indicators are rugged, 90 mm indicator lights that provide extremely bright and uniform illumination from all directions and longer distances. The K90L models have a separate input wire for internally controlled flashing, while the K90TL models can be used as a multisegment tower light, alternating between selected input colors to indicate multiple statuses.

- Illuminated dome provides easy-to-see operator guidance
- Up to five colors in one device to communicate multiple statuses
- Rugged design with an IP67 rating
- K90L has a separate input wire to enable flashing of active color
- By enabling multiple inputs, the K90TL alternates between selected colors

K50 Beacon Omni-Directional High-Intensity Indicators

Banner's K50 Beacon Indicators are extremely bright, making them ideal for indoor and outdoor areas with high levels of ambient light. The tough UV stabilized polycarbonate housing and epoxy encapsulated electronics allow for years of maintenance-free operation. They are available in five colors and a wide range of voltage levels to fit nearly any application.

- Continuous, strobing and rotating models available
- 12-30 V dc models are ideal for battery-powered mobile applications
- Models with LEDs emitting from the top in addition to the perimeter
- Rugged, sealed housing rated to IP69K for high-pressure washdown
- Models for 120 V and 230 V ac operation

K50L Daylight Visible Directional Indicators

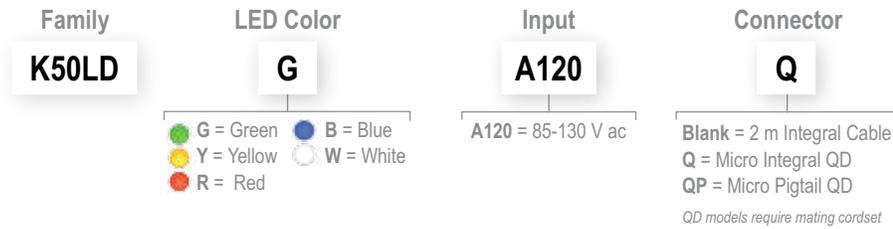

Banner's K50 Daylight Visible Indicators are rugged, cost-effective and easy-to-use indicators for use in outdoor environments or in areas with high levels of ambient light. The K50 Daylight Visible Indicator has a flat 50 mm profile with high-intensity LEDs that clearly show status indication.

- Intense levels of light output for outdoor application use
- Easy-to-install 30 mm threaded base mount, no tools required
- Up to three colors in one device to communicate multiple statuses
- Rugged design for many years of operation
- Completely self-contained, no controller needed

K50 Modbus Indicators

The K50 Serial Multicolor Indicators are the first rugged, industrial-rated indicator devices using a common industrial protocol for communication and programming, providing improved ways to program and install a system.

- Rugged, compact multicolor indicators in several package types
- Built-in flashing and strobing capability
- High intensity models for outdoor applications
- Fully encapsulated IP67/IP69K construction
- Modbus RTU communication minimizes the cabling requirements

Supply Voltage	12 to 30 V dc
Construction	Base: Polycarbonate Covers: Polycarbonate LEDs on LD Models: Acrylic
Environmental Rating	IEC IP67/IP69K per DIN 40050
Operating Temperature	-40 to +50 °C (-40 to +122 °F)
Certifications	CE

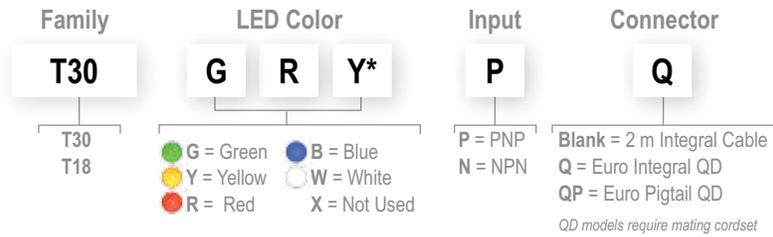

T30 and T18 T-Style Indicators

The T18 and T30 Indicators have an 18 mm or 30 mm T-Style housing that is easy to install in a punched hole or directly on a machine.

- Up to three colors in one device to communicate multiple statuses
- 18 mm or 30 mm T-Style housing for easy installation
- Designed for panel-mount or stand-alone applications
- Right-angle wiring connection for low profile applications
- Rugged, fully encapsulated design rated to IP67

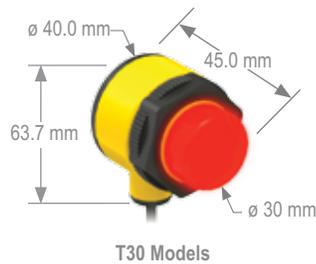

One-, Two- or Three- Color Indicators

* Add 7 after last color option for Sensor Emulators (example, T30GYX7PQ). Use with discrete output of photoelectric and proximity sensors to duplicate the sensor's Green and Yellow indicator function. When the sensor is powered, the Green LED is ON. When the sensor's output is energized, the Yellow LED is ON.

T8L T-Style Indicators

Banner's T8L T-Style Mount Indicators have a low profile, ideal for simple panel mounting or use on a machine. The T8L can be easily assembled into a punched hole with the included mounting hardware, no additional hardware needed.

- Up to two colors in one device with an 8 mm threaded nose
- Designed for panel-mount or stand-alone applications
- Right-angle wiring exit for low profile applications
- Ideal for operator guidance and equipment status indication
- Rugged design rated to IP67

One- or Two- Color Indicators

* Add 7 after last color option for Sensor Emulators (example, **T8LGYX7PQP**). Use with discrete output of photoelectric and proximity sensors to duplicate the sensor's Green and Yellow indicator function. When the sensor is powered, the Green LED is ON. S18L & S22L Barrel Indicators

The overmolded IP69K rated design makes the S18L & S22L Indicators extremely rugged and able to withstand harsh environments. There are standard intensity and high intensity daylight visible models available in a variety of colors with 18 mm or 22 mm bases.

- Designed for panel-mount or stand-alone applications
- Up to three colors available in one device allowing one S18L or S22L to replace three conventional panel indicators
- Compact and light weight, but extremely rugged
- Daylight visible models can be used outdoors in direct sunlight or as miniature task or vision lights with extremely bright indication
- Models meet NEMA 4 and 4X enclosure ratings

* Single-color models are available and should be ordered as PNP, but can be wired for either PNP or NPN input

Supply Voltage

General Purpose: 10 to 30 V dc
High-Intensity Models: 9 to 30 V dc

Construction

Housing: UV stabilized polycarbonate
Mounting Nut: PBT
Sealing Washer: Nitrile

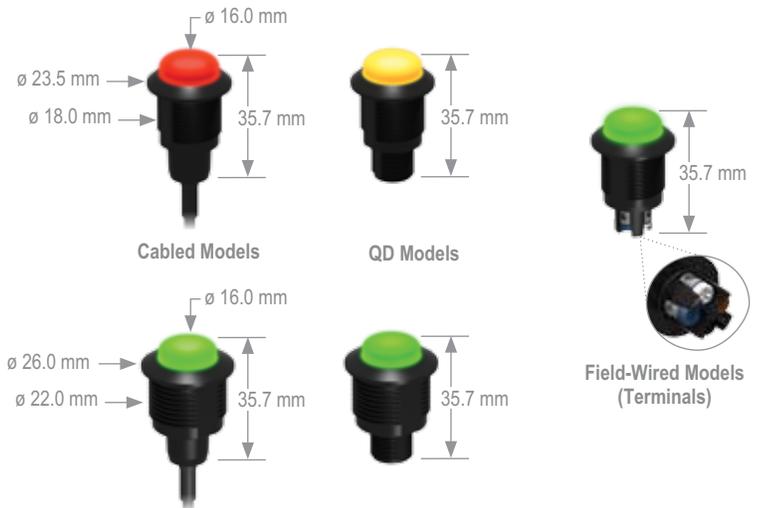

Environmental Rating

IEC IP67, IP69K, per DIN 40050

Operating Temperature

M18 Metal Barrel Indicators

The M18 Indicators are compact, yet extremely rugged indicators that are easy-to-install with an 18 mm threaded base. These compact devices are completely self-contained and offer easy-to-see operator guidance on the factory floor.

- Up to three colors in one device to communicate multiple statuses
- 18 mm barrel-mount indicator with nickel-plated brass housing
- Ideal for operator guidance and equipment status indication
- Rugged, completely epoxy encapsulated design can withstand harsh conditions

One-, Two- or Three- Color Indicators

* Add 7 after last color option for Sensor Emulators (example, **M18GYX7PQ**). Use with discrete output of photoelectric and proximity sensors to duplicate the sensor's Green and Yellow indicator function. When the sensor is powered, the Green LED is ON. When the sensor's output is energized, the Yellow LED is ON.

K80 Call Light Battery Powered Flashing Indicators

Banner's portable, battery-powered K80 Call Lights provide operational status indication for personnel and are ideal in locations where power is limited or unavailable. The preassembled housing and multiple mounting options make the indicator light cost-effective and easy to install.

- Flashes ON/OFF
- Switch activated
- No assembly required
- Rugged and easy to install
- Long-life LED technology gives up to 100 hours of operation on two 9V batteries (included)

Model	LED Function	Input
K80CLR	Red 1 Second Flash Rate	ON/OFF Switch

Supply Voltage	18 V dc (includes two 9 V batteries)
Construction	Housing: Polycarbonate Dome: Polycarbonate
Environmental Rating	IP50
Operating Temperature	-20 to +50 °C (-4 to +122 °F)

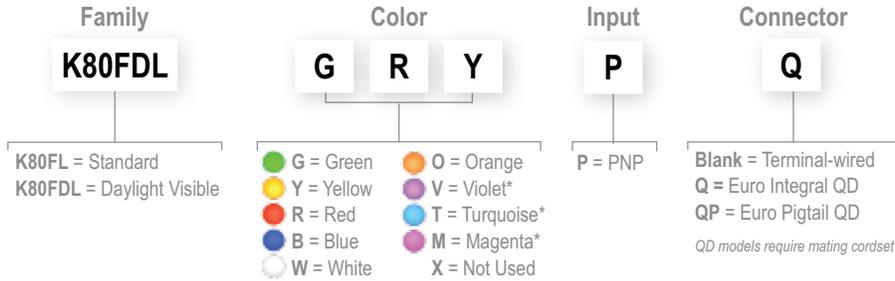

SMBDX80DIN
for mounting to 35 mm DIN Rail

K80FL and K80FDL Flat-Mount Indicators

The K80FL standard intensity models have uniform lighting, viewable from nearly 180 degrees. The K80FDL daylight visible models are more intense with a narrower field-of-view for use in areas with high levels of ambient light, including outdoor applications. These indicators are ideal for a variety of applications including traffic control at truck docks, car washes and general machine status indication.

- Extremely bright indicator with selectable flash rates
- Up to three colors in one device with a choice of many colors or color combinations
- Large flat face allows for clear indication from farther distances
- Easy to mount to flat surfaces such as walls or panels
- Long-lasting LED technology with low power consumption

* These colors are not available in the daylight visible models

K80 Segmented Indicators

Banner's K80L Segmented Indicator has up to four individual segments that can be lighted separately or in combination for error-proofing and operator guidance applications.

- Easily mounted on flat surfaces
- Up to four individual color segments can show status of items simultaneously or in combination
- Optional, customizable labels available for enhanced segment identification
- Highly visible color segments allow for quick and easy identification of statuses

Supply Voltage | 18 to 30 V dc

K50FL Flat-Mount Domed Indicators

Banner's K50FL can display up to five colors in a single device for various application uses. With a bright, highly visible illuminated dome, K50FLs are ideal for operator guidance and equipment status indication.

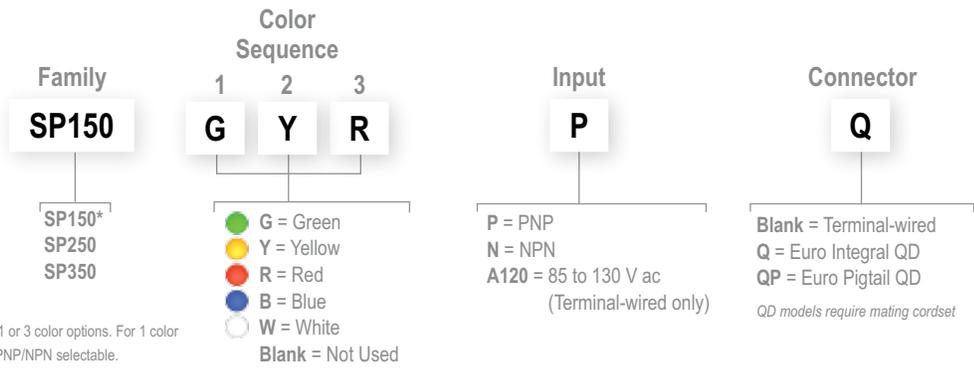

- Flat-pack mounting allows for indicators to be mounted on any flat surface
- Fully encapsulated indicators with most models rated to IP69K for high-pressure washdown environments
- Many colors and color combinations available
- Long-lasting LED technology with low power consumption
- Multifunction models available with steady ON, flashing or alternating frequencies

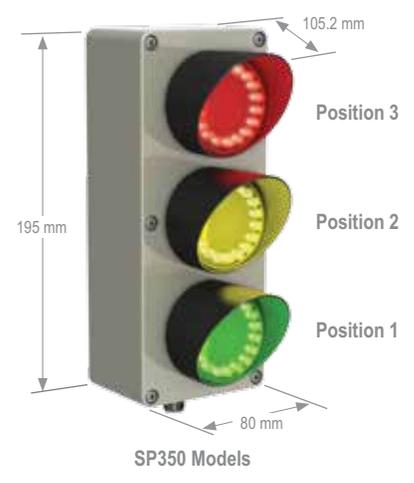

SP Series Signal Lights

Banner's SP Series Indicators are rugged, easy-to-install signal lights that provide high visibility outdoors or in other applications where there are high levels of ambient light. These signal lights are preassembled with up to three indicators per unit. The rugged housing is designed to withstand wet and dirty environments.

- Intense levels of light output for use outdoors or in environments with high levels of ambient light
- Controlled field-of-view for signage and narrow lane use
- Shock, vibration and impact resistant
- Convenient Euro quick-disconnect option for easy installation
- 15 to 30 V dc or 85 to 130 V ac supply voltage, depending on model

TL30F Linear Segmented Indicators

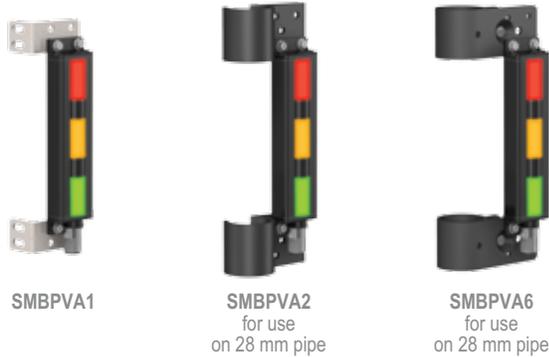

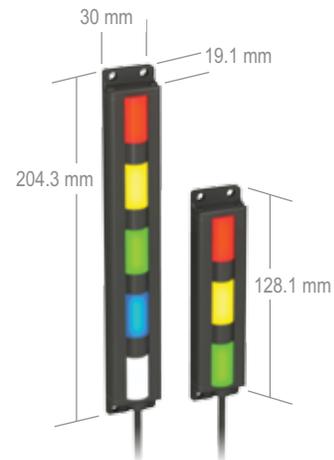

Banner's TL30F Linear Segmented Indicator is a low-profile, flat-mount indicator. Multiple color segments can be lit simultaneously, making this a useful option for operator guidance or machine indication. This versatile product is also frequently used with pick-to-light products to give operators additional visual indication such as number of parts to pick or color-coded part picking.

- Displays three or five colors in single device
- Durable, rugged metal housing rated to IP65
- Easily mounts on horizontal or vertical work centers or automation machinery
- Compact devices easily fit on work stations
- 18 to 30 V dc bimodal (NPN or PNP) and 21 to 27 V ac inputs

* TL30F indicators are pre-configured in three- or five-colors. Positions are set as pictured below.
For other color combinations, please contact the factory.

BANNER

Touch Buttons

Banner is the leader in ergonomic, visual and sealed operator touch buttons for industrial applications. Banner's Touch Buttons require no protective enclosure. A wide variety of mounting brackets and convenient quick-disconnect options make Banner Touch Buttons easy to mount on tube racks, metal shelving or automation machinery. Since Banner Touch Buttons can have multiple colors per button and a variety of I/O capabilities, one can replace several conventional buttons, making them ideal in lean manufacturing environments.

K50 Illuminated Touch Buttons

The K50 Touch Series is a versatile family that combines a large, bright indicator with solid-state switching capability activated by a simple touch. There are several models with a variety of input/output options to choose from that fit nearly any application.

- Simple operation with the touch of a finger, hand or whole palm, with or without gloves
- Rugged, fully encapsulated IP69K construction
- Models with either latching or momentary outputs
- One-, two- and three-color models available with a variety of colors and option of custom laser surface marking

Independent Input/Output Models with up to Three Indicator Colors Controlled by Separate Inputs

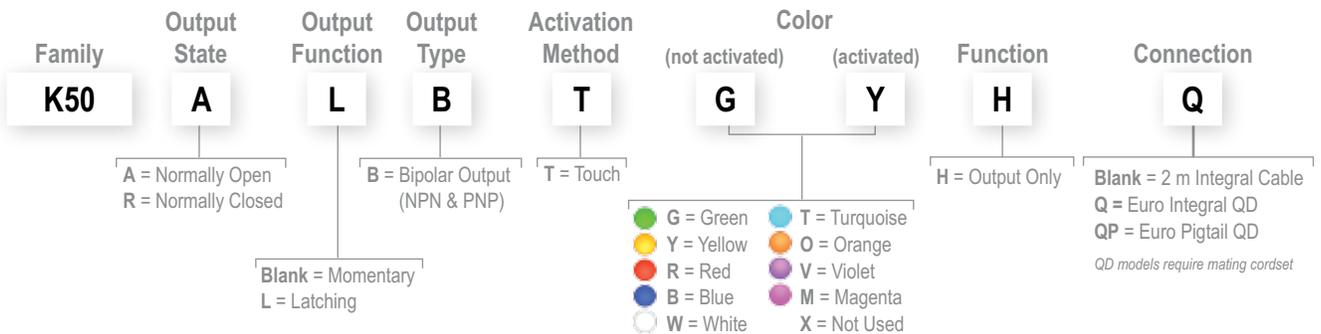

The output is activated by touching the device and is totally independent of the indicator inputs.

One- or Two-Color Momentary or Latching Bipolar (1 NPN and 1 PNP) Output Models

These models do not have inputs to control the indicator. The color of the indicator is determined by the non-activated or activated condition.

K30 Illuminated Touch Buttons

The K30 Touch Series is a versatile family that combines a small, bright indicator with solid-state switching capability activated by a simple touch. These easy-to-use small indicators are cost-effective with a 22 mm threaded base to fit into industry standard punched holes.

- Simple operation with the touch of a finger, hand or whole palm
- Easily actuated with bare hands or work gloves
- Rugged, fully encapsulated IP69K construction
- Models with either latching or momentary outputs
- One- and two-color models available with a variety of colors and option of custom laser surface marking

Independent Input/Output Models with One Color Controlled by a Separate Input

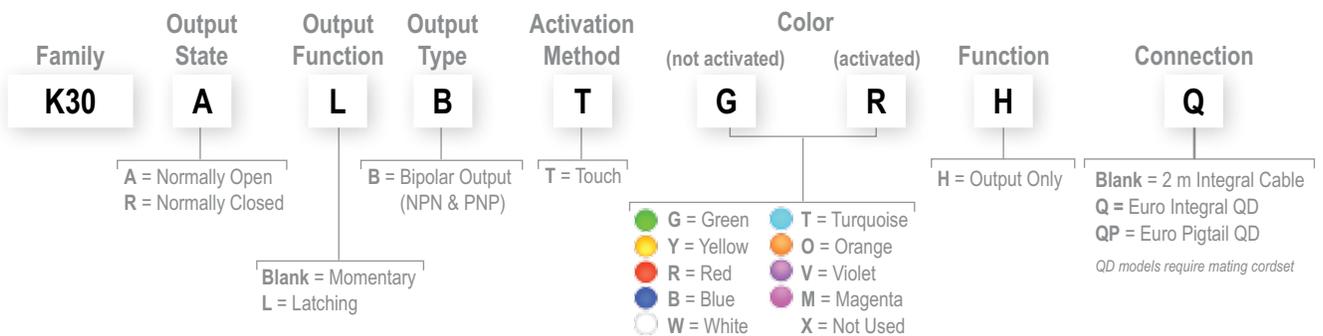

The output is activated by touching the device and is totally independent of the indicator input

OTB/LTB Optical Touch Buttons

Banner's OTB and LTB are the industry standard for ergonomic touch buttons and are ideal as replacements for mechanical pushbuttons. These touch buttons have LED indicators to signal "power on" and "output active" conditions.

- Optimized for easy mounting with 30 mm threaded base
- Ergonomic design eliminates hand, wrist and arm stress
- Momentary and alternate action models available
- Available in a wide variety of voltage ranges and output types to suit any application
- Field covers (black) included to prevent inadvertent activation from loose clothing, debris, etc.

• OTB models only
 ** Only available for OTBVP6 or OTBVN6 models

Supply Voltage	Models for 105 to 130 V ac, 210 to 250 V ac (50/60 Hz), 10 to 30 V dc, or 20 to 30 V ac/dc
Construction	<i>Upper Housing:</i> Black polysulfone or Polycarbonate <i>Base:</i> Fiber-reinforced PBT

VTB Verification Touch Buttons

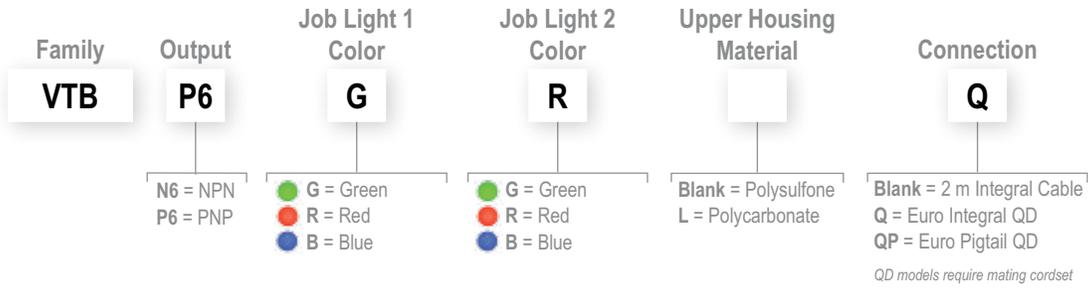

The VTB features a brightly illuminated base for enhanced visual indication. Like the OTB, the VTB is an ergonomic touch button that requires no physical pressure to operate, and is ideal for machine start/stop and other applications where clear, visual indication of the touch button status is desired.

- Illuminated version of the Optical Touch Button
- Ergonomic design eliminates hand, wrist and arm stress
- Provides bright, easy-to-see status indication that can be seen in almost any environment
- One- and two-color models available
- 30 mm threaded base for convenient mounting

K50L and K30L Illuminated Push Buttons

These two product families combine Banner's popular K50L and K30L EZ-LIGHT® indicators with a sealed push button that can withstand washdown applications. Unlike typical lighted push buttons, these devices are extremely bright and can be seen from all directions due to their unique shape. The rugged, encapsulated construction allows them to be used as stand alone devices without an enclosure.

- Up to three colors in one device with a variety of colors for customized indication
- Available in two sizes with a variety of mounting brackets available
- Quick-disconnect models for easy installation
- Dry contact switch output is completely isolated from the LED indicator input
- Designed for panel-mount or stand-alone applications

30 mm Mount Illuminated E-Stops

Banner's round, 30 mm mount E-Stop buttons are ideal for many emergency stop safety applications with bright, highly visible indication. The easy to install E-Stops are available with two-color lighting, or red lighting only. EZ-LIGHT™ logic provides an illuminated base when the button is armed and the machine is enabled to RUN or is running, and turns to a flashing red indication whenever the button is pushed.

- Easy installation and hookup with no assembly, individual wiring or additional enclosure required
- Rugged design rated to IP65 with a 30 mm mounting base
- Models designed to interface with Safety BUS nodes/gateways
- Safe Break Action ensures NC contacts will open if the contact block is separated from the actuator
- Compliant with ANSI B11.19, ANSI NFPA79 and IEC/EN 60204-1 Emergency Stop requirements

CSS Series Hookup Cordset Solution

This interconnection solution allows for quick hookup of a series string of emergency stop buttons. The user must ensure that the CSS series hookup cordsets are installed so that they cannot be easily defeated by not allowing access to the QD connectors or allowing improper connection bypassing the function of the Emergency Stop.

Flush-Mount E-Stop Buttons

Banner's flush mount E-Stop buttons are ideal for many emergency stop safety applications with bright, highly visible indication. The easy to install E-Stops are available with two-color lighting, or red lighting only. EZ-LIGHT™ logic provides an illuminated base when the button is armed and the machine is enabled to RUN or is running, and turns to a flashing red indication whenever the button is pushed.

- Easy installation and hookup with no assembly, individual wiring or additional enclosure required
- IP65 sealed enclosure with flush-mount design for easy mounting on walls or flat surfaces
- Lockable models available
- Models designed to interface with Safety BUS nodes/gateways
- Compliant with ANSI B11.19, ANSI NFPA79 and IEC/EN 60204-1 Emergency Stop requirements

Pick-to-Light

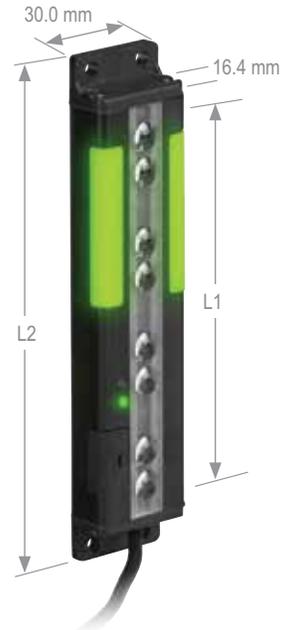

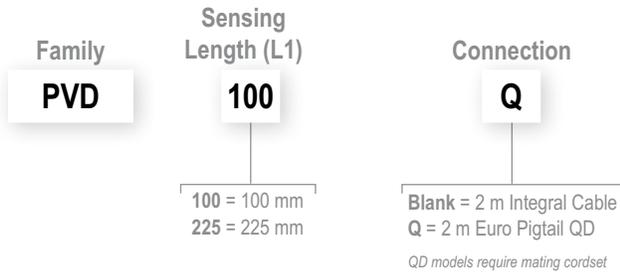

Banner's Pick-to-Light products are the easy choice for light-guided assembly processes. Banner is a specialist in pick-to-light applications with products that reduce assembly time and increase quality for online and offline operator guidance processes. Pick-to-light products have unique, rugged packages that are easy to mount for quick installation and have bright indicators with a choice of verification functions.

PVD Diffuse/Retroreflective Parts Verification Array

PVD Pick-to-Light Sensors are compact, one-piece solutions useful in many part assembly, pick-to-light and error-proofing applications.

- Innovative, low-profile design with auto-configuration feature for diffuse or retroreflective modes
- Ideal for bin picking in tube rack or shelving applications
- Green light for pick and red light for misspick with selectable control features
- Rugged housing for high durability
- Protective mounting brackets available

PVL Retroreflective Parts Verification Array

Banner's PVL Pick-to-Light Retroreflective Sensor offers a reliable, cost-effective solution for bin-picking processes. The PVL is easy to install with no assembly required.

- Rugged housing for high durability and works well for larger openings and parts
- 70 mm beam spacing with two available lengths
- Highly visible pick/mispick dual-function indicator
- Can mount directly to a racking profile vertically or horizontally
- Slotted housing design allows cable to exit on either end

PVA Opposed-Mode Parts Verification Array

The PVA Pick-to-Light Sensor helps reduce missed and misassembled parts for increased quality and reduced production costs. With highly visible job lights, Banner's PVA provides the most reliable solution for error proofing.

- Emitter/receiver arrays for high resolution sensing
- Four lengths to cover a variety of openings and applications
- Highly reliable sensing over a long operating range
- Wide field-of-view makes alignment easy
- Protective mounting brackets available

K50 Touch Pick-to-Light Series

The K50 Touch Series is a versatile family that combines a large, bright indicator with solid-state switching capability activated by a simple touch. These easy-to-use lighted touch button indicators allow for increased productivity with highly visible indication.

- Ergonomic design requires no physical pressure to operate, preventing stress on hands and wrists
- Ideal for efficient pick-to-light applications where a rugged device is needed
- Simple operation with the touch of a finger, hand or whole palm, with or without gloves
- One-, two- and three-color models available with a variety of colors and option of custom laser surface marking
- Rugged, water-resistant IP69K housing

One- or Two-Color Models

Three-Color Models

Supply Voltage	12 to 30 V dc
Construction	Housing: Polycarbonate Translucent dome: Polycarbonate Mounting Nut: PBT
Environmental Rating	IEC IP67, IP69K per DIN 40050
Operating Temperature	-40 to +50 °C (-40 to +122 °F)
Certifications	 

5-Pin M12/ Euro-Style Cordsets
 Straight connector models listed; for right-angle models, add **RA** to the end of model number (example, **MQDC1-506RA**)

MQDC1-506
 2 m (6.5')
MQDC1-515
 5 m (15')
MQDC1-530
 9 m (30')

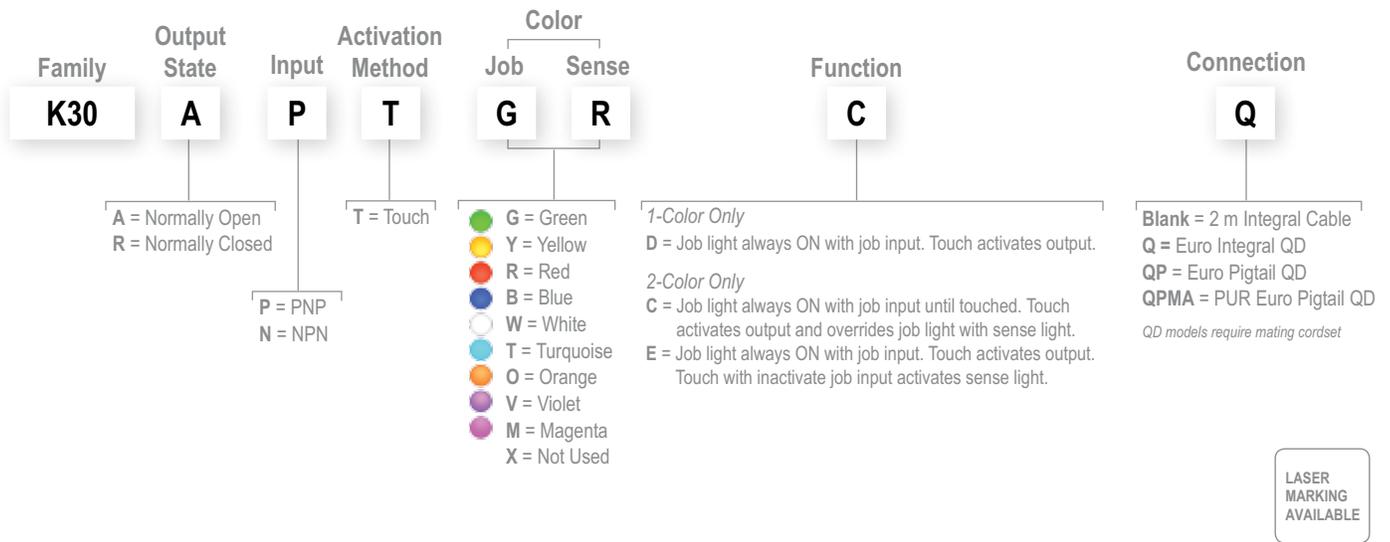

Additional accessories are available at bannerengineering.com

K30 Touch Pick-to-Light Series

Banner's K30 Touch Pick-to-Light Series is a versatile family that combines a small, bright indicator with solid-state switching capability activated by a simple touch. These easy-to-use small indicators are cost-effective with a 22 mm threaded base to fit into industry standard punched holes and are ideal for error proofing of bin-picking and parts-verification applications.

- Ergonomic design requires no physical pressure to operate, preventing stress on hands and wrists
- Ideal for efficient pick-to-light applications where a rugged device is needed
- Simple operation with the touch of a finger, hand or whole palm with or without gloves
- One- and two-color models available with a variety of colors and option of custom laser surface marking
- Rugged, water-resistant IP69K housing

Supply Voltage	12 to 30 V dc
Construction	Housing: Polycarbonate Translucent dome: Polycarbonate Mounting Nut: PBT
Environmental Rating	IEC IP67, IP69K per DIN 40050
Operating Temperature	-40 to +50 °C (-40 to +122 °F)
Certifications	 

4-Pin M12/
Euro-Style Cordsets

Straight connector models listed;
for right-angle models, add RA
to the end of model number
(example, MQDC-406RA)

MQDC-406	2 m (6.5')
MQDC-415	5 m (15')
MQDC-430	9 m (30')

K50 Optical Pick-to-Light Series

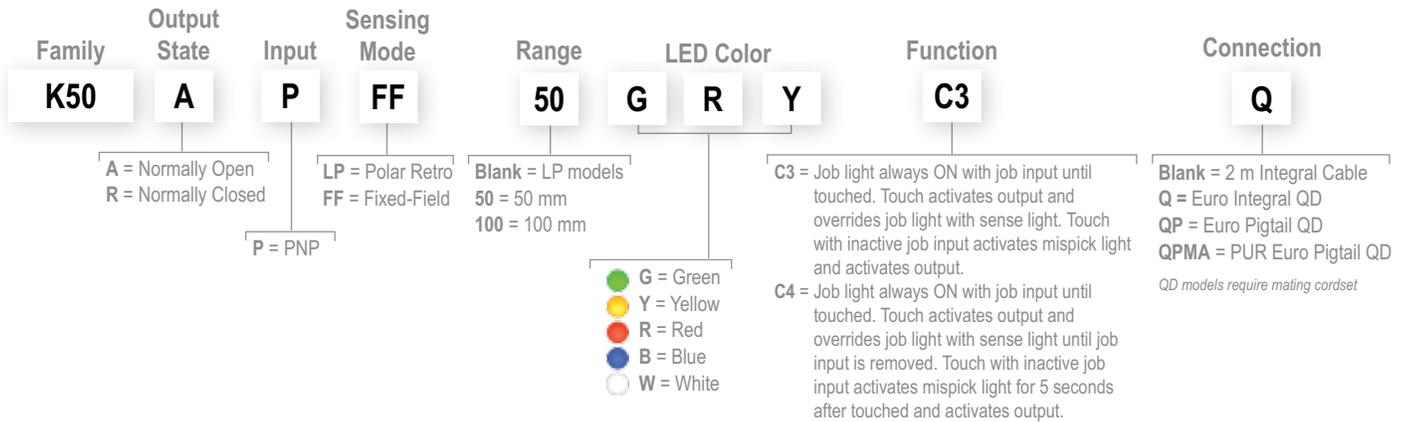

The K50FF and K50LP use reliable photoelectric sensing for non-contact part-picking applications.

- Photoelectric pick acknowledgment
- Fixed-field or polarized retroreflective depending on model
- Simple, one-piece, cost-effective installations
- Easily mounted on any type of tube rack or shelving
- Several logic functions available to customize the operation of the application and control system

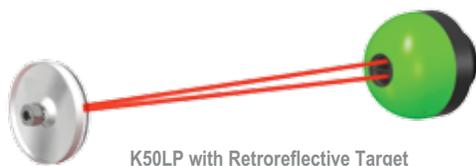

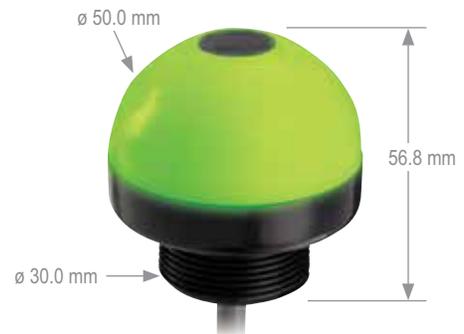

One- or Two-Color Models

Three-Color Models

Sensing Range	Polarized Retroreflective: 2.0 m Fixed-field: 50 mm or 100 mm
Supply Voltage	12 to 30 V dc
Construction	Housing: Polycarbonate Translucent dome: Polycarbonate Mounting Nut: PBT
Environmental Rating	IEC IP67, IP69K per DIN 40050
Operating Temperature	-40 to +50 °C (-40 to +122 °F)
Certifications	  Some models pending. Contact factory for additional information.

**5-Pin M12/
Euro-Style Cordsets**
Straight connector models listed;
for right-angle models, add **RA**
to the end of model number
(example, **MQDC1-506RA**)

K30/K50/K80 Push Button Pick-to-Light Series

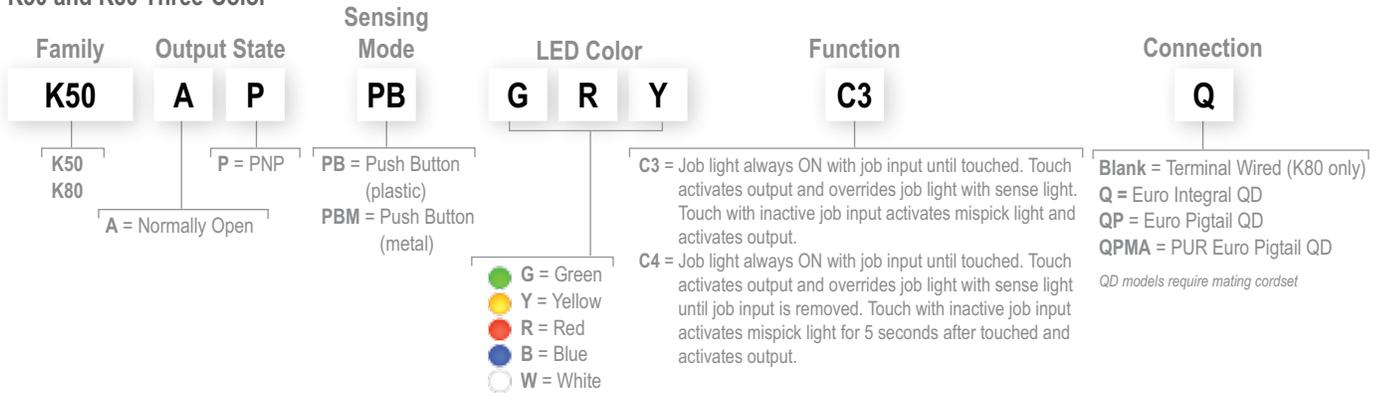

Banner's line of indicators with push buttons are ideal for pick-to-light operations that require a physical acknowledge function. Unlike conventional push buttons, these devices are extremely bright and can be seen from all directions due to their unique shape.

- Rugged, encapsulated construction with sealed push button
- Convenient Euro quick-disconnect options for simple installation
- Multiple colors per light with a variety of I/O options
- Bright, clear indication is visible in the harshest environments
- Wide selection of mounting brackets for easy installation on tube racks or shelving

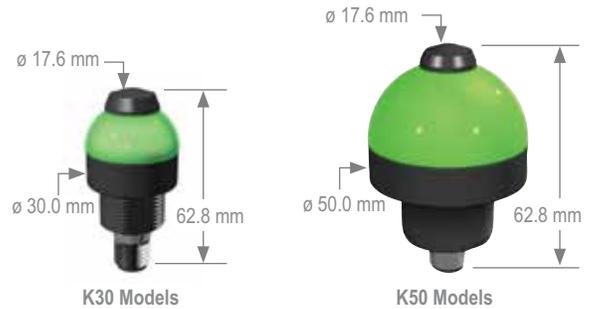

K30, K50 and K80 One- or Two-Color

K50 and K80 Three-Color

Supply Voltage	12 to 30 V dc
Construction	Base and Translucent Dome: Polycarbonate Push Button: Thermoplastic or Stainless Steel
Environmental Rating	IEC IP67
Operating Temperature	-40 to +50 °C (-40 to +122 °F)
Certifications	 

MQDC1-506
2 m (6.5')
MQDC1-515
5 m (15')
MQDC1-530
9 m (30')

Additional accessories are available at bannerengineering.com

K50 Modbus Pick-to-Light Series

The K50 Serial Pick-to-Light Sensors are the first rugged, industrial-rated pick-to-light devices using a common industrial protocol for communication and programming, providing improved ways to program and install a system.

- Compact, single-point devices for error-proofing of bin-picking operations
- Rugged, cost-effective, and easy-to-install solutions for error-proofing and parts verification applications
- Illuminated dome provides easy-to-see job light status
- Choose either polarized retroreflective or fixed-field models
- Fully encapsulated IP67 construction
- Modbus RTU communication minimizes the cabling requirements

Sensing Range	Polarized Retroreflective: 2.0 m Fixed-field: 50 mm or 100 mm
Supply Voltage	12 to 30 V dc
Construction	Polycarbonate
Environmental Rating	IEC IP67
Operating Temperature	-40 to +50 °C (-40 to +122 °F)
Certifications	CE

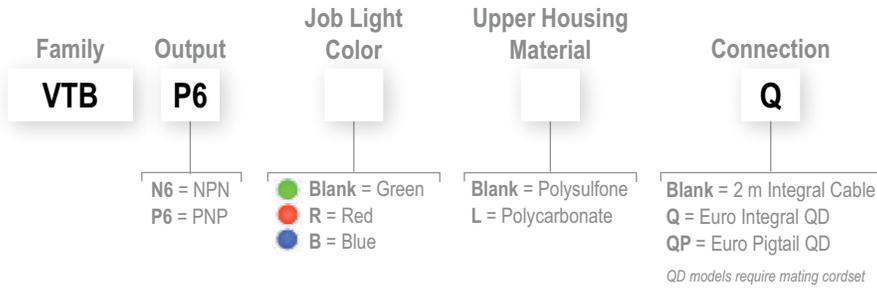

VTB Verification Touch Buttons

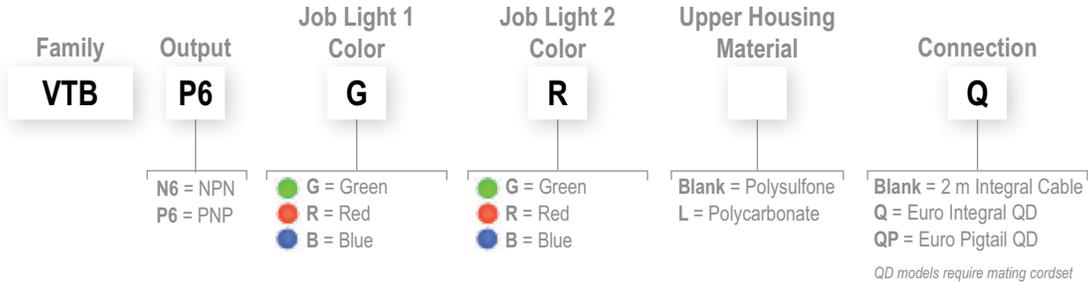

The VTB provides an ergonomic pick-to-light solution that requires no physical pressure to operate. Output is activated while a finger is in the “touch area,” interrupting the button’s optical sensing beam. A brightly illuminated base provides clear visual indication to the operator.

- Ideal for pick-to-light operations in tight areas
- Ergonomic design eliminates hand, wrist and arm stress
- Provides bright, easy-to-see status indication that can be seen in almost any environment
- One- or two-color models available
- 30 mm threaded base for convenient mounting

One-Color Illuminated Base Models

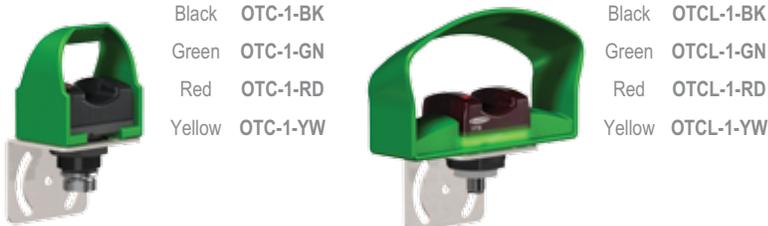

Two-Color Illuminated Base Models

Supply Voltage	12 to 30 V dc
Construction	Upper Housing: Polysulfone or polycarbonate Base: White polycarbonate
Environmental Rating	IP66
Operating Temperature	-20 to +50 °C (-4 to +122 °F)
Certifications	

Optional Field Covers

**4-Pin M12/
Euro-Style Cordsets**
Straight connector models listed;
for right-angle, add RA to the end
of the model number (example,
MQDC-406RA)

MQDC-406
1.83 m (6')
MQDC-415
5 m (15')
MQDC-430
9.14 m (30')

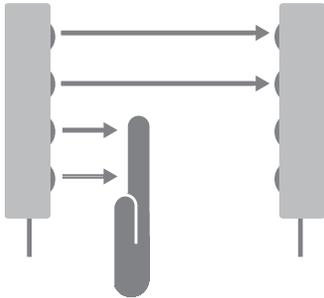

**5-Pin M12/
Euro-Style Cordsets**
Straight connector models listed;
for right-angle models, add RA
to the end of model number
(example, MQDC1-506RA)

MQDC1-506
2 m (6.5')
MQDC1-515
5 m (15')
MQDC1-530
9 m (30')

Actuation Methods

The actuation method is the means by which an operator's actions are sensed. Banner's Pick-to-Light line includes a variety of actuation methods, including contact and non-contact sensors covering a single point on a small bin or a wide opening on a large bin. These actuation methods enable error proofing in a large variety of assembly and kitting applications. Below is a description of each actuation method offered to help you select the best solution for your specific application.

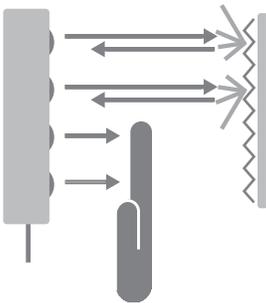

Emitter/Receiver

In opposed-mode sensing, the sensor's emitter and receiver are housed in two separate units. The emitter is placed opposite the receiver, so that the light beam goes directly from the emitter to the receiver.

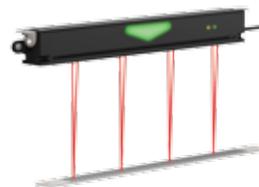

page 122

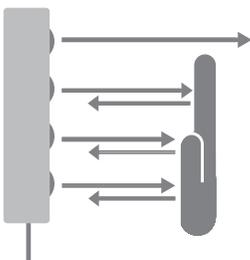

Retroreflective Mode

Retroreflective sensors contain both the emitter and receiver elements. The beam(s) is(are) established between the emitter, the retroreflector and the receiver. An object is sensed when it interrupts or "breaks" the effective beam.

page 120

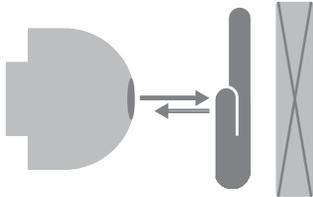

Diffuse

With a diffuse-mode sensor, the object is detected when the object reflects the sensor's transmitted light energy back to the sensor.

page 118

Fixed Field Mode

Background suppression sensors have a definite limit to their sensing range, ignoring objects that lie beyond their range.

Fixed-field sensors compare the amount of reflected light that is seen by two differently aimed receiver elements. If the light reaching the second receiver element is equal to or greater than the light reaching the first receiver element, then the object will be recognized.

page 128

Push Buttons

Push buttons take physical force to press and actuate the button.

page 130

Touch Buttons

Touch buttons can be actuated with no force, just contact with the surface. The contact can be made with a whole hand, palm or finger.

Monitor Status across the Factory with Banner's Wireless Solutions

Easy-to-use Wireless Systems Can Transform Banner Tower Lights and Indicators into a Wireless Visual Management Solution

Banner wireless products eliminate costly wiring and speed up continuous improvement projects. Wireless products are optimized for long range data transmission with bi-directional, two-way communication that supports input and output signals.

Central monitoring of machine status with Banner's Wireless products allows users to easily analyze productivity and efficiency. Banner's Wireless Gateway can connect directly to an HMI or other control system to send status messages via email or text.

Banner's SureCross® Wireless solutions can be paired with any Banner indicator and are ideal for a wide range of applications including Andon, call button, remote operator guidance, pick-to-light, logistics and status monitoring.

For complete information on Banner's full Wireless family, visit www.bannerengineering.com/Wireless.

Node
The Node collects data and wirelessly transmits this data to the Gateway

Gateway
The Gateway accepts data and interfaces to the control system and plant networks or can be wired directly to discrete I/O devices

	Models	Frequency	Environmental Rating	I/O
Node	DX80N9X6S-P8	900 MHz	IP67, NEMA 6	12 Inputs or Outputs Configurable
	DX80N2X6S-P8	2.4 GHz		
Gateway	DX80G9M6S-P8	900 MHz		
	DX80G2M6S-P8	2.4 GHz		

NOTE: Additional Gateways are available to support Modbus TCP/RTU and Ethernet IP industrial protocols

Advanced Vision Lighting Solutions from Banner

Reliable Vision Performance Requires Advanced Lighting Solutions

Banner knows lights. We've been designing and perfecting LED-based industrial controls for over 40 years. We've developed a comprehensive line of lighting solutions dedicated to your machine vision applications.

For complete information on Banner's full Vision Lighting family, refer to the *Vision Lighting brochure*, www.bannerengineering.com/137003, or visit www.bannerengineering.com/visionlights.

Linear Array Lights

Linear Array Lights effectively illuminate large areas over long distances while cutting through dust, mist and grime

LED Area Lights

Area Lights provide even illumination with high-intensity lights for the highest levels of contrast to help vision sensors detect the presence or absence of a feature

LED On-Axis Lights

Banner's innovative On-Axis Lights use a beam splitter to focus light along a camera's optical axis, providing even, diffused illumination

LED Back Lights

Banner Backlights provide more optical contrast by creating an image that shows a silhouette of a part, allowing for inspection of size and shape

LED Ring Lights

Ring Lights brightly illuminate the area directly in front of a camera and are especially useful for small parts and high-speed inspections

Low-Angle Ring Lights

Low-Angle Ring Lights enhance the contrast of surface features, making them ideal for a number of quality, identification and verification applications

LED Spot Lights

Banner's Spot Lights are compact to fit into tight spaces, and when properly placed can effectively create shadows or highlights to boost optical contrast

Limited Warranty

Banner Engineering Corp. warrants its products to be free from defects in material and workmanship for one year following the date of shipment. Banner Engineering Corp. will repair or replace, free of charge, any product of its manufacture which, at the time it is returned to the factory, is found to have been defective during the warranty period. This warranty does not cover damage or liability for misuse, abuse, or the improper application or installation of the Banner product.

THIS LIMITED WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES WHETHER EXPRESS OR IMPLIED (INCLUDING, WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE), AND WHETHER ARISING UNDER COURSE OF PERFORMANCE, COURSE OF DEALING OR TRADE USAGE.

This Warranty is exclusive and limited to repair or, at the discretion of Banner Engineering Corp., replacement. **IN NO EVENT SHALL BANNER ENGINEERING CORP. BE LIABLE TO BUYER OR ANY OTHER PERSON OR ENTITY FOR ANY EXTRA COSTS, EXPENSES, LOSSES, LOSS OF PROFITS, OR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES RESULTING FROM ANY PRODUCT DEFECT OR FROM THE USE OR INABILITY TO USE THE PRODUCT, WHETHER ARISING IN CONTRACT OR WARRANTY, STATUTE, TORT, STRICT LIABILITY, NEGLIGENCE, OR OTHERWISE.**

Banner Engineering Corp. reserves the right to change, modify or improve the design of the product without assuming any obligations or liabilities relating to any product previously manufactured by Banner Engineering Corp.
